# Non-technical summary

## Purpose and objectives of the Environmental Report

As part of the preparation of the Main Issues Report (the first formal stage in the preparation of the Caithness and Sutherland Local Development Plan) the Highland Council is required to carry out a Strategic Environmental Assessment (SEA). This provides a systematic method for considering the likely environmental effects of any new plans, programmes and strategies (PPS) and for achieving the following aims:

- integrate environmental factors into PPS preparation and decision-making
- improve PPS and enhance environmental protection
- increase public participation in decision making
- facilitate openness and transparency of decision-making

The **Environmental Report** is an important stage in the SEA process. It outlines the contents of the Main Issues Report and highlights how the SEA process has influenced the proposals within the Plan.

## Purpose and objectives of the Plan

The purpose of a Local Development Plan is to guide where different types of development can happen, and to contribute towards delivering the Scottish Government's aim for sustainable economic growth. The Caithness and Sutherland Local Development Plan (CaSPlan) aims to set a planning framework for the northern part of the Highland Council region. It is supported by the Highland wide Local Development Plan (HwLDP) which sets the strategic planning policy context for whole of Highland (with the exception of the Cairngorms National Park area). CaSPlan sets out a vision which is based on four key outcomes which reflect the objectives of the Single Outcome Agreement 3 (SOA3), Local Transport Strategy and the Highland Council's Programme.

Following its adoption CaSPlan will replace the elements of the Caithness Local Plan (2002) and the Sutherland Local Plan (2010) which have been continued in force by The Town and Country Planning (Continuation in force of Local Plans) (Highland) (Scotland) Order 2012.

## State of the environment summary

The tables below show a summary of statistics relating to each of the key SEA topics:

<b>Biodiversity, flora, fauna</b>	<b>Climatic factors</b>
Some of the country's most important natural environments which are protected under international designations: SSSI (150), SAC (29), SPA (15), NNR (4), RAMSAR (3). Also 1,338 Semi-natural woodland sites, 1,010 ancient woodland sites and 8 Tree Preservation Orders.	<ul style="list-style-type: none"><li>• Areas which are at risk of coastal, fluvial and pluvial flooding have been taken into account with the use of SEPAs latest flood mapping data.</li><li>• Highland Council Energy Consumption is 22, 250GWH per annum.</li></ul>
<b>Population and Human health</b>	<b>Material assets</b>
<ul style="list-style-type: none"><li>• Population of Plan area in 2011 was 38,556 (17% of the Highland population). This is expected to decline to 37,020 by 2031.</li><li>• Current population density is 5.1 people per km<sup>2</sup> (compared to Highland at 8.7 people per km<sup>2</sup> and 67.4 for Scotland.</li><li>• Sutherland is the most sparsely</li></ul>	Within the Plan area there are: <ul style="list-style-type: none"><li>• Two housing markets: Caithness and Sutherland</li><li>• In Sept 2013 there were 20,904 houses</li><li>• Around 1/3 of housing in Wick and Thurso are affordable but in rural areas it is below the Highland average.</li></ul>

populated area of Scotland with only 2.2 people per km<sup>2</sup>.

- Private renting is lower than the Highland average
- High rates of vacant housing Caithness and second homes Sutherland

### Soil

- Large areas of peatland including the Flow Country, which is the largest expanse of blanket bog in Europe, covering about 4,000 km<sup>2</sup>.
- Large numbers of brownfield sites with potential contamination within Caithness

### Cultural heritage

Within the Plan area there are:

- 4 conservation areas
- 967 Listed buildings (66 A Listed; 552 B Listed and 349 C Listed)
- 598 scheduled monuments

### Water

- High number of rivers/lochs in good ecological condition

### Landscape

Caithness and Sutherland includes 4 National Scenic Areas – Scotland’s finest landscapes, 10 Wild Land Areas and 10 Special Landscape Areas

### Air

- No Air Quality Management Areas (AQMA) in Caithness or Sutherland at present.

## Expected Environmental Implications without CaSPlan

It is considered that without CaSPlan there would be increasing adverse impacts on the environment from development. This is primarily because the existing planning policy does not provide sufficient guidance to direct development to the best locations. The Highland-wide Local Development Plan contains a number of general policies in relation to the strategic protection and safeguarding of the environment. However it relies upon up-to-date area specific development plans to provide a framework to support these policies in the local context.

## Assessment approach and key findings

SEA objectives relating to the key topics were identified and are shown below:

SEA Topic	SEA Objectives
Biodiversity, Flora and Fauna	To conserve and where possible enhance biodiversity and accord to the protection of valued nature conservation habitats and species
Population and Human Health	To improve the living environment for all communities and promote improved health of the human population
Soil	Safeguard the soil quality, geodiversity and improve contaminated land
Water	Manage and reduce flood risk and protect the water environment
Climatic Factors	Reduce greenhouse gases and contribute to the adaptation of the area to climate change

Material Assets	Manage, maintain and promote sustainable use of material assets
Cultural Heritage	Protect and enhance, where appropriate, the area's rich historic environment
Landscape	Protect and enhance the character, diversity and unique qualities of the landscape

The vision, general policies and site options set out within the CaSPlan Main Issues Report (MIR) have been assessed against these objectives. Baseline information on each of the SEA topics, shown in Appendix 2, has helped to inform the preparation of the MIR and the assessment process.

An assessment matrix was prepared for the assessment of both the preferred approach and alternatives for the strategy and vision and general policy. A different matrix was prepared for the assessment of each of the sites included in the MIR. As part of the assessment of environmental impacts we also identified relevant mitigation measures. Our approach to mitigation is based on the hierarchy of avoid, reduce, remedy and compensate. Where appropriate we also look to enhance environmental features. The full site assessments are shown in Appendix 6.

From the site assessments we have identified issues which may have a significantly positive and a significantly negative impact on the environment. This has then allowed us to provide specific mitigation measures which will help to minimise the negative impact and maximise the positive impact.

### **Monitoring the effectiveness of the Plan**

A framework for monitoring the environmental outcomes of the Plan is set out in the Monitoring section of this report. To ensure that it is effective the framework is based on the main SEA topics and sets out the objective sought, the monitoring indicator, the responsible organisation, timescales and remedial action required.

### **Next Steps**

The Main Issues Report and the Environmental Report will be subject to a 13 week consultation which will run from 30<sup>th</sup> October 2014 to 29<sup>th</sup> January 2015. The responses received will be reviewed and evaluated and the results will inform the preparation of the Proposed Local Development Plan and the Revised Environmental Report.

# Introduction

## Purpose of this Environmental Report and key facts

As part of the preparation of Caithness and Sutherland Local Development Plan, the Highland Council is carrying out a Strategic Environmental Assessment (SEA). SEA is a systematic method for considering the likely environmental effects of certain PPS. SEA aims to:

- integrate environmental factors into PPS preparation and decision-making;
- improve PPS and enhance environmental protection;
- increase public participation in decision making; and
- facilitate openness and transparency of decision-making.

SEA is required by the Environmental Assessment (Scotland) Act 2005. The key SEA stages are:

<b>Screening</b>	Determining whether the PPS is likely to have significant environmental effects and whether an SEA is required
<b>Scoping</b>	Deciding on the scope and level of detail of the Environmental Report, and the consultation period for the report – this is done in consultation with Scottish Natural Heritage, The Scottish Ministers (Historic Scotland) and the Scottish Environment Protection Agency
<b>Environmental Report</b>	Publishing an Environmental Report on the PPS and its environmental effects, and consulting on that report
<b>Adoption</b>	Providing information on: the adopted PPS; how consultation comments have been taken into account; and methods for monitoring the significant environmental effects of the implementation of the PPS
<b>Monitoring</b>	Monitoring significant environmental effects in such a manner so as to also enable the Responsible Authority to identify any unforeseen adverse effects at an early stage and undertake appropriate remedial action.

The purpose of this Environmental Report is to:

- provide information on the Caithness and Sutherland Local Development Plan
- identify, describe and evaluate the likely significant effects of the PPS and its reasonable alternatives;
- provide an early and effective opportunity for the Consultation Authorities and the public to offer views on any aspect of this Environmental Report.

# Key facts about the Caithness and Sutherland Local Development Plan

## Name of Responsible Authority

The Highland Council (THC)

## Title of Plan, Programme or Strategy

Caithness and Sutherland Local Development Plan

## Subject (e.g. transport)

Town and Country Planning

## Purpose and or objectives of the PPS

To plan for and help guide the future use of land of the Caithness and Sutherland areas of Highland. It will give confidence to communities and developers in the future of settlements by determining where development should and should not take place. It will contribute towards sustainable development and tackling climate change.

## What prompted the Caithness and Sutherland Local Development Plan (e.g. legislative, regulatory or administrative provision)

As a legal requirement of the Planning etc (Scotland) Act 2006, the Highland Council is preparing a Caithness and Sutherland Local Development Plan as the new land use plan for development of a scale and nature that are of local significance. The plan will cover the period from 2016 to 2021 but with a vision and principles extending to 2035. It will replace the Sutherland Local Plan (2010) and the Caithness Local Plan (2002).

## Period covered by PPS

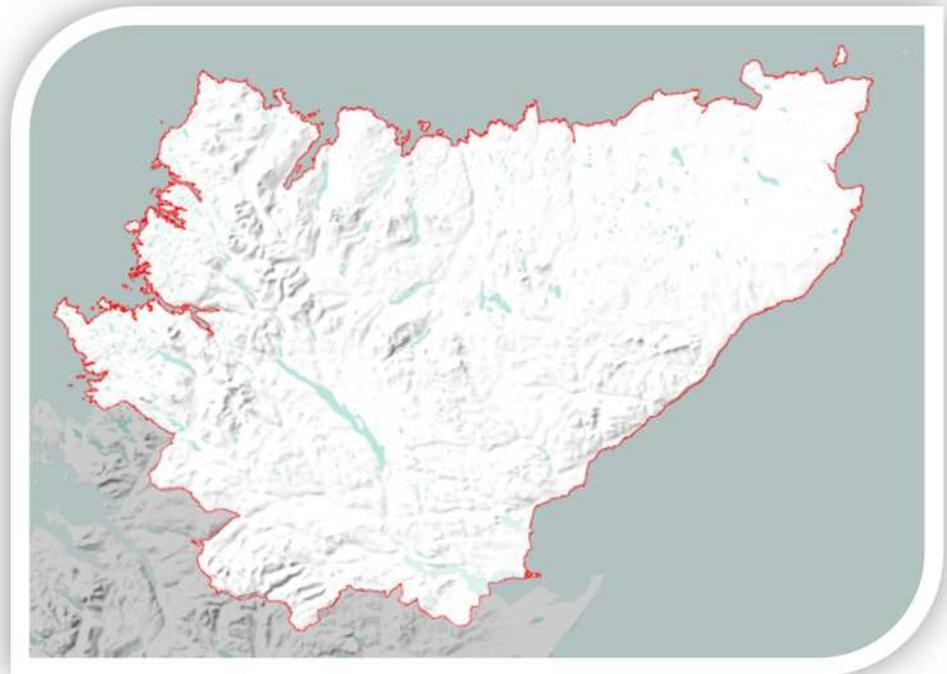

2016 - 2035

## Frequency of updates

Within a 5 year cycle

## Area covered by PPS

The Caithness and Sutherland Local Development Plan extends over an area of 812,997ha. See the map to the right.

## SEA activities to date

The table below summarises the SEA activities to date in relation to the Caithness and Sutherland Local Development Plan

SEA Action/Activity	When carried out
Screening to determine whether the PPS is likely to have significant environmental effects	N/A – The PPS falls under the scope of Section 5(3) of the Act and requires an SEA under the Environmental Assessment (Scotland) Act 2005. No Screening was undertaken and the plan moved straight to scoping
Scoping the consultation periods and the level of detail to be included in the Environmental Report	A Scoping Report was submitted in December 2012
Outline and objectives of the PPS	Outlined within the Scoping Report submitted in December 2012 (revised for Environmental Report Oct 2014)
Relationship with other PPS and environmental objectives	Outlined within the Scoping Report submitted in December 2012 (revised for Environmental Report Oct 2014)
Environmental baseline established	Outlined within the Scoping Report submitted in December 2012 (revised for Environmental Report Oct 2014)
Environmental problems identified	Outlined within the Scoping Report submitted in December 2012 (revised for Environmental Report Oct 2014)
Assessment of future of area without the PPS	Outlined within the Scoping Report submitted in December 2012 (revised for Environmental Report Oct 2014)
Alternatives considered	Alternatives considered within the Environmental Report Oct 2014
Environmental assessment methods established	Outlined within the Scoping Report submitted in December 2012 (revised for Environmental Report Oct 2014)
Selection of PPS alternatives to be included in the environmental assessment	Outlined within the Scoping Report submitted in December 2012 (revised for Environmental Report Oct 2014)
Identification of environmental problems that may persist after implementation and measures envisaged to prevent, reduce and offset any significant adverse effects	Outlined within the Scoping Report submitted in December 2012 (revised for Environmental Report Oct 2014)
Monitoring methods proposed	Alternatives considered within the Environmental Report Oct 2014
Consultation timescales <ul style="list-style-type: none"> <li>• Timescale for Consultation Authorities</li> <li>• Timescale for public consultation</li> </ul>	Outlined within the Scoping Report submitted in December 2012 (revised for Environmental Report Oct 2014)
Notification/publicity action	October 2014 – January 2015

### **Outline and objectives of the Caithness and Sutherland Local Development Plan**

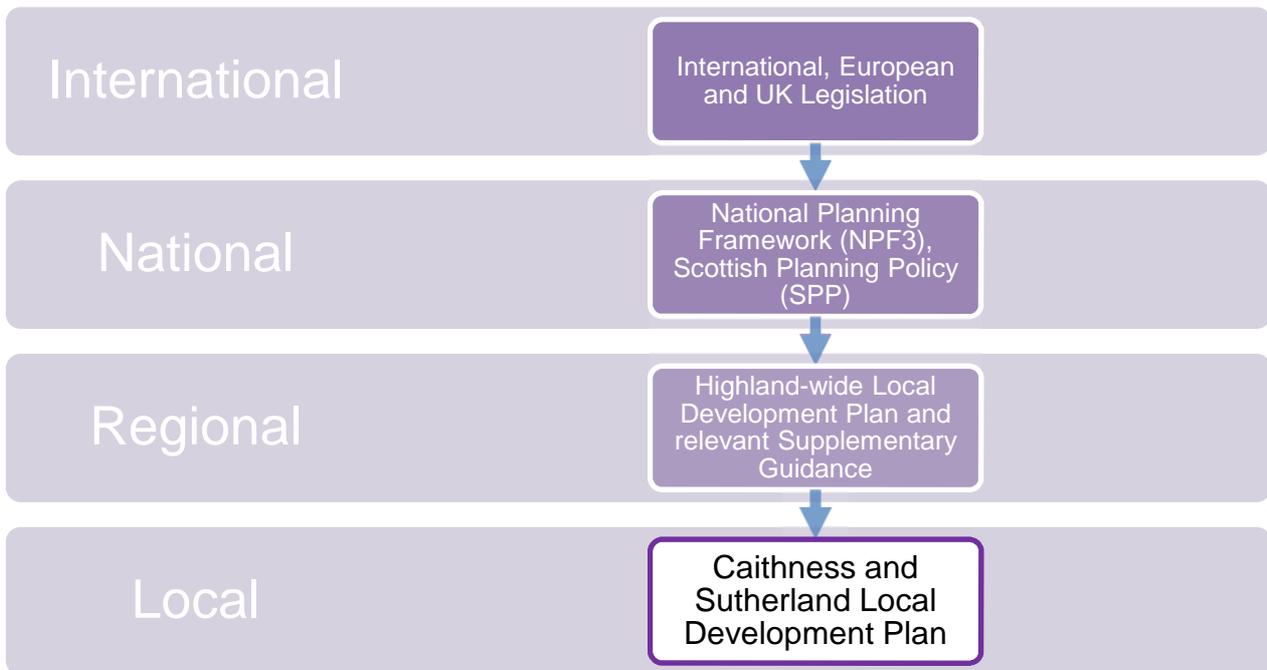

The Highland wide Local Development Plan (HwLDP) sets the strategic planning policy context for the Caithness and Sutherland Local Development Plan (CaSPlan). Based on the HwLDP strategy and the work which has occurred since its adoption CaSPlan sets a vision and spatial strategy for achieving the aims below:

- Establish a strong and diverse economy
- Create a network of successful, sustainable and socially inclusive communities
- Enhance transport, communication and utilities infrastructure
- Conserve the environment and promote the built and cultural heritage

The Caithness and Sutherland Local Development Plan will replace the elements of the Sutherland Local Plan (2010) and the Caithness Local Plan (2002) which have been continued in force by The Town and Country Planning (Continuation in force of Local Plans) (Highland) (Scotland) Order 2012. The provisions of the Highland-wide Local Development plan as they relate to land allocations will also be updated.

## Relationship with other PPS and environmental protection objectives

Schedule 3 of the Environmental Assessment (Scotland) Act 2005 requires that the Environmental Report includes an outline of the PPS relationships with other relevant PPS, and how environmental protection objectives have been taken into account in the PPS preparation. This section covers these issues and describes the policy context within which the PPS operates, and the constraints and targets that this context imposes on the PPS.

