q19a\_comments Please note that there is little or no reference to the existence of the geological diversity of Scotland, as highlighted by the existence of the three Scottish geoparks, the North-West Highlands Geopark, Lochaber Geopark and the new Shetland Geopark, all with current European Geopark Network and UNESCO Global Geopark status. There is no reference to the SSSI network or the Geological Conservation Review database. Our world-class geological heritage is a valued, sustainable resource for education, research and tourism. It has to be taken

into account and given legal protection.
