**6.2 Tell us whether this special landscape area should stay the same or how it should be expanded / contracted.  
Please provide reasons for your choice.**

I certainly would not like to see street lights from Armadale to Teangue. I think it would spoil the area plus do not see the need for it! I dont even like the street lights that have been provided at our council houses here in Ferrindonald but we had no say . Howcome the council think that this is a major health and safety issue and yet dont have the money to salt the roads in winter. I also think that Kilbeg will provide hopefully affordable housing for this area in the foreseeable future and although there is scope for more affordable council housing there would have to be improvements to the water supply in the area which is ineffiecient to meet the present demands. We have had the situation where the water was delivered by lorries.!!

I hope that no major changes occur until there has been detailed consultation with the people of the area – no plans in by the back door please!