The key **environmental objectives** to be considered in the assessment and preparation of the CaS LDP, as identified in Appendix 2, include:

- **Biodiversity, flora and fauna:** Highland Council has a duty to further the conservation of biodiversity under the Nature Conservation (Scotland) Act 2004
- **Population and human health:** The Council must plan for changing demographics including forecasts of a declining and ageing population.
- **Climatic factors:** The Climate Change (Scotland) Act 2009 sets out a framework for the reduction of greenhouse gas emissions and a transition to a low carbon economy. The Act introduces a new duty to all public sector bodies to exercise their functions in a way that is best calculated to contribute towards GHG targets of 80% reduction by 2050 with an interim target of 42% by 2020.
- **Material assets:** Delivering sufficient numbers of houses together with sustainable waste management and appropriate infrastructure.
- **Water:** The Flood Risk Management (Scotland) Act provides a statutory framework for delivering a sustainable and risk-based approach to managing flooding. Highland Council has a responsibility under the Act to exercise its functions with a view to managing and reducing flood risk and promotion of sustainable flood risk management.
- **Soil:** Protecting and supporting the enhancement of carbon rich soils and good agricultural land such together with respecting designations such as North West Highland European Geopark.
- **Cultural heritage:** National and regional policy sets out the principles which must be followed in order to care for, protect and enhance our historic environment.

- **Landscape:** The landscape is a defining feature of the area and the Council has a duty to have regard to the desirability of conserving the natural heritage of Scotland under the Countryside (Scotland) Act 1967.

The relevant PPS and associated environmental objectives to be considered in the Environmental Report are shown below. PPS above the national level have typically not been outlined in detail primarily because the environmental protection framework provided by European legislation has been integrated into national and regional plans, policies and guidance.

Legislation, Plans, Programmes or Strategies	Summary of relevant Environmental Objectives to be reflected in CaSPlan
Biodiversity, Flora and Fauna	
<p>Ramsar Convention (Convention on Wetlands of International Importance especially as Waterfowl Habitat)</p> <p style="text-align: center;">↓</p> <p>EU Birds Directive &amp; EU Habitats Directive</p> <p style="text-align: center;">↓</p> <p>Habitat Regulations</p> <p>Moray Firth SAC Management Scheme, Revision 2 (2010)</p>	<p>The Habitats Regulations transpose the provisions of the EU Habitats and Birds Directives into Scottish Law and require that Local Development Plans are subject to HRA of their implications for Natura sites. Habitats Regulations also requires protection for European protected species.</p> <p>To establish and maintain a viable population of bottlenose dolphins, and to conserve the condition of subtidal sandbanks within the Firth.</p>
<p>Wildlife and Countryside Act 1981 (as amended)</p> <p>Nature Conservation (Scotland) Act 2004</p> <p>Wildlife and Natural Environment (Scotland) Act 2011</p> <p>Protection of Badgers Act 1992</p> <p>Convention on Biological Diversity</p> <p style="text-align: center;">↓</p> <p>UK Biodiversity Action Plan/ Scottish Biodiversity Strategy (Scotland's Biodiversity – It's In Your Hands)</p> <p style="text-align: center;">↓</p> <p>Highland Biodiversity Action Plan (2010-13)</p>	<p>CaSPlan will further conservation of biodiversity consistent with the proper exercise of its functions and protect and enhance precious natural features and wildlife.</p> <p>To prevent the release and spread of non-native animal and plant species into areas where they can cause damage to native species and habitats and to economic interests.</p> <p>CaSPlan will conserve species and habitats in Caithness and Sutherland that are considered vulnerable or threatened on a local or national basis. In turn the plan will contribute to the conservation of our global biodiversity; promote awareness of local natural resources; promote community engagement in, and ownership of, the practical conservation of natural resources; and promote the sustainable and wise use of resources.</p>
<p>North West Highland Geopark &amp; Flow Country</p> <p>Peatlands of Caithness and Sutherland Management Strategy 2005 – 2015</p> <p>Scotland's National Peatland Plan 2014</p>	<p>The North West Highland Geopark and the Flow Country (tentative World Heritage Site) are internationally important environments. These plans seek to protect and enhance the areas. CaSPlan will recognise the importance of these sites.</p>
<p>Scottish Planning Policy</p> <p style="text-align: center;">↓</p> <p>Highland wide LDP</p>	<p>CaSPlan will deliver green networks, consisting of green spaces and green corridors within and around settlements, linking out to the wider countryside.</p>

 Green Networks Supplementary Guidance Population & Human Health	
Land Reform (Scotland) Act 2003  Highland Council Core Paths Plan (2011)	Establishes the statutory rights of access to land and inland water for outdoor recreation. Prepared under the Act, the Core Paths Plan provides a system of path in Highland which, as a whole, gives the public reasonable access throughout the plan area. CaSPlan will recognise these issues through the Site Assessment process, and where necessary will highlight their importance within specific land allocations in the plan.
Let's Make Scotland More Active' (2003)  THC Local Transport Strategy  Active Travel Masterplans	The LTS guides policy and investment on transport within Highland in partnership with other agencies. The LTS acknowledges the Moray Firth has high volumes of traffic along with delays and congestion during commuter periods. This needs to be addressed to remove barriers to development. To promote active travel THC in partnership with The Highlands and Islands Strategic Transport Partnership (HITRANS), a series of Active travel audits and masterplans have been prepared which will inform the CaSPlan.
Soil	
Scottish Soil Framework (2009)	To promote the sustainable management and protection of soils consistent with the economic, social and environmental needs of Scotland, achieved through targeted activities including reducing soil erosion; greenhouse gas emissions from soil; and contamination. CaSPlan will recognise the important soils in the plan area including the important blanket bog in the Flow Country and other carbon rich soils, deep peat and priority peatland habitat,
Water	
EU Water Framework Directive  Water Environment and Water Services (Scotland) Act 2003 (WEWS) Act  Scotland River Basin Management Plan (2009)	To prevent deterioration in the status of the water environment, including rivers, lochs, estuaries, coastal waters and groundwaters and protect, enhance and restore all surface water bodies to 'good' status. CaSPlan will safeguard the water environment through the Site Assessment process, and where necessary by safeguarding specific water environments associated with land allocations.
EU Floods Directive  Flood Risk Management (Scotland) Act 2009	To reduce and manage the risks that floods pose to human health, the environment, cultural heritage and economic activity through improved assessment and the sustainable and coordinated management of flood risk.  The Act imposes a new duty on local authorities to exercise their flood risk related functions with a

	view to reducing overall flood risk and establishes the requirement to prepare plans to manage flood risk which will provide a framework for coordinating actions across catchments to deal with all forms of flooding and its impacts. CaSPlan will consider flood risk through the Site Assessment process, and where necessary by requiring Flood Risk Assessments on specific land allocations.
<p>EU Marine Strategy Framework Directive (MSFD)</p> <p style="text-align: center;">↓</p> <p>Marine (Scotland) Act 2010</p> <p style="text-align: center;">↓</p> <p>Pentland Firth and Orkney Waters Marine Spatial Plan</p>	Aims to achieve good environmental status of the EU's marine waters by 2020 and to protect the resource base upon which marine-related economic and social activities depend. The Marine (Scotland) Act transposes the Directive into Scots law and makes provision for a new statutory marine planning system to sustainably manage demands on the marine environment. CaSPlan's intertidal zone along the north coast is shared with the Pentland Firth and Orkney Waters Marine Spatial Plan, the plan will be cognisant of the Marine Spatial Plan.
<b>Air</b>	
<p>EU Air Quality Directive</p> <p style="text-align: center;">↓</p> <p>The Air Quality Strategy for England, Scotland, Wales and Northern Ireland (2007)</p>	Air quality targets have been set at the European and UK levels. The Air Quality Strategy for England, Scotland, Wales and Northern Ireland sets objectives for Particulate Matter (PM), oxides of nitrogen (NOx), sulphur dioxide (SO2) and ozone (O3) amongst others.
<b>Climatic Factors</b>	
<p>Climate Change (Scotland) Act 2009</p> <p style="text-align: center;">↓</p> <p>Land Use Strategy : Getting the best from our land</p> <p style="text-align: center;">↓</p> <p>Highland Climate Change Strategy</p>	<p>The Act introduces a new duty on the Council (and all public bodies) to exercise their functions in a way that is best calculated to contribute towards the greenhouse gas reduction targets of reducing emissions by at least 80 per cent by 2050.</p> <p>A national land-use strategy has been prepared under the Act. This identifies key principles for the sustainable use of land, including: encouraging land uses which deliver multiple benefits; land highly suitable for primary uses should be recognised in decision-making; and examining options for restoring derelict or vacant land should be a priority.</p> <p>The Council's own strategy sets out how it will mitigate against the causes of climate change and adapt to the likely impacts. CaSPlan will transpose these higher level legislation and strategies at the local level.</p>
<b>Material Assets</b>	
<p>Scottish Forestry Strategy (2006)</p> <p style="text-align: center;">↓</p> <p>Control of Woodland Removal Policy</p> <p style="text-align: center;">↓</p>	Environmental objectives include reducing the impact of climate change; making access to and enjoyment of woodlands easier for all to improve health; protect the environmental quality of our natural resources; and help to maintain, restore

Highland Forest and Woodland Strategy	and enhance Scotland's biodiversity. CaSPlan will safeguard assets, and promote access and environmental quality through the Site Assessment and allocation process.
Zero Waste Plan ↓ Highland Council & Moray Waste Strategy	To achieve a zero waste Scotland, where we make the most efficient use of resources by minimising Scotland's demand on primary resources, and maximising the reuse, recycling and recovery of resources instead of treating them as waste.
<b>Cultural Heritage</b>	
Scottish Historic Environment Policy (SHEP)	The three key outcomes presented in the Policy are that the historic environment is cared for, protected and enhanced for the benefit of our own and future generations; greater economic benefits from the historic environment; and that the people of Scotland and visitors to our country value, understand and enjoy the historic environment.
<b>Landscape</b>	
Countryside (Scotland) Act 1967 European Landscape Convention 2004 Scotland's Scenic Heritage (1978) Special Qualities Reports for National Scenic Areas (2010) Caithness and Sutherland Landscape Character Assessment (1998) Citations for the Special Landscape Areas	To promote the protection, management and planning of all landscapes, including natural, managed, urban and peri-urban areas, and special, everyday and also degraded landscape.
Wildness in Scotland's Countryside Policy Statement 02/03 ↓ Wildness Qualities Mapping Wild Land Areas (2014)	To protect the elemental qualities of some of Scotland's most remote mountain and coastal areas which many people derive psychological and spiritual benefits.
Scottish Planning Policy ↓ Highland Coastal Development Strategy	Sets a vision for the sustainable use and development of the coast of Highland. Areas of isolated coast identified in the coastal classification within the Strategy has statutory development plans protection under the HwLDP policy.
<b>Other Relevant PPS</b>	
EU Directive 2001/42/EC on the assessment of the effects of certain plans and programmes on the environment.	Public plans and programmes covered by this Directive are subject to an environmental assessment during their preparation and before their adoption. SEA will be carried out on every CaSPlan and an Environmental Report produced.
National Planning Framework 3 (2014)	The National Planning Framework 3 aims to guide Scotland's development to 2030 and sets out strategic development priorities to support the Government's goal of sustainable economic growth. The Framework will play a key role in co-

	ordinating policies with a spatial dimension and will help move Scotland towards a low carbon economy.
Scottish Planning Policy (SPP) (including Circulars and PANs)	SPP sets out the Scottish Government's planning policy on nationally important land-use planning matters. This places planning within the wider context of the Scottish Government's overarching aim to increase sustainable economic growth.
Single Outcome Agreement 3 (SOA3)	Single Outcome Agreement 3 delivers a partnership approach to tackling issues which affect Highland. As part of this there are a number of National and Local Outcomes which have fed into the preparation of the four outcomes which make up the vision of CaSPlan.
Highland-wide Local Development Plan (HwLDP) ↓ Supplementary Guidance	To continue to provide a strong platform for economic growth, together with adequate levels of housing and community facilities while also protecting and conserving the built and natural environment.
Programme for the Highland Council 2012 – 2017: Working Together for the Highlands	The Council sets out 128 bold and ambitious actions across seven main themes: the economy; children and young people; caring communities; better infrastructure; better housing; empowering communities; and strong and safe communities. Protecting and enhancing the environment, a more efficient transportation network and improving sustainability are important considerations.
National Renewables Infrastructure Plan (N-RIP) ↓ Pilot Pentland Firth and Orkney Waters Marine Spatial Plan	To support the development of a globally competitive offshore renewables industry. The Council is one of three key partners developing a pilot Marine Spatial Plan for the Pentland Firth and Orkney Waters (PFOW). A key element of the emerging marine spatial planning policy arena is the integration of marine and terrestrial planning. The jurisdictions between both of these planning areas overlap at Mean High Water Springs and Mean Low Water Springs respectively.

By carrying out this analysis and the more general site analysis as part of the plan making process it has facilitated the development of a Local Development Plan which gives due consideration of the necessary plans, policies and strategies which may affect and those which may be affected by the Caithness and Sutherland Local Development Plan.

## Relevant aspects of the current state of the environment

Schedule 3 of the Environmental Assessment (Scotland) Act 2005 requires that the Environmental Report includes a description of “the relevant aspects of the current state of the environment and the likely evolution thereof without implementation of the plan or programme”, and “the environmental characteristics of areas likely to be significantly affected”. This section aims to describe the environmental context within which the PPS operates and the constraints and targets that this context imposes on the PPS.

The purpose of this section is to provide enough environmental baseline data to:

- support the identification of environmental problems;

- support the process of assessing the environmental effects; and
- provide a baseline against which future monitoring data can be compared.

### General

The Caithness and Sutherland Local Development Plan covers an area of 7,876 sq km. This is 10% of Scotland.

This section of the Environmental Report is split by SEA Topic as defined by the Environmental Assessment (Scotland) Act 2005. A table and maps showing baseline data can be found in Appendix 2.

### Biodiversity, Flora and Fauna

Natural heritage designations cover a range of habitats in the CaSPlan area. In designated sites there are:

Designation	Number of Sites	Area covered (Hectares)	Percentage of CaSPlan area
Site of Special Scientific Interest	150	254,193	31.3%
Special Area of Conservation	29	354,973	43.6%
Special Protection Area	15	239,356	29.4%
National Nature Reserve	4	12,516	1.6%
Ramsar	3	152,819	18.8%

There are also a number of forestry designations across Caithness and Sutherland:

Designation	Number of Sites	Area covered (Hectares)	Percentage of CaSPlan area
Semi-natural woodland	1338	12,898.7	1.59%
Ancient and Long Established Woodland	1010	5,059.4	0.62%
Tree Preservation Orders	8	29.6	0.0036%

The following habitats occur in Highland (many of which in the area covered by the Caithness and Sutherland Local Development Plan) and are priority habitats in the UK Biodiversity Action Plan (UK):

- Ancient and/or species rich hedgerows
- Blanket bog
- Blue mussel beds
- Calaminarian grasslands
- Carbonate mounds
- Cereal field margins
- Coastal and floodplain grazing marsh
- Coastal saltmarsh
- Coastal sand dunes
- Coastal vegetated shingle
- Maerl beds
- Maritime cliffs and slopes
- Mestotrophic lakes
- Mountain heaths and willow scrub
- Mud habitats in deep water
- Mudflats
- Native pinewood
- Oligotrophic and dystrophic lochs
- Open mosaic habitats on previously developed land (brownfield sites)
- Ponds

- Deep sea sponge communities
- Estuarine rocky habitats
- Eutrophic standing waters
- Fens
- File shell beds
- Fragile sponge & anthozoan communities of subtidal rocky habitats
- Inland rock outcrops and scree habitats
- Intertidal boulder communities
- Limestone pavements
- Lowland calcareous grassland
- Lowland dry acid grassland
- Lowland heathland
- Lowland meadows
- Lowland wood pasture and parkland
- Machair
- Purple moor grass and rush pasture
- Reedbeds
- Rivers
- Saline lagoons
- Seagrass beds
- Seamount communities
- Sheltered muddy gravels
- Tidal rapids
- Traditional orchards
- Upland calcareous grassland
- Upland flushes, fens and swamps
- Upland hay meadows
- Upland heathland
- Upland mixed ashwoods
- Upland oakwood
- Wet woodland

The protected species known to be found in Highland are listed in Appendix 2 of the [Statutorily Protected Species Supplementary Guidance](#). Many sections of the coastline are important for breeding seabirds and much of the north and east coastline and the associated offshore environment is designated as Special Protection Area. Much of the north and west coast has been classified as isolated coast.

Wild Deer are an important element of Scotland's biodiversity and ecology, an economic asset and valued as an iconic species. They are present across Caithness and Sutherland.

Green networks help to create a sense of place by providing spaces to meet friends and neighbours, take part in sport, recreation and play while also making a significant contribution to the biodiversity of the area. Green networks should be a facilitating feature which enables the delivery of high quality development which integrates with green networks and aids the protection and enhancement of the network. Detailed mapping and priorities have not been identified in Caithness and Sutherland however the HwLDP identifies Wick to Thurso and Dornoch to Helmsdale as areas where Green Networks will be identified.

