9 November 2009

Dear Sir/Madam

**Highland Wide Local Development Plan
Main Issues Report: August 2009
Questionnaire Response on behalf of Fort William Waterfront Limited**

We act on behalf of Fort William Waterfront Limited (FWWL). This submission relates to Fort William.

In relation to the "Development of Local Centres" section of the Main Issues Report published in August 2009, FWWL wishes to express support for the Preferred Option set out at **Question 10** of the related questionnaire.

During 2010, FWWL will be bringing forward proposals for the Fort William Waterfront development scheme. FWWL shares with the council the aspiration that the waterfront scheme will maintain and enhance the role and function of Fort William as a major town within the settlement hierarchy of the Highlands. In particular, the Waterfront scheme aims to ensure that the right developments are located in the right place to best serve both the resident community and the tourist community.

The emerging West Highlands and Islands area local plan recognises the importance of the Waterfront scheme. IEL submits that the Highland Wide Development Plan should also do so.

We trust that this is of assistance and look forward to receiving your acknowledgement of the receipt of this submission.

Yours faithfully

Brian W Muir

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that this is crucial for the company's financial health and for providing reliable information to stakeholders.

2. The second part of the document outlines the various methods used to collect and analyze data. It describes how the company uses a combination of direct observation, interviews, and surveys to gather information. The analysis of this data is then used to identify trends and areas for improvement.

3. The third part of the document focuses on the implementation of the findings. It details the specific steps that have been taken to address the issues identified in the previous sections. This includes changes to internal controls, improvements to the data collection process, and the implementation of new policies and procedures.

4. The final part of the document provides a summary of the key findings and conclusions. It highlights the most significant areas of concern and the actions that have been taken to address them. It also provides a clear picture of the current status of the company's operations and the progress that has been made.
