2.8 How will you or the developer of the site resolve any issues selected in question 2.7?

I would like to comment on possible developments in "East Sleat". Some of these developments involve street-lighting from Armadale to Teangue (East Sleat). This area consists of scattered houses here and there. It is a beautiful rural area, where one can still enjoy nature.

Coming from the city where it is Always light, it is so wonderful to enjoy on a dark night the real darkness of the sky. And with a clear night one can admire the thousands/millions of stars! In the city you hardly ever see stars because it is Always light (light pollution). Skye is amongst the rare places in Western Europe where one can still enjoy the beauty of universe. This is why we have chosen some 23 years ago to build our house here and enjoy the pureness of nature as opposed to the lights surrounding you elsewhere. This is also a reason why tourists like to come to Skye. Let us please save one thing as it is and do not spoil it with lights nobody wants.