### **Population and Human Health**

The current population of the plan area is 37,020 but this is expected to decline to 35,556 by 2031. The current population density is 5.1 people per square km compared to the Highland population density of 8.7 people per square km and 67.4 for Scotland. Sutherland is the most sparsely populated area of Scotland with only 2.2 people per sq km.

The census is one of the most effective methods we have of gathering information on the health of our population. In Highland the percentage of those with a long term limiting illness is 18.6% which is below the 19.6% average in Scotland as a whole.

### **Soil**

Given the scale of the Plan area and the diversity of its landscapes and uses there are a wide range of soil types. Appendix 2 shows a map produced by Scotland's Soils showing the different types of soils in Scotland. It can be seen from this map that there a number of different types of peat based soils and large areas of peatland. This information is supplemented by Map 6 of the Land use Strategy for Scotland showing the depth of peat in Highland. The plan area includes the Flow Country which is the largest expanse of blanket bog in Europe and many parts of Sutherland have peaty soils. Peat is important in terms of its carbon storage properties and the habitats (many of

which are water dependant) which it provides. The removal and disturbance of peat can mean the stored carbon is released and may contribute to climate change. Scottish Natural Heritage’s Information note 318 provides a reproducible method for categorising the carbon richness of soil mapping units produced by the soil survey of Scotland. While this work has not been carried out, the carbon storage potential of soil is recognised.

The soil capability in the plan area varies considerably. While there is no class 1 prime agricultural land or Class 2, there are areas of Classes 3.1 and 3.2. The plan will take the approach to prime agricultural land as set out in Scottish Planning Policy as confirmed by the Highland-wide Local Development Plan.

**Water**

The quality of the water environment is generally very good in Caithness and Sutherland. The freshwater environment is recognised internationally for its importance as a spawning ground for wild salmon and its use in the whisky making process. The many lochs and rivers that characterise the local area are important for local economies and provide the scenic backdrop that encourages visitors to the area. The Dornoch Firth and wider Moray Firth areas are also internationally renowned with a number of the coastal areas protected by international legislation. The River Basin Management Plan (RBMP) Area Management Plans provide valuable baseline information on the quality of water in Highland. The plan area is covered by the [North Highland](#) RBMP Area Management Plans.

As part of this SEA we considered the merits of producing a Strategic Flood Risk Assessment for the area. Flood risk was considered during the site assessment work for this SEA and it was felt that the extra work required for a Strategic Flood Risk Assessment would not provide additional value to the SEA or the plan making process.

**Climate Change**

In Highland one of the main contributors to climate change is transportation due to the emissions of carbon dioxide. High levels of CO2 and other “greenhouse gases” in the atmosphere are thought to accelerate the Earth’s natural warming. Warming is predicted to have a variety of environmental consequences including increased frequency and severity of storm events, as well as rises in sea level, which may have an affect on the coastal communities throughout the plan area. Changes in rainfall patterns could lead to increased erosion and pollution associated with surface run-off.

**Material Assets**

For the purposes of this Environmental Report waste, access and transport are considered to be material assets. In terms of waste it is considered that the materials and management of waste as a result of development is a key consideration given the potential location and scale of development.

The Highland-wide Local Development Plan (under policy 70 – Waste Management Facilities) sets out our commitment to the Government’s Zero Waste Plan, Scottish SPP and the Council’s Municipal Waste Strategy. To meet the Zero Waste Plan targets additional operational waste Management Infrastructure Capacity required includes:

- 160,000 tonnes of total additional capacity is needed
- 80,000 tonnes of additional capacity is needed to manage source segregated recyclables
- 70,000 tonnes of additional capacity is needed to manage unsorted waste
- 2,000,000 tonnes required to meet the 10 year landfill capacity

In terms of access to the outdoors the Council’s Local Transport Strategy 2010/11 – 2013/14 provides the key information on this valuable material asset including the level of access infrastructure as set out in the table below:

Access Resource	Distance (km)	%
-----------------	---------------	---

Rights of Way	3,362	11.6
Promoted	3,959	13.6
Other Paths	8,331	28.7
Roads	13,401	46.1
Total	29,053	100

**Note:** This information is Highland-wide.

The Highland area has a diverse transportation network encompassing one of the longest road networks in Scotland. Generally the transport infrastructure across Highland comprises of:

- 6,730km/4,182 miles of locally adopted road;
- 1400 bridges (span greater than 3 metres) and 700 structural culverts (up to 3 metres);
- 951km of trunk road;
- 108 harbours, slipways and piers; and
- 2 airports

### Cultural Heritage

There are a number of cultural and built heritage features in the Plan area. These are set out in the table below:

Designation	Number of Sites	Area covered (Hectares)
Schedule Monuments	598	1,101
Listed Buildings	A – 66 B – 552 C - 349	N/A
Gardens & Designed Landscapes	7	5.8
Conservation Areas	4	60.6
Inventory of Historic Battlefields	1	-

The Highland Historic Environment Record includes 18,713 records of all known archaeological sites, historic buildings and historic landscapes that make up the archaeological and historical heritage of the Highland area.

### Landscape

This local development plan covers a large area and therefore it can be expected the landscape varies significantly across the area. The Caithness and Sutherland Landscape Character Assessment covers the plan area and describes the changes in landscape. The Munro's, Corbett's and other hills and mountains are key features in the landscape and attract visitors to the area year after year.

Wild land areas are key features of the landscape and this is recognised by its inclusion within Policy 57 of the Highland-wide Local Development Plan as a feature of Local Importance. The detailed mapping of Wild Land Areas has now been published and has been used as part of our site assessments. There are 10 Wild Land Areas within (or partly within) the CaSPlan area. Scottish Planning Policy (2014) has identified wild land areas as nationally important but it is not a statutory designation.

There are nationally important landscapes in the area and these are recognised by being designated as National Scenic Areas (NSAs). There are 4 NSAs within the plan boundary (Dornoch Firth, Kyle of Tongue, NW Sutherland and Assynt-Coigach).

There are 10 Special Landscape Areas within the plan, citations for these have been prepared and are available [online](#). Small amendments to the boundaries of these areas are up for consideration as part of the consultation on the Caithness and Sutherland Local Development Plan.

The key facts and the baseline information collated for this environmental report has helped us to identify some environmental problems in the Highland area. Environmental problems that affect the area are identified in Table 3. Some of the negative trends highlighted in this table are likely to continue if Caithness and Sutherland LDP is not brought forward.

Designation	Number of Sites	Area covered (Hectares)
Special Landscape Area	10	162,737
National Scenic Area	4	193,605
Wild Land Area	10	398,434

### Gaps/Unreliability of Baseline Data

Much data and information was available through the Consultation Authorities, the Scottish Government and there was a wealth of information on offer to the Highland Council to inform the baseline data for this Environmental Report. However, there are a number of factors which can limit the validity of this data:

- Some parts of the plan area have been studied more widely than others. Therefore, the quality and accuracy of information for some areas will be greater than for others;
- Collation of data has predominantly been gathered at a Highland wide basis, therefore it has proved difficult to disaggregate these to information that covers just the Caithness and Sutherland Local Development Plan area; and
- The data relevant to this Report is held in different forms. If information is held in databases and Geographic Information Systems it can be more easily queried than information which is only in the printed form in reports, books or even on websites.

## Environmental problems

Schedule 3 paragraph 4 of the Environmental Assessment (Scotland) Act 2005 requires that the Environmental Report includes a description of existing environmental problems, in particular those relating to any areas of particular environmental importance. The purpose of this section is to explain how existing environmental problems will affect or be affected by the Caithness and Sutherland Local Development Plan and whether the PPS is likely to aggravate, reduce or otherwise affect existing environmental problems.

Environmental problems that affect the Caithness and Sutherland Local Development Plan are similar to those which affect the Highlands as a whole. These environmental problems are identified in the table below. The environmental problems have been identified using the baseline data available in Appendix 2 and refined following consultation authorities responses at scoping stage.

The negative trends highlighted in this table are likely to continue if there are no planning policies to help guide development to appropriate locations subject to suitable planning conditions.

**Table 3: Environmental Problems Relevant to Caithness and Sutherland Local Development Plan**

SEA Issue	Potential Environmental Impact resulting from Caithness and Sutherland Local Development Plan	Implications for Caithness and Sutherland Local Development Plan
<b>Biodiversity, flora, fauna</b>	Stress on biodiversity and loss of habitat resulting from development. Conflicts between designated areas and economic development. Vulnerability of rare and endangered flora and fauna to changes in climate. Loss of native, ancient, long established and semi-natural woodland cover. Loss of habitats and roosts for protected species. Potential for cumulative impacts on protected species. Potential indirect effects on designated sites.	The local development plan needs to ensure a balance between the demand for development while protecting the quality and character of the environments. The local development plan will identify areas of native woodland and ensure that the impact on these areas is fully considered in development proposals.
<b>Population and human health</b>	Potential for development to put increased pressure on the natural environment in terms of water and waste water capacity, energy supply and transport links. Limited opportunity for active travel in more remote parts of Highland.	The local development plan will identify mitigation measures for each allocation and its alternative (where appropriate) to ensure key infrastructure provision as detailed does not impact on the natural environment to a negative extent.
	An ageing population is likely to result in housing needs of the population diversifying. It may also put different pressures on services in more rural areas.	The local development plan will look at accommodation where a higher level of assistance is sought to be located close to local services.
<b>Soil</b>	Erosion. Potential contamination from waste storage. Impact of loss of good quality soils (including those identified as prime agricultural and/or carbon rich) through development. Generation of waste soils.	The Local Development Plan will seek to deliver development in line with the policy approaches as set out in SPP and the Highland-wide Local Development Plan.
<b>Water</b>	Flooding, drainage and erosion resulting from infrastructure and changing climate. The need to sustain water supply and sewage treatment. Tidal, pluvial and fluvial flood risk to new and existing development. Reduced quality of watercourses and the coastal environment.	The local development plan will promote the development of sites which will lead to the sustainable use of use of resources, including water. It will seek not to allocate sites which substantial sections of the site are at a medium to high flood risk and where sites are allocated to put in place mitigation.
<b>Climatic factors</b>	Lack of sustainable design. Impact of sea level rising. Movement of species in the face of climate change.	The local development plan should seek to allocate sites which will aid the reduction in greenhouse gas emissions through development of mixed use sites, and better active travel connections, where appropriate, will be identified as a requirement of development on sites. Ensure allocations avoid sites at risk from sea level rising or which might prejudice coastline management measures to respond to sea level rising.
<b>Material assets</b>	Increase travel/energy needs. The challenge of managing access to the	The local development plan will allocate sites which link well with active travel

	natural environment.	opportunities. Ensure protection of paths and safeguarding of access rights. The local development plan will identify sites for the provision of waste management facilities within existing business and industrial areas. Land allocations will, where appropriate, contain requirements for the provision of recycling facilities.
<b>Cultural heritage</b>	Stress on the historical environment resulting from development.	The Local Development Plan will protect the historic environment through the application of the policy framework in the Highland wide Local Development Plan and avoid development which may have an adverse impact on historic environment features.
<b>Landscape</b>	Wind farm developments affecting scenery and wildlife/ impact on landscape character and cumulative impacts. Development of new housing and infrastructure. Poor siting and design eroding the quality of both townscapes and landscapes. Negative impact of development on traditional crofting settlement character. Loss of local landscape character. Attrition of wild land and wildness qualities. Impact of development on isolated coast.	The local development plan should encourage responsible development of all landscapes (as per the European Landscape Convention). Development should be sited and designed to fit with the landscape character, whilst local distinctiveness and identity are retained and/or enhanced as detailed within the relevant Landscape Character Assessment. In crofting areas, developments should respect the character of the crofting settlements, particularly with regard to siting, scale and design.

## Expected Environmental Implications without CaSPlan

It is considered that without CaSPlan there would be increasing adverse impacts on the Caithness and Sutherland environment from development. This is primarily because the existing planning policy does not provide sufficient guidance to direct development to the best locations. The Highland-wide Local Development Plan contains a number of general policies in relation to the strategic protection and safeguarding of the environment. However it relies upon up-to-date area specific development plans to provide a framework to support these policies in the local context. The Caithness Local Plan is now over a decade old and many of the proposals within it do not fit within the current context of the area. The Caithness Local Plan was also not subject to any kind of Strategic Environmental Assessment or Habitats Regulations Appraisal. Although the policies and site allocations within the Sutherland Plan were subject to SEA the plan was adopted in 2010 and it too is due to be renewed.

The CaSPlan will provide a planning framework which will guide decisions on where development should and should not go for the next 10 years. The Plan will promote development in the most appropriate locations with due consideration to current statutory obligations. Therefore there is potential for positive development and environmental improvements to be delivered from the preparation of a new local development plan.

## Assessment of Environmental Effects

The baseline information from the previous sections is applied to consider whether the Caithness and Sutherland Local Development Plan and its alternatives are likely to have significant environmental effects (positive and negative).

### Outline of reasons for selecting alternatives

As part of the production of a Local Development Plan, a Main Issues Report must be produced detailing the different areas which will be covered by the Local Development Plan and reasonable alternatives to this approach. This has been the main driver for selecting the reasonable alternatives.

For the purpose of the Strategic Environmental Assessment, the Council will not look at the alternative of not producing a Caithness and Sutherland Local Development Plan as this is not considered a reasonable alternative. However, this has already been covered to an extent in the previous section; 'Likely evolution of the environment without the Caithness and Sutherland Local Development Plan'.

The alternatives identified below have emerged from a variety of research and analysis. The preparation of the Monitoring Report helped to indicate the current state of the environment and highlighted the performance of the current planning policy framework including key issues contained in the Highland-wide Local Development Plan (2012), existing Local Plans (Sutherland (2010) and Caithness (2002)) and national policy/guidance.

### Vision and Spatial Strategy

The Vision and Spatial Strategy for the CaSPlan has been developed following discussions with a wide range of partners and we think it supports both the Council's Programme and the Single Outcome Agreement 3. A reasonable alternative of carrying forward the existing Highland-wide Local Development Plan Vision for the Caithness and Sutherland area has been identified however it is less up to date and has not been prepared in the context of the Single Outcome Agreement 3.

### Policy Approaches

While the majority of General Policies are contained within the Highland-wide Local Development Plan the following policy approaches have been deemed necessary within the Caithness and Sutherland Local Development Plan area. A preferred approach and reasonable alternatives have been suggested for the approaches:

#### Growing Settlements

This preferred policy approach would support the development of smaller settlements. Development proposals that are contained within, round off or consolidate the Growing Settlements will be assessed against the extent to which they:

- Take account of the issues and placemaking priorities and development factors;
- Are likely to help sustain facilities in that settlement;
- Are compatible in terms of use, spacing, character and density with development within that settlement;
- Can utilise spare, existing capacity in the infrastructure network (education, roads, other transport, water, sewerage etc.) within that settlements or new/improved infrastructure could be provided in a cost efficient manner;
- Avoid a net loss of amenity/recreational areas significant to the local community; and
- Would not result in an adverse impact on any other locally important heritage feature (which may include a war memorial, burial ground, important public viewpoint/vista or open space).

The alternative to this approach would be either more rigid i.e. all of the above criteria must be met or more flexible i.e. for development to be supported it only needs to meet some or certain criteria.

### Promoting and Protecting Town Centres

The preferred policy approach applies to Brora, Dornoch, Golspie, Thurso and Wick and the Council will not support any proposal for development that is likely to have an adverse effect on the vitality and viability of those settlement centres. The alternatives to this approach would be either a more flexible approach whereby we do not have a settlement centre policy and do not define settlement centres, instead relying on Highland-wide general policies, or a more rigid approach where we identify centre boundaries for all settlements.

### Special Landscape Areas

The policy framework for Special Landscape Areas (SLAs) is set out within the Highland-wide Local Development Plan. What is up for debate here is the boundaries of these Special Landscape Areas. The preferred approach is to retain most of the SLA boundaries as they are, whilst amending some of the boundaries to ensure that SLA boundaries fully enclose areas of similar landscape character and quality. An alternative option is to carry forward all the SLAs unchanged from the Highland wide Local Development Plan.

### **Alternative Sites**

Over 145 sites were submitted to us when a CaSPlan “Call for Sites” was carried out in 2013. In addition we have considered all:

- existing adopted local plan sites to determine whether they should be brought forward into the Caithness and Sutherland Local Development Plan
- locations identified for development as part of the Wick and Thurso charrettes
- relevant sites within the Scottish Vacant and Derelict Land Survey;
- sites submitted to the targeted call for sites as part of the North Highland Onshore Vision

This resulted in around 750 sites across the whole LDP area. The sites which are identified as preferred, non-preferred or alternative in the Main Issues Report have been assessed as part of the SEA process. We have had wide ranging and early input to these assessments from a variety of sources such as Access Officers, Contaminated Land Unit, Flood Team and from the Consultation Authorities.

### **Analysis of Preferred Sites**

The table below shows a break down of the number and total areas of the preferred sites within the MIR.

