4.1 How do you want the West Highland and Islands area to change over the next 10–20 years?

Corpach at present has a good mix of woodland scattered through and around the areas of houses and industry. I would like to see these areas preserved and enhanced to form a connected network. The woodland forms an important element of the landscape both from within and from afar. Access from adjacent housing requires protection and development. Connecting pathways away from roads need to be developed.

4.2 What do you think are the best, existing assets and characteristics of the area? Think of your favourite landscapes, settlements, journeys, events and meeting places.

The main areas requiring protection and enhancement (as far as Corpach is concerned) extend from the Allt Dogha at Annat eastward above and through Corpach to the pine woods along towards Banavie. The attached photo illustrates the scene.

4.3 Attach any photographs to help show us what you mean.

4.4 How can these assets and characteristics best be safeguarded, improved or used to provide economic or community growth?

Much more ground needs to be designated as green or open space. More positive steps need to be taken to encourage community ownership and involvement.
