## INSET SL16 : CAMAS LUINIE

Inset SL16 : Gaelic Name

### INSET SL16 : CAMAS LUINIE

#### Objectives

- To safeguard in bye croft land quality by favouring siting on poorer parts of crofts or on common grazings where applicable.
- To protect seaward views where applicable.
- To secure developer funded local road improvements to the Loch Long spine road because it is constrained in terms of its condition and capacity - this will apply to all development taking access off it and in particular to further development within Allt nan Sugh, Camas Luinie and Sallachy.
- To secure exceptional siting and design quality where public seaward views likely to be affected or land within a landscape designation.

### INSET SL15/17 : INVERINATE

#### Objectives

- To minimize pedestrian crossing movements of the A87 spine road
- To identify development as close as possible to the village centre in particular for affordable housing.
- To take account of the following development factors: steep ground to the north and Loch Duich to the south; trunk road access and visual prominence constraints; the attractive outlook over Loch Duich which is part of a SAC; and the pockets of amenity woodland on the lochside.