Preferred site use	Number of sites	Across this number of settlements	Preferred sites total area by use (ha)
Housing	31	13	106
Business	12	7	228
Industry	13	8	100
Community	6	4	13
Mixed Use	43	12	280

In most cases the sites identified in the MIR as preferred sites are wholly or mainly unbuilt. There are some sites which already have planning permission on part or all of the site and in some cases some development has occurred. An example would be the Mountpleasant housing site at Thurso. It should be noted in particular that amongst the sites for which the preferred use is business or industrial, there are some sites which are already well-established business parks or industrial estates; the hectareage indicated in the table above is for the entire site as identified in the MIR and

therefore includes existing business and industrial activities. An example would be Wick Business Park. In such cases clearly the potential for new business and industrial development is through taking up vacant plots, intensification of use or redevelopment and hence would be of significantly lower hectareage than the total area of the MIR preferred site. The table below shows the total occurrence of component land uses within the preferred Mixed Use allocations. The component use 'Other' includes retail, tourism and openspace land uses.

Preferred Mixed Use sites component uses	Number of preferred Mixed Use sites
Housing	32
Business	34
Industry	6
Community	23
Other	15

### Assessment methodology

The reasonable alternatives described above have been assessed against the range of environmental issues set out in Schedule 3 of the Environmental Assessment (Scotland) Act 2005. Comments from the Consultation Authorities (SNH, SEPA and The Scottish Ministers (Historic Scotland) have been taken into account regarding the methods, scope and level of detail in this Environmental Report.

As described in the Scoping Report for the Caithness and Sutherland LDP we are using an assessment matrix for the assessment of the preferred options and alternatives for the strategy and vision and policy approaches. To assess the sites we used a specific detailed Site Assessment Matrix. The matrices also identify appropriate mitigation measures for each of the sites. Following the publication of the Scoping Report we were asked to trial a pilot site assessment matrix developed by the Consultation Authorities. Following discussions with the Consultation Authorities, some amendments were made to the pilot matrix and we agreed on an adapted matrix that would be used.

Detailed matrices can be found in Appendix 4 (Vision and Spatial Strategy and general policies) and Appendix 6 (Site Assessments). The site assessment matrix and checklist is shown in Appendix 7. Each site assessment contains a map showing the location of the site which has been assessed. In some instances the extent of land assessed is greater than the land shown on the map. This may be due for example to mitigation which removes some land from the site in order to minimise negative effects.

### SEA Objectives

A number of objectives were identified at scoping stage and have been refined following comment from the consultation authorities.

As air quality within Caithness and Sutherland is very good it has been scoped out following responses from the Consultations Authorities to the Scoping Report. There are no Air Quality Management Areas within or near the Plan area and no known candidate sites.

SEA Topic	SEA Objectives
Biodiversity, Flora and Fauna	To conserve and where possible enhance biodiversity and accord to the protection of valued nature conservation habitats and species
Population and Human Health	To improve the living environment for all communities and promote improved health of the human population

Soil	Safeguard the soil quality, geodiversity and improve contaminated land
Water	Manage and reduce flood risk and protect the water environment
Climatic Factors	Reduce greenhouse gases and contribute to the adaptation of the area to climate change
Material Assets	Manage, maintain and promote sustainable use of material assets
Cultural Heritage	Protect and enhance, where appropriate, the area's rich historic environment
Landscape	Protect and enhance the character, diversity and unique qualities of the landscape

The Vision and Spatial Strategy and policy approaches have been considered against a range of key considerations which are set out in Appendix 4.

In the site assessments (Appendix 6) a series of questions were answered. For clarity the table below sets out which question relates to which SEA objective:

SEA Objective	Site Assessment Consideration Question
1	3a, 3b, 3c, 3d, 3e, 3g
2	6a, 6b, 6c, 6d
3	3f, 7a, 7b, 7c, 7e, 7f
4	1a, 1b, 1c, 2b, 4g
5	2a, 2c, 4a, 4b, 4c, 4d, 4e, 4f
6	7d, 7g, 7h, 7i, 7j
7	9a, 9b, 9c, 9d, 9e, 9f, 9g
8	8a, 8b, 8c, 8d

### Strategic Environmental Assessment and Habitats Regulations Appraisal

When undertaking this Strategic Environmental Assessment, The Council has been conscious of the overlap in work between the Strategic Environmental Assessment and the Habitats Regulations Appraisal work which is required to be undertaken. With this in mind SEA objective 1 and the site assessment work will be used to inform an initial screening to help identify which elements of the plan may have an effect on a European designated site either alone or in-combination.

A Habitats Regulations Appraisal Record will be produced through partnership working with Scottish Natural Heritage and other relevant agencies, and published with the Caithness and Sutherland Proposed Local Development Plan.

### Assessment of the Caithness and Sutherland Local Development Plan

The approaches and alternatives contained within the Caithness and Sutherland Local Development Plan have been assessed using the framework and methodology described earlier in this Environmental Report. A summary of the assessment findings are shown below, the full findings are shown in Appendix 4 for the Vision/Spatial Strategy and Policy Approaches and Appendix 6 for the individual sites. During the drafting of the vision and policy approach options, assessments were carried out against the SEA Objectives, to show where potential improvements could be made to the preferred approaches.

## Caithness and Sutherland Vision and Spatial Strategy – Option 1 – The Preferred Vision

SEA Objective	Timescale			Magnitude	
	Short Term	Medium Term	Long Term	Local	Regional
1	+	+	+	+	+
2	=	+	+	+	+
3	+/-	+/-	+/-	=	=
4	+/-	+/-	+/-	+/-	+/-
5	+	+	++	+	+
6	+/-	+/-	+/-	=	=
7	+/-	+/-	+/-	+/-	+/-
8	+	+	+	+	+

The vision is based on four outcomes linked to the Single Outcome Agreement 3. Economic development is a key element of the vision and whilst this is not a consideration of SEA, the vision sets out how economic growth in the area can be achieved with little impact on the environment. It is anticipated that the vision will have no/little negative impact on the environment but have significantly positive effects in terms of SEA Objective 5.

## Caithness and Sutherland Vision and Spatial Strategy – Option 2 – carry forward the existing HwLDP Vision for the Caithness and Sutherland area

SEA Objective	Timescale			Magnitude	
	Short Term	Medium Term	Long Term	Local	Regional
1	+	+	+	+	+
2	+/-	+	+	+	=
3	+/-	+/-	+/-	=	=
4	+/-	+/-	+/-	=	=
5	+	+	++	++	++
6	+/-	+/-	+/-	=	=
7	+/-	+/-	+/-	+/-	+/-
8	+	+	+	+	+

The vision sets out a comprehensive approach to ensuring the heritage of the area is safeguarded and, while not a consideration of SEA, demonstrates how economic growth of the area can be brought forward ensuring limited impact on the environment. It is anticipated that this vision would have little/no negative impacts on the environment but have significant positive effects in relation to SEA Objective 5.

## Growing Settlements Policy - Option 1 – The Preferred Growing Settlements Policy

SEA Objective	Timescale	Magnitude
---------------	-----------	-----------

	Short Term	Medium Term	Long Term	Local	Regional
1	+/-	+/-	+/-	+/-	+/-
2	+	++	++	++	=
3	=	=	=	=	=
4	+	+	+	+	+
5	+	++	++	++	+
6	=	=	=	=	=
7	+/-	+/-	+/-	+/-	+/-
8	+	+	+	+	+

This policy approach is likely to have significant positive environmental effects on SEA Objectives 2 and 5. It is not anticipated that there will be any negative environmental effects from this policy approach.

**Growing Settlements Policy – Option 2 - An Alternative approach – More rigid approach**

SEA Objective	Timescale			Magnitude	
	Short Term	Medium Term	Long Term	Local	Regional
1	+/-	+/-	+/-	+/-	+/-
2	+	++	++	++	=
3	=	=	=	=	=
4	+	+	+	+	+
5	+	++	++	++	+
6	=	=	=	=	=
7	+/-	+/-	+/-	+/-	+/-
8	+	+	+	+	+

This approach is not dissimilar to the preferred approach therefore the assessment results are the same. The exception is that because all criteria must be met then the likelihood of negative impacts is lessened. This policy approach is likely to have significant positive environmental effects on SEA Objectives 2 and 5. It is not anticipated that there will be any negative environmental effects from this policy approach.

**Growing Settlements Policy – Option 3 - An Alternative approach – More flexible approach**

SEA Objective	Timescale			Magnitude	
	Short Term	Medium Term	Long Term	Local	Regional
1	+/-	+/-	+/-	+/-	+/-
2	+/-	+/-	+/-	+/-	+/-
3	=	=	=	=	=

4	+/-	+/-	+/-	+/-	+/-
5	+/-	+/-	+/-	+/-	+/-
6	=	=	=	=	=
7	+/-	+/-	+/-	+/-	+/-
8	+/-	+/-	+/-	+/-	+/-

It is not anticipated there will be any negative or significantly negative effects arising from this policy approach. However given that this alternative approach means only some of the criteria need to be met then it is not possible to determine whether there would be positive or negative effects from the policy.

### Promoting and Protecting Settlement Centres Policy - Option 1 - Preferred Policy Approach

SEA Objective	Timescale			Magnitude	
	Short Term	Medium Term	Long Term	Local	Regional
1	=	=	=	=	=
2	+	+	+	+	=
3	+	+	+	+	+
4	=	=	=	=	=
5	+	+	+	+	=
6	+	+	+	++	+
7	+/-	+/-	+/-	+/-	+/-
8	=	=	=	=	=

This policy is likely to have some positive environmental effects but have significant positive effects in relation to SEA Objective 6. Due to the nature of the policy there are many SEA Objectives where there will be little or no impacts. However the application of this policy in combination with the general policies of the Highland wide Local Development Plan, it is likely that the overall effect would be positive.

### Promoting and Protecting Settlement Centres Policy – Option 2 – More Flexible Approach

SEA Objective	Timescale			Magnitude	
	Short Term	Medium Term	Long Term	Local	Regional
1	=	=	=	=	=
2	+	+	+	+	=
3	+	+	+	+	+
4	=	=	=	=	=
5	+	+	+	+	=
6	+/-	+/-	+/-	+/-	+/-
7	+/-	+/-	+/-	+/-	+/-
8	=	=	=	=	=

This approach means there is no additional policy in CaSPlan, with a continuing reliance on using the general policies of the HwLDP, particularly Policy 40. It is anticipated that the approach will have a positive effect on SEA Objectives 2, 3 and 5. This is mainly due to the approach directing new retail development towards town/village centres.

### Promoting and Protecting Settlement Centres Policy – Option 3 More Rigid Approach

SEA Objective	Timescale			Magnitude	
	Short Term	Medium Term	Long Term	Local	Regional
1	=	=	=	=	=
2	+	+	+	+	-
3	+	+	+	+	+
4	=	=	=	=	=
5	+	+	+	+	=
6	+	+	+	++	+
7	+/-	+/-	+/-	+/-	+/-
8	=	=	=	=	=

This approach is similar to the preferred approach except that it would apply to all settlements in the plan area and not just the ones listed in the preferred approach. Therefore the assessment results are the same. This policy is likely to have some positive environmental effects but have significant positive effects in relation to SEA Objective 6. Due to the nature of the policy there are many SEA Objectives where there will be little or no impacts. However the application of this policy in combination with the general policies of the Highland wide Local Development Plan, it is likely that the overall effect would be positive.

### Special Landscape Areas - Option 1 – The Preferred approach – Examine all SLA boundaries and make amendments as appropriate

SEA Objective	Timescale			Magnitude	
	Short Term	Medium Term	Long Term	Local	Regional
1	=	=	=	=	=
2	=	=	=	=	=
3	=	=	=	=	=
4	=	=	=	=	=
5	=	=	=	=	=
6	=	=	=	=	=
7	=	=	=	=	=
8	+	+	+	+	+

It is unlikely that this approach will have an effect on any of the SEA Objectives other than the one related to landscape character and qualities where there may be a minimal positive effect at a local and regional scale as the protective policy approach from the Highland wide Local Development Plan will be applied to a wider area.

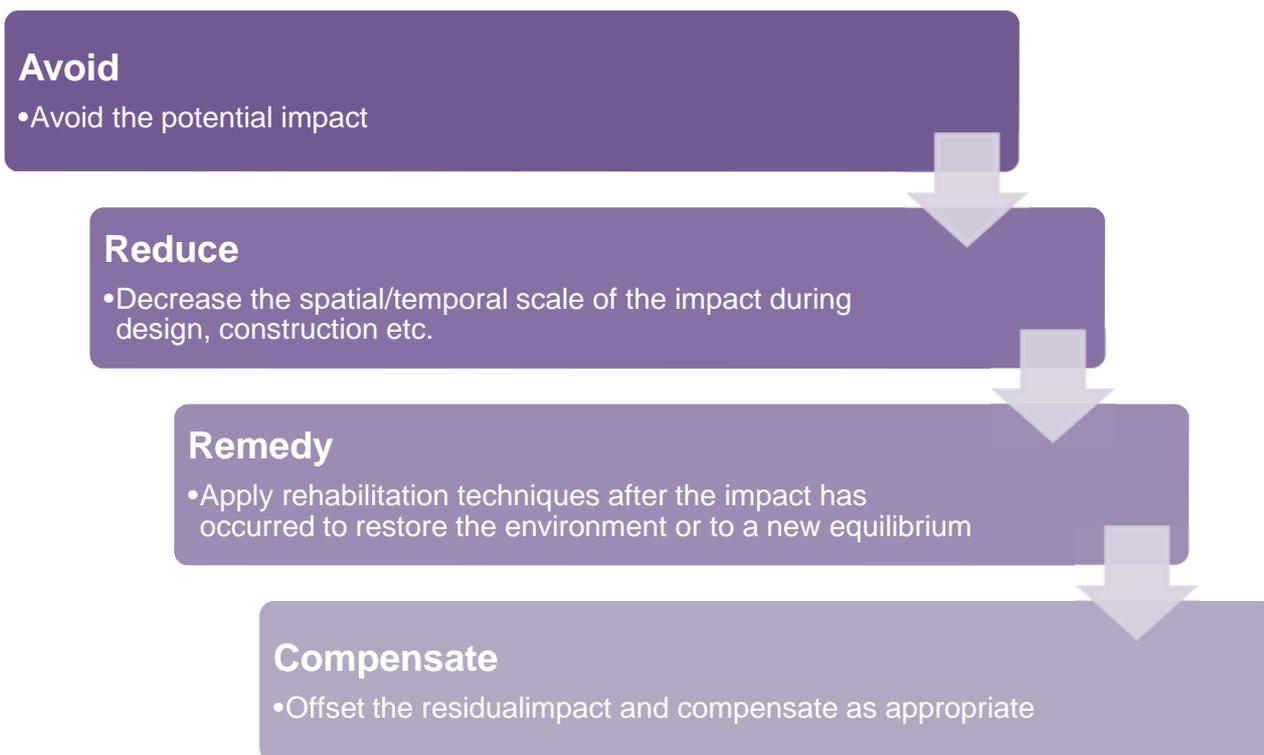

**Special Landscape Areas – Option 2 - An alternative - Carry forward all the SLAs unchanged from the HwLDP**

SEA Objective	Timescale			Magnitude	
	Short Term	Medium Term	Long Term	Local	Regional
1	=	=	=	=	=
2	=	=	=	=	=
3	=	=	=	=	=
4	=	=	=	=	=
5	=	=	=	=	=
6	=	=	=	=	=
7	=	=	=	=	=
8	=	=	=	=	=

It is unlikely that this approach will have an effect on any of the SEA Objectives as there will be no changes to any of the boundaries. The protective policy approach from the Highland wide Local Development Plan will be applied to the same area as present.

**Mitigation Measures**

An important feature of the Strategic Environmental Assessment is to assess any environmental impacts from development and identify relevant mitigation. Schedule 3 paragraph 7 of the Environmental Assessment (Scotland) Act 2005 requires an explanation of “the measures envisaged to prevent, reduce and as fully as possible offset any significant adverse effects on the environment of implementing the plan or programme.” Our approach to mitigation is based on the following recognised hierarchy:

In the first instance the Plan seeks to **avoid** significant adverse effects on the environment. This represents the cheapest and most effective form of impact mitigation. It has mainly been achieved through either not preferring particular uses on a site or not preferring the site as a development opportunity. Where this is has not been achieved, the provision of the Plan seeks to **reduce** the severity of impact, identify ways to **remedy** or restore the environment, as the last resort, **compensate** for the adverse effect so there is no net loss. An additional approach has been to identify potential mitigation which will **enhance** the environment and achieve a net positive gain. By undertaking a detailed site assessment for each of the site options outlined in the Plan, we have been able to identify mitigation measures required for each specific site.

Some of the most common mitigation measures identified through this SEA are highlighted below. The Site Assessments have been beneficial in highlighting mitigation measures such as:

- Undertaking flood risk assessments and avoiding areas at risk of flooding
- Undertaking of protected species surveys for sites where protected species are known to be present
- Undertaking of archaeological survey work where sites are known to have archaeological interest
- Compensatory planting where a site involves loss of trees
- Maximising of active travel links to reduce reliance on car use
- Minimising waste, both during construction and operational phases
- Sensitive design and layout to avoid negative impact on the settings of Listed Buildings
- Appropriate buffers/setbacks to maintain the integrity of natural heritage designations
- Design to take advantage of passive solar gain
- Setting requirements for development setbacks from particular features or constraints.

