Address /

Description

of Land

3.4 Why should the land be protected?

The area identified as "East Sleat" is already subject to large scale development in the shape of the Kilbeg scheme for the building of many new houses and other amenities. This existing project is underway and is having a significant impact on the local communities and the environment between Teangue and Armadale. I see no place for further development of green spaces in "East Sleat" and would be really aggrieved at any further proposals to build on the land. The existing Kilbeg housing plan allows for new homes for many families and there are neither jobs nor school places for any broader development. The natural environment in Sleat and its dark skies are to its great advantage, attracting many visitors and bringing vital revenue to the area. Further development would only endanger this.

I am alarmed to understand that I should have received notification of this proposal for possible new development as no such communication has been made, which I find most disappointing.