The mitigation measures identified will be continued through the Plan process and within the Proposed Plan it is expected they will help to identify relevant developer requirements. In all cases standard mitigation which is set out in general policies of either the Caithness and Sutherland Local Development Plan or the Highland-wide Local Development Plan will be secured to ensure that the negative environmental effects can be minimised and the positive environmental effects can be maximised.

The overall Plan impact, mitigation measures and how the mitigation will be actioned may be subject to change and could be further updated in the revised environmental report which will accompany the proposed plan.

## **Assessment of cumulative and synergistic effects**

In this section the Council have sought to assess the cumulative effect of the plan as a whole. This would take into consideration the realisation of the vision and spatial strategy in combination with a level of development commensurate with the preferred sites contained within the Main Issues Report.

Cumulative impacts may be seen where all or some of the local development plan sites are brought forward therefore we have carried out three cumulative assessments which consider different level of development being brought forward. These assessments will be undertaken using the same methodology as used for the assessment of the vision/spatial strategy and policy approaches.

The cumulative assessments will consider the vision/spatial strategy in combination with the application of the policies and policy approaches of the plan and a high (100% of all preferred development sites), medium (60% of all preferred development sites) and low (30% of all preferred development sites) level of development which may be brought forward.

The results of these assessments can be found in Appendix 5 – Cumulative Assessments and are summarised below:

**Cumulative Assessment 1 – 100% of all preferred development sites built out**

SEA Objective	Timescale			Magnitude	
	Short Term	Medium Term	Long Term	Local	Regional
1	+/-	+/-	+/-	+/-	+/-
2	+/-	+	+	+	+
3	+/-	+/-	+/-	+/-	+/-
4	+/-	+/-	+/-	+/-	+/-
5	+	+	+	+	+
6	+/-	+/-	+/-	+/-	+/-
7	+/-	+/-	+/-	+/-	+/-
8	+/-	+/-	+/-	+/-	+/-

It is anticipated that by considering the vision/spatial strategy along side the general policy approach and all of the preferred sites being built out, there will be some positive effects on the environment in terms of delivery of green infrastructure and reducing the need to travel. However there may also be negative effects in relation to landscape impact but this could be mitigated on a site by site basis.

**Cumulative Assessment 2 – 60% of all preferred development sites built out**

SEA Objective	Timescale			Magnitude	
	Short Term	Medium Term	Long Term	Local	Regional
1	+/-	+/-	+/-	+/-	+/-
2	+/-	+	+	+	+
3	+/-	+/-	+/-	+/-	+/-
4	+/-	+/-	+/-	+/-	+/-
5	+	+	+	+	+
6	+/-	+/-	+/-	+/-	+/-
7	+/-	+/-	+/-	+/-	+/-
8	+/-	+/-	+/-	+/-	+/-

It is anticipated that by considering the vision/spatial strategy along side the general policy approach and a medium level of development of the preferred sites, there will be some positive effects on the environment in terms of delivery of green infrastructure and reducing the need to travel. However there may also be negative effects in relation to landscape impact but this could be mitigated on a site by site basis. These positive and negative effects may not be as significant given the lower level of development which may come forward.

**Cumulative Assessment 3 – 30% of all preferred development sites built out**

SEA Objective	Timescale			Magnitude	
	Short Term	Medium Term	Long Term	Local	Regional

	Short Term	Medium Term	Long Term	Local	Regional
<b>1</b>	+/-	+/-	+/-	+/-	+/-
<b>2</b>	+/-	+/-	+	+	+/-
<b>3</b>	+/-	+/-	+/-	+/-	+/-
<b>4</b>	+/-	+/-	+/-	+/-	+/-
<b>5</b>	+	+	+	+	+
<b>6</b>	+/-	+/-	+/-	+/-	+/-
<b>7</b>	+/-	+/-	+/-	+/-	+/-
<b>8</b>	+/-	+/-	+/-	+/-	+/-

It is anticipated that by considering the vision/spatial strategy along side the general policy approach and a low level of development of the preferred sites, there will be some positive effects on the environment in terms of delivery of green infrastructure and reducing the need to travel. However there may also be negative effects in relation to landscape impact but this could be mitigated on a site by site basis. These positive and negative effects may not be as significant given the lower level of development which may come forward.

## Summary of Site Assessment Findings

This section summarises the key findings from the assessment of site options in the Main Issues Report. The full assessments can be found in Appendix 6.

### Sites with Significant Effects

The table below sets out the sites which have been identified as having a significant effect (either positive or negative) on the environment. Also included is the relevant SEA question(s) which is significantly effected:

Settlement	MIR Site Reference	SEA Question(s)	Significant Positive Effect Pre-mitigation	Significant Negative Effect Pre-mitigation	Significant Positive Effect Post-mitigation	Significant Negative Effect Post-mitigation
Bonar Bridge	BB02	2b		X

### Minimising and/or Maximising the Significant Effects

We have been able to minimise and/or maximise significant effects by, where possible, identifying additional mitigation measures and through our site preference approach. Significantly negative impacts may result in listing mitigation measures which will avoid, reduce, remedy or compensate or if these cannot be secured then our non-preference for the site. Significantly positive effects may be maximised through additional enhancement mitigation such as siting and design requirements and identifying environmental features which can be made into positive features within the development.

### Influence of SEA on Each Settlement

The SEA process has played a central role in informing the site preferences and overall strategy for each settlement within the Main Issues Report. Below is a summary of the findings and how these have influenced the overall proposals for each main settlement.

#### Ardgay

The sites in Ardgay are existing local plan allocations which have previously been through SEA assessment. No other sites were suggested in the Call for Sites exercise. The sensitivity of the landscape in Ardgay was a key factor identified by SEA in considering sites. The settlement is located within the Dornoch Firth NSA so mitigation requirements that deal directly with landscape issues are necessary and the SEA helped identify these. AG02 and AG03 were both identified in the SEA as being at risk from flooding. SEA has however helped identify appropriate mitigation to ensure that the flood risk is taken into account in any proposed developments.

## **Bonar Bridge**

The sites in Bonar Bridge are existing local plan allocations which have previously been through SEA assessment. No other sites were suggested in the Call for Sites exercise. BB01 Cherry Grove has been partially developed since the existing local plan was adopted however the remainder of the site is available for development. The sensitivity of the landscape in Bonar Bridge was a key factor identified by SEA in considering sites. The settlement is located within the Dornoch Firth NSA so mitigation requirements that deal directly with landscape issues are necessary and the SEA helped identify these. BB02 South Bonar Industrial Estate was identified through the SEA process as being at risk of flooding however as it was already an established industrial estate it was decided that there was merit in taking it forward as a preferred site. SEA has however helped identify appropriate mitigation to ensure that the flood risk is taken into account in any proposed developments.

## **Brora**

All of the sites considered for Brora, except for BR11 Former River Fascally Recreation Area, are existing sites in the Sutherland Local Plan and have already been through SEA assessment. The potential impact on the landscape setting of Brora was identified by the SEA for most sites in Brora and SEA has identified appropriate mitigation. SEA identified a range of mitigation required for various sites in Brora such as: providing landscaping and planting on the boundary adjacent to existing housing at BR07 Adjoining Industrial Estate; potential need for a bat survey to be carried out and for development to connect to the public sewer to ensure no adverse impact on the Moray Firth SAC at BR04 Former Radio Station; and a likely requirement for a contamination study at BR05 Scotia House. BR04 Former Radio Station and BR05 Scotia House are at risk of flooding and SEA has identified mitigation of requiring a flood risk assessment and not allowing development in areas shown to be at risk of flooding in a flood risk assessment. BR02 Rosslyn Street and BR06 Former Mackay's Garage are adjacent to the River Brora (and Inverbrora SSSI) and SEA identified mitigation of keeping development back from the river edge to minimise any potential impact on the water environment and any intrusion on the SSSI. It also identified flood risk and mitigation of requiring no development on areas shown to be at risk from flooding. BR11 Former River Fascally Recreation Area is non-preferred on the basis of the SEA identifying majority of site at risk of flooding.

## **Castletown**

The sites originate from a variety of sources including existing local plan allocations, the Prince's Trust for the Built Environment Masterplan, North Highland Onshore Vision, survey work and CaSPlan Call for Sites. As none of these have been subject to SEA previously SEA the process has significantly helped shape the site preferences for Castletown. The woodland at Castlehill and Stangergill are important to the landscape setting of the village and has been protected from development. The surrounding farmland is also identified as being important to the setting of the village and the ability for piecemeal development has been avoided through keeping the SDA tight around existing or planned development. CT10 is also acknowledged as being relatively high quality agricultural land and is located on the edge of the village. It may therefore have more of a landscape and visual impact than other sites. Land around Stangergill Burn has been identified as being at risk of flooding which has resulted in CT12 being non-preferred and the requirement of a FRA for CT05. Several brownfield and historic sites were assessed and the most suitable ones were preferred. The former quarry site at Dunnet Beach (CT11) has been non-preferred as it raised a number of ecological and landscape issues, including being wholly within the Dunnet Links SSSI.

## **Dornoch**

The sites assessed for Dornoch were a mixture of existing allocations in the Sutherland Local Plan, which have already been subject to SEA and sites put forward through the Call for Sites exercise. SEA has identified a range of mitigation factors such as: providing a buffer to a watercourse at DN02 Dornoch South Abattoir; need for a drainage impact assessment at DN07 Meadows Park; and ensuring pedestrian links are created between DN04 Bishopsfield and the centre of Dornoch. DN02 Dornoch South Abattoir site is identified as a preferred site for mixed use development. The SEA site assessment flags constraints for the site such as high flood risk at the southern end of the

site. However the SEA assessment has influenced the mitigation in that any development on the site will be subject to a Flood Risk Assessment, with any areas shown to be at risk from flooding, unlikely to be suitable for built development.

SEA has identified a number of mitigations provisions required for DN01 Dornoch North: retaining and integrating the watercourse as a natural feature within the development; widening of Embo Road and footpath created; ensure footpath links to town centre; and sensitive layout and design to take consideration of esker landform and adjacent conservation area.

The SEA site assessments have also influenced the decision to have DN09 West of Meadow's Park Road and DN10 West of Sutherland Road, as non-preferred sites due to the potential impact on landscape. Mitigation, where appropriate, is identified, however it is considered that there is sufficient capacity for housing on other sites in the settlement without requiring either of sites at present.

### **Edderton**

Edderton has a number of natural, built and cultural heritage features in and around it. The SEA has helped identify what these sensitivities are and where possible has identified mitigation to lessen any potential impact. Sites for Edderton were a mix of allocations from the adopted local plan and sites suggested through the Call for Sites exercise. ET04 Edderton Glebe was suggested through the Call for Sites exercise and it is a non-preferred site. This was greatly influenced by the SEA which identified it as being at risk of flooding, adjacent to the SAC, SPA and Ramsar site, partly within the Dornoch Firth NSA and a large greenfield site. Even with mitigation provided through the SEA, the impacts of developing this site were too great. ET03 West of Station Road and Balleigh Road and ET01 Land to the North East of Haven are influenced by SEA by providing mitigation to lessen the potential impact on adjacent scheduled monuments.

### **Golspie**

The majority of preferred sites in Golspie are existing allocations in the Sutherland Local Plan and have already been through SEA assessment. SEA identified a range of mitigation requirements at preferred sites such as: drainage impact assessment and providing a link to adjacent open space at GP04 Mackay House Hostel Site; a buffer between any development and adjacent watercourse at GP03 West of Existing Business Park; investigating the potential to retain some existing trees on site or providing replacement planting at GP06 Sibell Road; and ensuring design of site has no impact on the setting of a chambered cairn and listed building at GP07 Rhives. GP09 Ferry Road site is non-preferred due to the impact of any development on the landscape and surrounding area, which was identified through the SEA. GP10 South Argo Terrace is currently open space in the Sutherland Local Plan and it was suggested as a site for housing in the Call for Sites exercise. It is shown as non-preferred and the SEA influenced this by identifying that it would lead to a disconnectivity of areas of open space and that road access was difficult with a one way road and limited footpath provision.

### **Halkirk**

None of the sites in Halkirk has been assessed through the SEA process before. The existing industrial allocation HK07 adjoining the railway line is found to be almost fully under risk of flooding from the adjoining burn and has therefore been non-preferred. HK01 has been preferred as it currently has a live planning permission and is being built out at a slow rate. Although the sites to the west of Bridge Street have not raised significant environmental issues, due to the structured nature of the settlement pattern it would result in a more piecemeal structure which would have detrimental impacts on the setting of the village. The SEA site assessment of HK03 has flagged up several issues including the setting of the adjoining listed church building, flood risk and potential impact on River Thurso SAC and protected species. Relevant mitigation has been identified including development setback and species survey. Due to the number of sites submitted to the Council, HK03 has been suggested as an alternative housing allocation. HK02 has been allocated for industrial uses, with opportunities identified for improved access, in order to encourage employment opportunities within the village.

## **Helmsdale**

Most preferred sites in Helmsdale were identified through the SEA process as having minimal risk of flooding. An exception to this was site HD04: Shore Street that was flagged as being at risk of coastal and fluvial flooding. Therefore built development at HD04 is preferred only to the west side of the road (outwith the SEPA flood risk mapped area). A mix of residential, industrial and community uses are preferred in Helmsdale. The SEA identified the need to ensure this range of sites were able to safeguard the natural environment. For example, requirements included retention of mature trees and species survey work at site HD01: St. John's Church; requirements for sensitive siting, design and planting to safeguard landscape settings and green corridors, for example at site HD02: East of Industrial Estate, and requiring pedestrian access improvements, for example at site HD03: North of Rockview Place.

## **Lairg**

All of the sites considered for Lairg, except for LA11 North of Lairg Industrial Estate, are existing sites in the Sutherland Local Plan and have already been through SEA assessment. The potential impact on the River Oykel SAC was identified through SEA for all sites in Lairg and mitigation is provided that all development should connect to the public sewer. LA07 and LA08 South-west of Main Street is an existing allocation in the Sutherland Local Plan but the SEA assessment of the site has led to part of the site being preferred and part being an alternative. The land behind Main Street is preferred and the land that runs along the A836 is alternative. The land beside the A836 is identified through the SEA as having an undulating landform with development having the potential to be visually intrusive. Development on the land behind Main Street would be less visually intrusive. Preferred sites: LA02 South-west of Ord Place all development should have regard to the Scheduled Monument. LA03 North-west of Ferrycroft an otter survey should be carried out. LA03 North-west of Ferrycroft links should be provided to adjacent woodland. LA01 Former Hotel/Outbuildings any development should not affect TPOs. LA04 Former Laundry maintain core path on site.

SEA influenced decisions to non-prefer sites such as: LA12 Ord Place which SEA identified as being at risk of flooding with a Flood Risk Assessment required as mitigation and most of the site was blanket peat; and LA11 North of Lairg Industrial Estate which SEA identified as being steeply sloping with unclear access. Impacts identified via SEA were not the only reason for non-preferring some sites. The preferred strategy for Lairg is about consolidating development around central sites. Therefore the more central sites are preferred and some alternative are provided.

## **Lochinver**

Sites suggested for Lochinver ranged from existing Local Development Plan allocations to new sites within and outwith the current Settlement Development Area. The sensitivity of the landscape in Lochinver was a key factor identified by SEA in considering sites. The settlement is located within the Assynt-Coigach National Scenic Area (NSA). Several of the sites allocated have mitigation requirements that deal directly with landscape issues, and the SEA process was fundamental in identifying these. For example site LV02: Cnoc a Mhuillin is required to have a carefully designed and masterplanned development approach that takes account of the sensitive landscape setting and NSA designation. SEA also informed decisions for alternative sites. Site LV08: East of Main Street was identified as an alternative because although it is well connected to the settlement significant earthworks would be required to realise its development, raising concerns about potential impacts to the landscape setting. Sites were not preferred on the basis of SEA outcomes, like potential impacts on assets like blanket bog and developing housing in unsustainable locations, for example at site LV09: Assynt and Stoer Glebe.

## **Lybster**

Caithness Local Plan is over 12 years old (at 2014) and therefore a number of existing allocations had not been SEA'd before. The process was integral to identifying site issues and in shaping preferences in Lybster. In the recent past there have been issues with fowl water flooding on certain sites. SEA highlighted this issue and in preferring site LY03: West of old police station the

opportunity was taken to address this historic pressure by mitigation through developer requirements. Other preferred sites were identified as having sensitive water-related constraints, for example LY02: East of Main Street was preferred with mitigation requirements for designing water courses into development, and ensuring no new culverting could impact the water environment. Certain sites were not preferred on the basis of landscape character considerations, like site LY07: South Harbour Road, which threatens cultural and landscape harbour assets by skylining the ridge east above the harbour, on this basis Settlement Development Area boundaries were also revised. Other sites were not preferred because SEA identified important natural heritage designations, like site LY06: Land at Shalligoe, development of which may impact upon birds at East Caithness Cliffs Special Protection Area (SPA)/ Special Area of Conservation (SAC) or impact Dunbeath to South Gaps Geo Site of Special Scientific Interest (SSSI).

### **Tongue**

Similar to Lochinver, Tongue is in a sensitive landscape setting within the Kyle of Tongue NSA. Therefore all of the sites were carefully considered, in this landscape context, through the SEA process. Design statements were a requirement for several sites, including site TG02: West of Varrich Place, which was required to have regard to potential impacts to the amenity of adjacent housing. Natural heritage was an important factor for Tongue identified through the SEA process. Site TG01: South of Loyal Terrace was identified as having a mosaic of burn, woodland and scrub, mitigation of potential impacts to these assets was to require careful planning and retention of existing features to maintain and enhance wildlife connectivity, as well as ensuring necessary species survey work was undertaken. Large sites with potential to impact on the NSA designation, settlement character and other natural heritage assets were identified by SEA. A number were not preferred, like site TG05: Tongue Glebe, the SEA process identified a large part of this site would, among other features, impact the landscape setting. SEA also facilitated a dialogue with consultation authorities that led to site compromises. For example, site TG04: West of the fire station was originally part of site TG05: Tongue Glebe, but was suggested by Consultation Authorities to have potential, subject to careful design and siting, to punctuate the entrance to Tongue. SEA also flagged the sensitivity of Tongue's designed landscape and listed buildings. Site TG03: St. Andrew's Church was flagged as being adjacent to important listed buildings, in preferring this site mitigation included the requirement for a design statement and a design sensitive to the surrounding built heritage features.

### **Thurso/Scrabster**

The sites originate from a variety of sources including the existing local plan, Thurso Charrette, North Highland Onshore Vision, survey work and CaSPlan Call for Sites. None of the sites have therefore been assessed through the SEA process before. The long term expansion of the town to the North West was assessed via several individual SEA site assessments and this raised a number of issues. An area at risk of flooding was identified resulting from a burn at TS05 but a flood risk assessment and a development setback was considered acceptable for the site to be preferred for housing. Wolf Burn which runs through Pennyland was noted as having potential for relatively high levels of ecological value and may be used as part of wider environmental corridors. Relevant mitigation was identified including both safeguarding and making positive features of green corridors through the site for wildlife and recreational uses. The landscape value of TS18, with clear vistas out to Thurso Bay and Dunnet Head, is noted as important to the setting of west Thurso. Also taking into account the cumulative impact of development in the area has meant that TS18 has been non-preferred for development. The openness of the fields west of Pennyland House (TS06) were also noted as providing a degree of landscape value for west Thurso but a suitable setback from the B835/A9 has been considered appropriate. Thurso Harbour TS07 is recognised as being at risk of coastal flooding but this was mitigated against by preferring it for marine based activities only. Several issues emerged with sites along the riverfront including flood risk, potential land contamination and impacts on wildlife but relevant mitigation was identified. Potential recreational and open space enhancements were also identified for sites TS12 and TS13. Flood risk, wildlife and significant impacts on the landscape value results in large scale expansion of the town to the east being non-preferred.

## **Wick**

The sites originate from a variety of sources including the existing local plan, Wick Charrette, North Highland Onshore Vision, survey work and CaSPlan Call for Sites. None of the sites have therefore been assessed through the SEA process before. Previous housing allocations to the south east of Wick were assessed and WK31, WK33 and WK34 have been non-preferred due mainly to landscape and visual impacts. The site south of Thurso Road was a new site submitted at the Call for Sites process. Much of the site has a number of issues including significant landscape, flooding and ecological impacts. However through the SEA process a much smaller section on the eastern side of the site (WK18) has been identified as suitable location housing. A major housing site on land west of Miller Avenue was not preferred due to impacts on the landscape, being prime agricultural land and ecology, including on Lower River Wick SSSI. Several sites within the existing extent of Wick have been preferred for development because they are vacant or derelict brownfield with some having heritage value. Protected species surveys and contaminated land surveys have been noted where appropriate. Sites at Staxigoe and Papigoe have been non-preferred as they do not correspond with the aim to consolidate the town before extending in any one direction. It was highlighted during SEA that the sites WK35, WK36 and WK37 had issues with access and sustainability.

## Monitoring

Section 19 of the Environmental Assessment (Scotland) Act 2005 requires the Responsible Authority to monitor significant environmental effects of the implementation of the Caithness and Sutherland Local Development Plan. This must be done in such a way as to also identify unforeseen adverse effects and to take appropriate remedial action.

It is considered good practice for monitoring:

- fit a pre-defined purpose, help to solve problems, and address key issues;
- is practical and is customised to the PPS;
- is transparent and readily accessible to the public;
- is seen as a learning process and a cyclical process relating closely to the collation of the environmental baseline.

For this monitoring to be effective it will need to be linked to both the SEA Objectives and the Plan Objectives. The baseline data set out earlier in this report sets the scene for any monitoring which is to take place. Below is a monitoring framework. As part of the Action Programme for the Highland wide Local Development Plan we will publish a fuller framework for monitoring of the plan. However, the table below only considers indicators relevant to the state of the environment.

SEA Topic	What the plan seeks to achieve	Monitoring Indicator	Responsible for Data Collation	Publication of Monitoring	Remedial Action
<b>Biodiversity</b>	Protection and enhancement of biodiversity in Highland	Number of applications granted which may affect SPA, SAC, Ramsar, NNR, SSSI, Sites of Local Nature Conservation.	THC (Information and Research)	Annually	Review policy and site allocations in Local Development Plan(s).
	Protected Species are not significantly disturbed	<p>Number of applications which require a protected species survey</p> <p>Number of applications granted which also require a license</p> <p>Number of applications granted which require compensatory tree planting</p> <p>Number of applications incorporating green network components through the master planning process.</p>	THC (Information and Research)	Annually	Review policy and site allocations in Local Development Plan(s).
<b>Population and Human Health</b>	Improve accessibility to open space	Provision of open space (m <sup>2</sup> )	THC (Information and Research)	Annually	Review policy and site allocations in Local Development Plan(s).
		% of households within 1,200m of open space	THC (Information and Research)	Annually	Review policy and site allocations in Local Development

Plan(s).

<b>Soil</b>	Remediation of Contaminated Land and redevelopment of brownfield sites	Number of planning applications granted on brownfield land in the last 12 months	THC (Information and Research)	Annually	Review policy and site allocations in Local Development Plan(s).
	Reduction in the area of prime agricultural land developed	Number of planning applications granted on prime agricultural land (1, 2, 3.1 of the Macaulay Institute Classification (there is no record of Class 1 or 2 in Caithness and Sutherland))	THC (Information and Research)	Annually	Review policy and site allocations in Local Development Plan(s).
<b>Water Quality</b>	Improve Water Quality	Number of designated bathing areas	SEPA	Annually	Review policy and site allocations in Local Development Plan(s).
		Number of rivers "C" classification or below Number of bathing areas passing bathing water quality % of planning applications granted in last 12 months which connected to public water/sewer			
	Reduce instances of flooding	Number of planning applications granted within medium to high flood risk areas (1 in 200yr probability) % travelling to	THC (Information and Research)	Annually	Review policy and site allocations in Local Development Plan(s).
			THC (Information and Research)	Biennially	Review policy and

		work/study by public transport	and Research)		site allocations in Local Development Plan(s).
		% travelling to work/study by active travel	THC (Information and Research)	Biennially	Review policy and site allocations in Local Development Plan(s).
<b>Climatic Factors</b>	Reduction in Travel	% travelling to work/study by car	THC (Information and Research)	Biennially	Review policy and site allocations in Local Development Plan(s).
		% travelling to work/study by public transport	THC (Information and Research)	Biennially	Review policy and site allocations in Local Development Plan(s).
		% travelling to work/study by active travel	THC (Information and Research)	Biennially	Review policy and site allocations in Local Development Plan(s).
<b>Material Assets</b>	Improved accessibility to recycling facilities	% of households within 15km of recycling centre	THC (Information and Research)	Annually	Review policy and site allocations in Local Development Plan(s).
		Number of planning applications granted which include provision for recycling point in last 12 months	THC (Information and Research)	Annually	Review policy and site allocations in Local Development Plan(s).
	Reduction in waste going to landfill	% of total residual waste in Highland going to landfill	THC (Information and Research)	Annually	Review policy and site allocations in Local Development Plan(s).
		Protection and enhancement of public access	Number of planning applications granted which affect path	THC (Information and Research facilitated by	Annually

		identified in the core path plan	access officers)		Plan(s).
<b>Cultural Heritage</b>	Reduce number of buildings at risk	Number of buildings at risk	THC (Information and Research)	Annually	Review policy and site allocations in Local Development Plan(s).
	Impact on schedule monuments	Number and outcome of planning applications where schedule monuments are significantly affected	THC (Information and Research)	Annually	Review policy and site allocations in Local Development Plan(s).
<b>Landscape</b>	Impact on quality of landscape	Number of planning applications granted within NSA and SLA in last 12 months Quality of design statements, implementation of design plans and quality of landscaping schemes undertaken.	THC (Information and Research)	Annually	Review policy and site allocations in Local Development Plan(s).

## Next Steps

### Timescales for the Local Development Plan and SEA Preparation

This Environmental Report will be subject to a 13 week consultation from 30<sup>th</sup> October 2014 until 29<sup>th</sup> January 2015, where expressions of opinion on the report will be welcomed. The Environmental Report will be available to view on the Council website and hard copies will be at Development and Infrastructure Service Reception, Council Headquarters, Glenurquhart Road, Inverness, IV3 5NX and at Planning & Building Standards offices in Golspie and Wick. Electronic copies will be sent to the SEA Gateway and to the Consultation Authorities.

Following this consultation the views will be collated and, where appropriate, alterations will be made. A timetable for the next steps is below:

Timescales	CaSPlan	SEA/Habitats Regulations Appraisal
<b>Complete</b> (From 2011)	Publication of the updated Development Plan Scheme	Prepare a Scoping Report and send to the Consultation Authorities
<b>Complete</b> (Autumn 2013)	Call for Sites	Gathering variety of information on sites and more strategic issues.
<b>Complete</b> (2013/2014)	Preparation of Topic Papers	Identifying key environmental issues and priority outcomes
<b>Complete</b> Autumn 2013 – Summer 2014	Pre Main Issues Report (MIR) Engagement	Regular meetings with key agencies
Oct 2014	Publish Main Issues Report	Publish Environmental Report and submit to SEA Gateway
12 Weeks	CONSULTATION on MIR and SEA	
Spring/summer 2015	Consider representations. Prepare Proposed Plan and Action Programme	Consider responses from key agencies. Appraise environmental implications of Proposed Plan and undertake HRA. Make appropriate amendments to Environmental Report
Autumn 2015	Publish Proposed Plan and Proposed Action Programme	Publish revised Environmental Report and draft HRA and submit revised Environmental Report to SEA Gateway
8 Weeks	CONSULTATION on Proposed Plan	
	Consider representations. Prepare Summary of unresolved Issues and Report of Conformity with Participation Strategy.	Consider responses
Early 2016	Submit Proposed Plan, Action Programme and Report of Conformity to Scottish	Submit HRA record to Ministers

	Ministers. Advertise submission of Plan.	
2016	Examination of Proposed Plan.	
End of 2016	Caithness and Sutherland Local Development Plan adopted by the Highland Council	Publish Post-Adoption SEA Statement and submit to SEA Gateway.
From adoption onwards	Put plan into place and monitor our progress	Publish Post-Adoption Statement and submit to SEA Gateway

**Appendix 1a and 1b – Responses to Scoping Report and THC Response**

**Appendix 2 – Baseline data information and maps**

**Appendix 3 – Outline of Vision/Spatial Strategy and general policy approaches**

**Appendix 4 – Assessment of Vision/Spatial Strategy and general policy approaches**

**Appendix 5 – Cumulative Assessment**

**Appendix 6 – Site Assessments**

**Appendix 7 – Sample Site Assessment Matrix**

## Appendix 1 – How responses received on the Scoping Report have been taken into account

### Historic Scotland

Comment	Response
<p><b>Scope of assessment and level of detail</b>  Welcome approach outlined in this section noting that policy and development proposals from the previously adopted local plans will be reassessed.</p> <p>Recognition of the distinctive qualities of the area’s historic environment is also welcomed.</p> <p>Agree with decision to scope historic environment into the assessment.</p>	<p>Noted.</p>
<p><b>SEA Objectives</b>  As the area covered by the development plan contains the Inventory Historic Battlefield of Carbisdale, battlefields should be added to the SEA Considerations against which the environmental effects of the plan will be assessed. It should be noted that enhancement of certain types of historic environment sites is not always the preferred solution, most notable with scheduled monuments. Therefore suggest rewording the objective to “Protect and enhance, where appropriate, the area’s rich historic environment.”</p>	<p>SEA Objective has been reworded as suggested.</p> <p>There is a question in the site assessment matrix which asks about battlefields.</p>
<p><b>Assessment Methodology</b>  In considering the two-stage assessment process outlined any decisions made regarding the sifting of policies and land allocations before entering the second stage of assessment should be made explicit in the Environmental Report.</p>	<p>The assessment matrix provided with the Scoping Report has been superseded following the agreement that CaSPlan would trial the SNH/HS/SEPA draft Site Assessment and SEA checklist.</p>
<p><b>Monitoring</b>  The mitigation measures identified and required within the</p>	<p>Noted.</p>

<p>assessment should drive the monitoring indicators and should be borne in mind as the assessment progresses.</p>	
<p><b>Appendix B – Environmental Baseline Data</b> Add Historic Battlefields to baseline data for historic environment.</p>	<p>Added</p>
<p><b>Appendix C Proposed Assessment Matrices</b> Welcome the list of questions provided for the historic environment to be used in analysing the spatial strategy. However add the phrase “and their setting” to the end of each question in order to ensure that both development affecting the site and setting of historic environment resources is considered.</p>	<p>The assessment matrix provided with the Scoping Report has been superseded following the agreement that CaSPlan would trial the SNH/HS/SEPA draft Site Assessment and SEA checklist.</p>
<p><b>Consultation Period</b> Content with the 12 week consultation period stated in the Scoping Report.</p>	<p>Noted</p>

## Scottish Environment Protection Agency

Comment	Response
<b>General Comments</b>	
Generally, the scoping report provides clear and detailed information on the proposed scope and level of detail of the assessment and covers most of the aspects that we would wish to see addressed at this stage. Subject to the comments below, we are generally content with the scope and level of detail proposed for the ER.	Noted
<b>Environmental information</b>	
Recognised that at present Appendix B currently only identifies 'main baseline data', further baseline information requirements which should help inform the assessment are made below:  In the soil section it is request that baseline information is specifically required on high carbon soils such as peat. As outlined elsewhere in the Report the plan area includes the Flow Country, the largest expanse of blanket bog in Europe, and many other parts of Sutherland at least, have peaty soils. The website <a href="http://www.seaguidance.org.uk">www.seaguidance.org.uk</a> provides baseline information on soil	Noted – further baseline data will be provided in the final document.  Noted – Baseline information will be provided on carbon rich soils where appropriate. Information on soil is provided in the current state of the environment section.
The material assets section requires information on waste generation and management. SEPA's waste data information is available from <a href="http://www.sepa.org.uk/waste/waste_data.aspx">www.sepa.org.uk/waste/waste_data.aspx</a> . To assist we also produce Waste Infrastructure Maps annually, which show all operational waste management facilities in each Local Authority area. These are available from <a href="http://www.sepa.org.uk/waste/waste_infrastructure_maps/local_authority_maps.aspx">www.sepa.org.uk/waste/waste_infrastructure_maps/local_authority_maps.aspx</a> . Waste baseline data should also include the <i>Zero Waste Plan 2010</i> , in particular the revised Annex B (published February 2011) which provides data relating to additional waste management capacity required in The Highland Council area.	Noted – Information on waste generation and management will be provided in the material assets section of the current state of the environment chapter.
In relation to flood risk then we would expect the process to be informed and supported by a strategic overview of flood risk management issues, presented	Noted – where appropriate, a strategic flood risk assessment will guide and inform any flood risk assessments.

<p>in the form of a Strategic Flood Risk Assessment (SFRA). Our relatively new <i>Strategic Flood Risk Assessment - SEPA technical guidance to support Development Planning</i>, which should be followed, is available from <a href="http://www.sepa.org.uk/planning/flood_risk/policies_and_guidance.aspx">www.sepa.org.uk/planning/flood_risk/policies_and_guidance.aspx</a>. Our <i>Land Use Vulnerability Guidance</i>, which is also available from the same webpage, provides our advice on the vulnerability of different types of developments and this may be helpful to you when considering any human health impacts from flood risk.</p>	
<p>No information is provided on climatic factors. <i>Consideration of Climatic Factors within Strategic Environmental Assessment (SEA)</i> provides guidance on this issue (available from <a href="http://www.scotland.gov.uk/Publications/2010/03/18102927/0">www.scotland.gov.uk/Publications/2010/03/18102927/0</a>). The Scottish Climate Change Impacts Partnership (SCCIP) website (<a href="http://www.sccip.org.uk">www.sccip.org.uk</a>) also offers free access to data on climate trends and their impacts on Scotland which might be helpful. When considering the effects of climate change on flood risk the most recent climate change information for the UK as a whole is the <i>United Kingdom Climate Change Impact 2009 (UKCIP09)</i> study. This study produced four scenarios (ranging from 'Low Emissions' to 'High Emissions') of climate change, based upon different projected inputs of greenhouse gasses to the atmosphere over the course of the 21st Century. Further information can be found at <a href="http://www.ukcip.org.uk/">www.ukcip.org.uk/</a>.</p>	<p>Noted. Discussion about climate change is included in the current state of the environment section.</p>
<p><b>Scope of assessment</b></p>	
<p>Satisfied with scoping in all environmental receptors.</p> <p>However, applying a proportionate approach, we consider that there is the opportunity to scope the Air receptor out of at least some of the assessments. The policy context for air quality has already been set by the Highland Wide Local Development Plan and this plan, we understand, will concentrate on allocations or localised policy. As outlined in your Report local air quality is very good and unless you propose, for example, to allocate very large scale industrial developments or propose new remote settlements we do not foresee the need to consider air quality in your assessments of the allocations.</p>	<p>Noted.</p> <p>Noted – It is not anticipated that air quality is a major issue in the plan area. For this reason we will provide data in the environmental baseline data section but will scope it out of the assessments.</p>
<p>We are satisfied with the approach that the related Supplementary Guidance</p>	<p>Noted.</p>

<p>(which will need to be consulted upon at the same time) will be considered within the relevant assessment of the Local Development Plan itself. It would be very helpful if, where this applies; the assessments are marked to make it clear that they also consider the related Supplementary Guidance.</p>	
<p><b>Alternatives</b></p>	
<p>Satisfied by the approach whereby at least one alternative to each main issue will be assessed.</p> <p>It is expected that all allocations that are reasonably being considered for inclusion in the new plan to be assessed. For the avoidance of doubt this should include those sites been brought forward from current plans (if they have not been assessed previously). If the Portfolio of Sites is already adopted as Supplementary Guidance at this stage then this work should be referred to.</p>	<p>Noted.</p> <p>We have assessed all reasonable sites that came in through the Call for Sites and Ideas exercise, the Wick and Thurso Charrettes, the North Highland Onshore Vision Call for Sites exercise and the existing sites in the Caithness and Sutherland Local Plans. Even sites that were assessed through SEA for the Sutherland Local Plan have been reassessed as the assessment matrix has changed.</p>
<p><b>General comments of the methodology for assessment</b></p>	
<p>Appendix C, which includes the assessment matrices, is welcomed.</p> <p>It is noted that the proposal for a two-stage assessment and are supportive of your wish to take a proportionate approach. We are, however, not absolutely clear how the Stage 1 assessment will be carried out and what the likely consequences will be with respect to what elements of the MIR or Plan will then be subject to the more detailed Stage 2 assessment. For example, we would have concerns if all reasonable allocations were not subject to the Stage 2 assessment, however in relation to this we are reassured by the comment above the site assessment matrix which states that it will be used in the analysis of all potential site allocations. We would nonetheless welcome the opportunity to meet and discuss this further so that we can gain a better understanding of the proposals for the Plan itself and the assessment.</p> <p>In relation to the scoring systems proposed in Appendix C it is noted that when used previously for the Inner Moray Firth Local Development Plan it seemed that in practice "+" and "-" are used to indicate <i>minimal</i> impacts, rather than <i>no or minimal</i> impact as is outlined in the scoring system. Similarly in practice the</p>	<p>The assessment matrix provided with the Scoping Report has been superseded following the agreement that CaSPlan would trial the SNH/HS/SEPA draft Site Assessment and SEA checklist.</p> <p>To assist with proportionate yet comprehensive site assessments, in some settlements, sites have been grouped for assessment purposes.</p> <p>For the policy assessment matrix the "-" has been changed to read "minimal negative impact" and the "+" has been changed to read minimal positive impact".</p>

<p>equals sign seemed to be used to identify no impacts. We suggest that the way the scoping system was used in the previous plan was perhaps better and you might want to change the description of your system to reflect this.</p> <p>When providing the assessment of effects please provide enough information to clearly justify the reasons for each of the assessments presented. It would also be helpful to set out assumptions that are made during the assessment and difficulties and limitations encountered. We would also encourage you to use the assessment as a way to improve the environmental performance of individual aspects of the final option. Proposals for enhancement would also be supported.</p>	<p>Noted.</p>
<p>Satisfied with your proposed vision, spatial strategy and policy assessment matrix and especially welcome the inclusion of a justifications and assumptions column and mitigation columns.</p>	<p>Noted.</p>
<p><b>Methodology for assessment for allocations</b></p>	
<p>Site assessment matrix looks comprehensive, which is very much welcomed. However, we do have some concerns regarding how easy it will be for you to use and how easy it will be for any reader to gain an understanding of the important issues or make comparisons between sites.</p> <p>We note that many of your questions will require a qualitative answer (for example to answer questions such as, <i>what</i> are the likely significant effects, <i>how</i> will it be affected.). We highlight that to carry out the assessment well it will therefore be necessary for you to provide a lot of text to answer each question. While a perfectly acceptable approach we highlight that this may make the resulting assessment very long and, as suggested above, may be difficult to identify significant issues or compare sites.</p> <p>We note that the comments column often outlines the further questions that will be used to consider the initial question. In cases where you currently have a qualitative question we suggest you consider replacing it with the more straightforward second set of targeted questions instead. Most of these questions can be answers well with simple "yes" or "no" answers or with</p>	<p>The assessment matrix provided with the Scoping Report has been superseded following the agreement that CaSPlan would trial the SNH/HS/SEPA draft Site Assessment and SEA checklist.</p>

relatively short text. We think this may help to make a shorter, yet still relevant and easy to follow, assessment.

We like the inclusion of a column showing what information was used to make the assessment. We are also supportive of the approach whereby you consider the allocation with and without mitigation. We will expect to see the relevant mitigation included in the proposed plan when we get to that stage.

### **Soils**

In relation to the fourth soils question on peatland, we query how you are differentiating between the extraction and disturbance of peat. Will any of the allocations specifically propose to extract peat - we presume not. We suggest it would be simpler to just ask "will the proposal be located on peatland?"

### **Water**

In relation to the first water question we suggest you consider amending to "Will the proposal directly impact on the water environment, including wetlands?" In relation to this, to avoid duplication, you may wish to consider removing specific reference to wetlands and watercourses from the third biodiversity, flora and fauna section question.

In relation to flood risk as outlined above we would expect you to carry a Strategic Flood Risk Assessment. This should assess the allocations against all available information on flood risk. The SEA assessment could simply refer to the detail within the Strategic Flood Risk Assessment via the single question "Does the SFRA show that the site is at risk from flooding?" For your information we would consider that allocations that have been determined to be potentially at risk of flooding should be recorded as having a significant negative effect in the pre-mitigation column. If mitigation, in line with Scottish Planning Policy, could be implemented then this could be reduced to minimal effect post-mitigation. Where only part of the site is thought to be at flood risk likely acceptable mitigation measures may include reducing the size of the site to remove the area at risk of flooding or requiring the development to be

supported by a site specific flood risk assessment.

In relation to possibility to connect to the public foul drainage and water system we ask that these questions be answered separately as they often result in different answers. For your information we would consider any significant allocations or groups of allocations in a similar area which do not connect to the public sewage system as having a significant negative effect against the water environment.

We suggest that you could perhaps remove the last water question on drainage. Impacts in relation to culverts etc would be captured by the question we suggest in section 5.6 above and (nearly) all types of developments will require SUDS so response to this aspect of the question is likely to be the same for all allocations.

### **Air quality**

We consider that air quality can probably be scoped out of the assessment for allocations. Unless the allocation is large scale industrial then it is unlikely to have any significant effect on air quality. Similarly there are no Air Quality Management Areas within or near the Plan area and as far as we are aware there are no candidate sites.

### **Climatic factors**

Developing assessment questions for climatic factors for allocations is challenging. We have agreed with a number of previously proposed climatic factor assessment questions at the scoping stage to find that in practice they are not very informative or helpful when used.

In relation to the plan-making process (rather than SEA directly) we ask that you use the question "will the proposal utilise any form of renewable energy" to prompt you try and identify specific requirements for renewable energy production or use and ensure these via developer requirements. If not our SEA

<p>experience of this type of question is that it is answered throughout the assessment (depending on the exact wording of the question) either confirming that there is the opportunity to make sure of renewable energy, but then not identifying what and ensuring that the proposal is carried forward into the Plan, or stating that there are no proposals to produce or make use of renewable energy. Neither response helps consider or compare alternative allocations.</p> <p>Our experience of the question "Can the proposal be set out in a way which would take into consideration climatic factors?" and other similar questions is that the answer is always "Yes it can". Using the word "will" rather than "can" would improve the usefulness of the question; information should then be provided on how this will be ensured (presumable via a developer requirement).</p> <p>We would welcome a question which related to whether the allocation is likely to be at risk of flooding when the effects of climate change are considered. We suggest that for this purpose this could be determined to be those sites currently identified to be at risk of flooding and those sites in a coastal location which are adjacent to areas of flood risk and at a similar height.</p> <p><b>Waste</b></p> <p>The waste question has similar issues to the climatic factors question outlined above in above. The opportunity for sustainable waste management will exist for all sites, but it is our experience that the opportunity is often not taken. We suggest that the question is rephrased to "will the proposal include a sustainable method of managing waste" or similar and as part of the plan-making process you use the question to prompt you to try and identify sustainable waste management solutions for the allocations and then ensure them via developer requirements.</p>	
<p><b>Next steps</b></p>	
<p>We are satisfied with the proposal for a 12 week consultation period for the ER. If helpful, we would be very happy to provide informal comment on any draft</p>	<p>Noted</p>

work before it is submitted.	

## Scottish Natural Heritage

Response	Comment
<b>Scope of assessment and level of detail</b>	
<p>We would commend you for a well laid out, clear and succinct scoping report which on the whole is comprehensive and well reasoned. There did not however appear to be sections relating to existing environmental problems or to monitoring. We have set out some suggestions with regard to the former in the annex. Initially there appeared to be some gaps in the SEA considerations set out (e.g. in relation to carbon rich soils, wild land, energy efficiency, active travel and locating development to reduce the need to travel), but these are listed in the site assessment matrix. We have noted however the need to add Isolated Coast to consideration under Landscape, informed by the Council's Coastal Development Strategy.</p> <p>The Council is proposing a 2-stage process whereby if a policy/allocation is judged very unlikely to have any significant positive or negative environmental impact, a full assessment will not be undertaken. However this overlooks the scope and role of SEA to improve the plan by considering if neutral or minor positive effects could be enhanced. Also this would still require the justification for screening elements of the plan out to be carefully recorded. Overall in the interests of transparency and to maximise the scope of the SEA to enhance the plan we suggest the proposed Stage 1 should be a 'coarse sieve' exercise.</p>	<p>Noted. Isolated coast has been added to the landscape section in table 3.</p> <p>The assessment matrix provided with the Scoping Report has been superseded following the agreement that CaSPlan would trial the SNH/HS/SEPA draft Site Assessment and SEA checklist.</p>
<b>Consultation period for the Environmental Report</b>	
<p>We note that it is proposed that there will be a 12 week consultation period for the Environmental Report at both the Main Issues Report and Proposed Plan stages, and we are content with this.</p>	Noted
<b>The Plan – Relationship with other relevant strategies, plans and programmes</b>	
<p>It would be helpful if the diagram of the hierarchy included Supplementary Guidance (SG). SG might influence the plan (i.e. those linked to the Highland wide LDP) or be influenced by the plan (i.e. any proposed SG of the C&amp;SLDP itself). It is also important to establish the extent to which this SEA will seek to address any SG anticipated to be linked to this plan, or whether any such SG will</p>	Noted – the diagram of the hierarchy has been amended to show the required information.

<p>be covered by separate SEA. PPS above the national level have not been considered in detail some care is needed in this regard because Schedule 3(5) of the Act includes the need for Environmental Reports to include 'the environmental protection objectives established at international level'. If less consideration is to be paid to international PPS it should be checked that they have indeed been translated into national PPS.</p>	
<p>Landscape is not listed in the set of bullet points on pp2- 3, but we note it is included in Appendix A.</p>	<p>Noted. Landscape is included in the SEA Objectives.</p>
<p><b>The environment (p4-5)</b></p>	
<p>This section provides some information on the environmental characteristics of the area, including the extensive coastline, the Flow Country and the geology. Distinctive landscape features are mentioned in relation to topography. In taking this forward to the Draft Environmental Report, we suggest other key environmental characteristics are:</p> <ul style="list-style-type: none"> <li>- This is an important area for the qualities of wildness to be present, and hence where key significant extensive areas of high wild land character are present. This is a particular strength for Sutherland. There are extensive Search Areas for Wild Land in Sutherland, and recent mapping work on wildness indicates the extent of Sutherland with a relatively strong sense of wildness.</li> <li>- The coastline (which is mentioned) is important for breeding seabirds, and much of the north and east coastline and the associated offshore environment is designated as Special Protection Area.</li> <li>- A significant proportion of the north and west coast is classified as Isolated Coast in the Council's Coastal Classification (Highland Coastal Development Strategy).</li> <li>- The extent of designated areas for this LDP is notable — for example according to the Council's figures on page 5 almost 45% of the plan area is designated as Special Area of Conservation/Special Protection Area.</li> </ul>	<p>Noted. Further information as appropriate is provided in the current state of the environment section of the Environmental Report.</p>

<p>We note the table on p5 providing data on designated areas in the plan area. It would be useful if this was accompanied by some information on the presence of protected species and important habitats in the plan area. Perhaps some general information could be provided from the relevant Local Biodiversity Action Plans. For other important habitats, peatland outwith designated areas should be recognised. An indication of their abundance and distribution across Caithness and Sutherland can be found in Map 1 of the 'Peatlands of Caithness and Sutherland Management Strategy 2005-2015' — <a href="http://www.snh.gov.uk/publications-data-and-research/publications/search-thecatalogue/publication-detail/?id=400">http://www.snh.gov.uk/publications-data-and-research/publications/search-thecatalogue/publication-detail/?id=400</a></p>	
<p><b>Appendix B</b></p> <p>This section of the scoping report provides no information on the Council's intended identification and consideration of any existing environmental problems which are relevant to the plan (Schedule 3(4)). We suggest the following should be highlighted in the Environmental Report and tested against the contents of the plan —</p> <ul style="list-style-type: none"> <li>- The attrition on wild land areas, especially from wind farms.</li> <li>- The environmental impacts of small scale wind turbines, especially cumulatively.</li> <li>- The environmental impacts of hydro schemes and associated infrastructure.</li> <li>- Integrity of peatland areas as a carbon sink and an important habitat.</li> <li>- Consideration of the terrestrial and the offshore environment in a coordinated way, such as providing for the onshore aspects of offshore renewables development.</li> <li>- Coastal erosion between the Dornoch Firth and Helmsdale.</li> <li>- Forestry plantation restructuring.</li> <li>- Forestry expansion arising from the Scottish Forest Strategy.</li> <li>- The strategic timber transport route.</li> <li>- Siting and design of housing in the countryside.</li> <li>- Vehicle tracks (bearing in mind no revision of the GPD.)</li> </ul>	<p>Noted – this information has been taken into account when preparing the Environmental Baseline data for the Environmental Report.</p>
<p><b>Scope of assessment (p6-7)</b></p>	

<p>We agree that for this LDP, all the environmental parameters in Schedule 3 of the Act should be scoped in. Under Soil, no mention is made of the carbon storage property of peat soils as another reason to scope this in. Under Population and Human Health, as well as Thurso and Wick regarding past and present industrial uses could we suggest be included Dounreay. This topic should also consider the opportunity for active travel. Under Landscape, another justification is the extent and significance of wild land in Sutherland, including the isolated coast.</p>	<p>Noted.</p> <p>Following further discussions with the Consultation Authorities, air quality has been scoped out.</p>
<p>We agree that development proposals brought forward from existing Local Plans should be assessed (especially given that the current Caithness Local Plan pre-dates SEA).</p>	<p>Noted. All existing sites from the Caithness and Sutherland Local Plans have been assessed, unless they have already been built out.</p>
<p>We also agree that where policies or proposals will form a `hook' from which later Supplementary Guidance will be produced; the scope of the SG should be assessed at this stage as part of this SEA.</p>	<p>Noted.</p>
<p><b>Methods – SEA objectives and considerations (p8-9)</b></p>	
<p>We assume that each of the SEA Considerations listed in this table will feed through to an assessment question in the Site (or Policy) Assessment Matrix. Gaps which appear here (but which in several instances are covered later in the example site assessment matrix) are:</p> <ul style="list-style-type: none"> <li>- Biodiversity, flora and fauna — important habitats, e.g. ancient, long-established and semi-natural woodland; peatland</li> <li>- Population and human health — opportunity for active travel</li> <li>- Soil — carbon rich soil</li> <li>- Climatic factors — energy efficiency of developments; use of renewable energy; reducing the need to travel; coastal processes</li> <li>- Material assets — core paths and other access opportunities; forestry.</li> <li>- Landscape — wild land and areas with strong qualities of wildness; isolated coast</li> </ul>	<p>The considerations listed correlate with questions in the assessment matrix. Gaps which have been listed are covered by assessment questions.</p>
<p><b>Appendix C:</b></p>	
<p><b>Assessment methodology (p9-10)</b></p>	
<p>We note the proposed 2-stage process whereby if a policy/allocation is very unlikely to have any significant positive or negative environmental impact, a full</p>	<p>The assessment matrix provided with the Scoping Report has been superseded following the agreement that</p>

<p>assessment will not be undertaken. However this overlooks the scope and role of SEA to improve the plan by considering if neutral or minor positive effects could be enhanced. Also it will be important that there is sufficient justification documented for elements of a plan that are 'screened out' of SEA assessment. Therefore the justification for any elements being so screened out should be documented in an appendix to the Environmental Report. Overall in the interests of transparency and to maximise the scope of the SEA to enhance the plan we suggest this proposed Stage 1 should be a 'coarse sieve' exercise.</p>	<p>CaSPlan would trial the SNH/HS/SEPA draft Site Assessment and SEA checklist.</p> <p>All policies/alternatives and all reasonable sites have been subject to assessment.</p>
<p><b>Monitoring</b></p>	
<p>We note there is no coverage of monitoring in this Scoping Report. A description of the measures envisaged concerning monitoring should be included in the Environmental Report (Schedule 3(9)). Indicators should be linked to the SEA Considerations.</p>	<p>Noted – The environmental report includes a section on monitoring.</p>
<p><b>Habitats Regulations Appraisal (p10-11)</b></p>	
<p>We welcome the intention to use the SEA for early consideration of any likely significant effects of policies and allocations on European sites. Please note that reference should be made to the 2012 version of the SNH Guidance (Version 2.0), not the 2010 version (Version 1.0).</p>	<p>Noted – Reference will be made to 2012 version of the SNH guidance (version 2.0) and not the 2010 version (Version 1.0).</p>
<p><b>Next steps (p11)</b></p>	
<p>We are content with the proposed 12 week period for consultation at both the draft (Main Issues Report) and revised (Proposed Plan) Environmental Report stages.</p> <p>We note the documents will be available for public view at the Council's offices in Inverness, but presume they would also be available for public inspection at the Council's offices in Golspie and Wick.</p>	<p>Noted.</p> <p>Copies of the document will be made available for public inspection at the Golspie and Wick council offices.</p>
<p><b>Appendix A – Relevant legislation, PPS and Environmental objectives (p12-15)</b></p>	
<ul style="list-style-type: none"> <li>- The EC Habitats Directive and the Habitats Regulations are relevant with regard to protected species (European Protected Species) as well as Natural sites.</li> <li>- As well as the Nature Conservation (Scotland) Act 2004 reference should</li> </ul>	<p>This section has been updated in the Environmental Report.</p>

<p>be made to the Wildlife and Countryside Act 1981 as amended and the Wildlife and Natural Environment (Scotland) Act 2011 with regard to protected species and the biodiversity duty.</p> <ul style="list-style-type: none"> <li>- For the Flow Country reference should be made to 'Peatlands of Caithness and Sutherland Management Strategy'.</li> <li>- A further entry is required to cover green networks. This could indicate the hierarchy from the Scottish Planning Policy to the Highland wide LDP to the Green Networks Supplementary Guidance.</li> </ul>	
<p>Population and human health: This should include the hierarchy of PPS that promote active travel, e.g. the Highland Local Transport Strategy and Active Travel Masterplans.</p>	<p>This section has been updated in the Environmental Report.</p>
<p>Landscape: A hierarchy of PPS can be indicated for isolated coast (Scottish Planning Policy to the Highland wide LDP to the Highland Coastal Development Strategy)</p>	<p>This section has been updated in the Environmental Report.</p>
<p>As well as the European Landscape Convention should be listed :</p> <ul style="list-style-type: none"> <li>- Countryside (Scotland) Act 1967</li> <li>- Caithness and Sutherland Landscape Character Assessment (1998)</li> <li>- Scotland's Scenic Heritage</li> <li>- Special Qualities Reports for National Scenic Areas</li> <li>- Citations for the Special Landscape Areas</li> <li>- Wildness in Scotland's Countryside Policy Statement</li> <li>- Wildness Qualities Mapping</li> <li>- Highland Coastal Classification (in Highland Coastal Development Strategy)</li> </ul>	<p>This section has been updated in the Environmental Report.</p>
<p>Other relevant PPS:</p> <ul style="list-style-type: none"> <li>- We suggest the N-RIP is very relevant for this plan</li> <li>- Highland Single (Outcome Agreement 2)</li> </ul>	<p>This section has been updated in the Environmental Report.</p>
<p><b>Appendix B – Environmental baseline data (p16-17)</b></p>	
<p>The list is so far limited to designated areas. The environmental baseline data should also consider other important habitats and species, and also the green network.</p> <ul style="list-style-type: none"> <li>- Presence of protected species may be able to be derived from the NBN</li> </ul>	<p>Where the data has been available to us, it has been included in the baseline data.</p>

<p>Gateway (<a href="http://data.nbn.org.uk/">http://data.nbn.org.uk/</a>) although absence of any record is not conclusive that the species is not present).</p> <ul style="list-style-type: none"> <li>- Ancient, semi-neutral and long established woodland is mapped on the inventory.</li> <li>- Peat soils are indicated on Map 1 of 'Peatlands of Caithness and Sutherland Management Strategy'. More detailed information would be available from the James Hutton Institute.</li> <li>- The Highland wide LDP provides for Green Networks in the corridors from the Dornoch Firth to Helmsdale and between Thurso and Wick. You may wish to discuss with us as work commences on the LDP how the existing important elements of the green network should be identified and mapped in these subareas.</li> </ul>	
<p>Population and human health:</p> <ul style="list-style-type: none"> <li>- Active travel audits are available for Thurso and Wick <a href="http://www.highland.gov.uk/yourenvironment/roadsandtransport/transportplanning/ActiveTravelMasterplans.htm">http://www.highland.gov.uk/yourenvironment/roadsandtransport/transportplanning/ActiveTravelMasterplans.htm</a></li> </ul>	<p>Where the data has been available to us, it has been included in the baseline data.</p>
<p>Soil:</p> <ul style="list-style-type: none"> <li>- The presence of carbon rich soil should be added here — again baseline material is mapped in the Management Strategy for the Caithness and Sutherland Peatlands, and more detailed data should be obtainable from JHI. Also see our Information Note on Carbon Rich Soils - <a href="http://www.snh.gov.uk/planning-and-development/advice-for-planners-and-developers/soils-rocks-and-minerals/soils-and-development/">http://www.snh.gov.uk/planning-and-development/advice-for-planners-and-developers/soils-rocks-and-minerals/soils-and-development/</a></li> <li>- Geodiversity sites should also be added under here — baseline data would include un-notified GCR and RIGS sites (Local Geodiversity Sites).</li> <li>- Baseline data for brownfield sites could be obtained from the Vacant and Derelict Land Survey.</li> </ul>	<p>Where the data has been available to us, it has been included in the baseline data.</p>
<p>Landscape:</p> <ul style="list-style-type: none"> <li>- Other environmental baseline data that should be listed and utilised are:</li> <li>- National scenic areas (including their special qualities)</li> <li>- Search areas for wild land (from the SNH policy statement)</li> <li>- Wildness qualities mapped information</li> </ul>	<p>Where the data has been available to us, it has been included in the baseline data.</p>

<ul style="list-style-type: none"> <li>- Highland coastal classifications (from Highland Council Development Strategy)</li> <li>- Sutherland landscape capacity study: an analysis of housing potential (2006).</li> </ul>	
<p><b>Appendix C – Proposed assessment matrices (p18-24)</b></p>	
<p>By and large this is a comprehensive matrix for assessment, which in places fills gaps in coverage noted elsewhere in the scoping report, e.g. under Climatic Factors and Soil.</p> <p>We suggest that the proposed “+” and “-“ scores should be minimal positive/negative impact as opposed to `no or minimal positive/negative impact'. This would then avoid confusion with the `= score which is `neutral impact'.</p> <p>The policy and site assessment matrices do not include cumulative effects. It is suggested a separate matrix will be necessary for this, relevant for example to landscape character areas, river systems and protected species.</p>	<p>The assessment matrix provided with the Scoping Report has been superseded following the agreement that CaSPlan would trial the SNH/HS/SEPA draft Site Assessment and SEA checklist.</p> <p>For the policy assessment matrix the “+” and “-“scores have been amended to minimal.</p> <p>Cumulative effects have been assessed separately and the results are in the Environmental Report.</p>
<p>Biodiversity, flora and fauna – 3<sup>rd</sup> question.</p> <ul style="list-style-type: none"> <li>- As well as ancient and semi-natural woodland should be reference to long established woodland.</li> <li>- Peatland should be added in relation to its habitat value.</li> </ul>	<p>The assessment matrix provided with the Scoping Report has been superseded following the agreement that CaSPlan would trial the SNH/HS/SEPA draft Site Assessment and SEA checklist.</p>
<p>Population and human health.</p> <ul style="list-style-type: none"> <li>- We suggest another entry should be added here with regard to the promotion of active travel, eg. “Will the proposal create and/or link in to the path network for walking and cycling?”</li> </ul>	<p>The assessment matrix provided with the Scoping Report has been superseded following the agreement that CaSPlan would trial the SNH/HS/SEPA draft Site Assessment and SEA checklist.</p>
<p>Landscape</p> <ul style="list-style-type: none"> <li>- Will the proposal affect any designated landscape areas?</li> <li>- Will the proposal maintain or enhance the present landscape character of the area?</li> <li>- Will the proposal affect a search area for wild land or an area with a high quality of wildness?</li> <li>- Will the proposal affect the isolated coast?</li> </ul>	<p>The assessment matrix provided with the Scoping Report has been superseded following the agreement that CaSPlan would trial the SNH/HS/SEPA draft Site Assessment and SEA checklist.</p>

- Does the proposal accord with the landscape capacity of the area?	
---	--

## Appendix 1b:

Following on from the agreement that CaSPlan would trial the SNH/HS/SEPA draft Site Assessment and SEA checklist, we produced a modified version and submitted a revised Scoping Report to the SEA Gateway in November 2013. The tables below relate to the responses we received to the revised Scoping Report and deal just with the site assessment and SEA checklist. Following on from the responses for this this that we received from the Consultation Authorities, various alterations were made to the draft matrix in consultation with the Consultation Authorities.

### Historic Scotland

Welcome your intention to use the pro-forma checklist. In offering comments I am working on the understanding that a double minus/plus is seen as a significant effect and a single minus/plus as not significant.	Correct.
--Development of this site would lead to the loss or major alteration of key component of a cultural heritage designation or its setting – the phrase “complete alteration” is a little confusing. As currently drafted it would appear that significant adverse effects on the setting of cultural heritage features cannot be identified.	“--” Has been redrafted to read, “Development of site would lead to loss or major alteration of components of a cultural heritage designation or its setting”
-Development of this site would have a negative impact on features of a cultural heritage designation or its setting – negative impacts on “key features” of a cultural heritage designation are likely to be significant.	Noted. The word “minor” has been added.
+renovation/regeneration of historic buildings lying empty/at risk and /or development will enable better access to the historic environment and/or maintain the setting of cultural heritage features – development can be brought forward without altering important aspects of the setting of cultural heritage sites.	Text has been amended to reflect the suggested changes.
++Large-scale redevelopment and reuse of historic buildings/building from at risk register and /or enhance the setting of cultural heritage features and/or designation of a new conservation area or scheme of safeguarding – in some cases development can aid in the enhancement of degraded settings of cultural heritage features.	Noted.

## Scottish Environment Protection Agency

We very much welcome the fact that you are trialling the SNH/HS/SEPA produced draft Site Assessment and SEA checklist, with some additional questions/modifications of your own. This should help ensure that the final version we release is a useful document.	Noted
I refer you to our previous scoping response in relation to comments on the scoping of “air”, about proportionality and in relation to the quantitative nature of your assessment – the fact that questions that start “to what extent” are more difficult to answer than questions that start “will the option...”.	Air has been scoped out of the assessment in agreement with the Consultation Authorities.
Site history and outside settlement boundary – good useful information.	Noted
In the “Comments” column - Suggest you add in again the column which explains how the information was gathered. Alternatively, if the question is always answered in the same way you could just provide a separate table that provides this information once (rather than it have to be repeated every time for each assessment)	Appendix 7 of the Environmental Report is a blank version of the site assessment matrix and the sources of information column is shown for each question.
Q1: “or may have an affect on the actions being carried out by the North Highland Area Advisory Group” – seems a reasonable addition.	Text added to question.
Q6 Climate change mitigation – how is this going to be scored?	Pre and post mitigation scoring has been added.
Q7 Flood risk – The new Q7 negates the need for Q 8, 9 and 10	Noted, flood risk is now just question 3a.
Could Q17 and 18 be combined (vehicle access constraints or opportunities and is the site close to a range of facilities)	Two separate questions remain.
Q23 (what level of work would be required to connect to a public water supply and waste drainage system) could be covered in Q20	Separate question on public water supply remains.
Q24 air quality - Do you really think that air quality is going to be a very significant issues for Caithness and Sutherland allocations? (At the scoping stage we suggested that it wouldn't be) Suggest opportunities exist to shorten and streamline this section. There are no existing air quality management areas in Caithness and Sutherland so this question is not relevant to the Plan - suggest you remove.	Air quality has been removed in agreement with the Consultation Authorities.

Q32 – just cover contamination in Q33	Question 32 (now 11a) now just covers brownfield land and not contamination.
Q36 – add “and other carbon rich soils”	Text added.

## **Scottish Natural Heritage**

Q5 – maybe to be in line with the style of other questions this should be re-phrased to - ‘To what extent would the proposal affect groundwater abstractions?’ and then the accompanying text in the right hand column would set out the details of how this would be assessed (i.e. distance from roads, borrow pits etc). In this respect we suggest there should be more clarity on what is a ‘large scale proposal’ (a term not used for other assessment questions)	Question 5 is no longer a question.
Q6 – if the SPACE model simply provides a figure (e.g. CO2 output) a yardstick will need to be devised to assess this as positive or negative	The SPACE model was not used, instead yardsticks of sizes of developments were used to provide scores.
Q12a – we suggest that in order to integrate with the HRA of the plan, any likely significant effect on a Natura site should be assessed as - -, while a minor effect (i.e. an effect but not significant) should be assessed as – . This would help with the screening stage (alone or in combination) in HRA. Mitigation would have to be dovetailed between the SEA and HRA (see latest SG Advice Sheet on HRA and SEA)	Noted
Q12b – we suggest a - - score should be where there could be an effect on the integrity of the designated site or the qualities for which it is designated. This is especially important for any effect on a SSSI (which is a national designation) as opposed to a SLNCI or LNR (which are not). A – score would be for a negative effect that was not significant	Scoring text amended to reflect this.
Q12c – we suggest a - - score should include where there would be a loss of woodland that is included in the Ancient Woodland Inventory, given the strong presumption against loss of such woodland in the Control of Woodland Removal Policy and its accompanying guidance.	Scoring text amended to reflect this.

Another habitat to list here is blanket bog (i.e. Annex 1 habitats)	
Q12d – we suggest a - - score should be where it is likely that a protected species licence will need to be obtained to allow the development to proceed. A – score could be where protected species are likely to be present, but mitigation should be possible to avoid the need for a licence	Scoring text amended to reflect this.
Q21 – other ‘bad neighbours’ could be considered here as well as electricity pylons – e.g. quarries, pipelines, wind farms. Distance thresholds could be used to define - - and - effects	Question amended to reflect suggestion
Q28 – we suggest this is segregated into two questions to help answer the two different facets to this issue – Q28a – “To what extent will the proposal affect the quality of open space or result in a loss of open space?” Q28b – “To what extent is the proposal accessible to existing open space?” (distance thresholds could be used for this one, e.g. a site < 250m = ++, <500m = +, >500m = - - and >1000m = - -)	Amendments made to these questions following further discussion with SNH.
Q32 – this covers both contaminated and brownfield land, and we suggest these are segregated out, since different issues relate to each. In fact Q33 also covers contaminated land, so some rationalisation appears possible here, e.g. “To what extent does the proposal re-use brownfield land?”; “Are there contaminated land issues on the site, and if so will the proposal reduce contamination?”	Question now just covers brownfield land.
Q36 and 37 – again some rationalisation appears possible here, as both these consider carbon-rich soils / peat. We suggest Q36 considers carbon rich soils and Q37 considers prime agricultural land. However given the special nature of Caithness and Sutherland we suggest you will want to consider any effect on good quality croft land (e.g. in-bye). So we suggest Q37 should address both prime land and good quality croft land, i.e. Q36 = “To what extent will the proposal lead to a disturbance of carbon-rich soils (including peat) and hence their carbon storage properties?”; and Q37 = “To what extent will the proposal affect prime quality agricultural land or good quality croft land?”	Question 12a deals with carbon rich soils and question 12b deals with high quality agricultural soil or croft land, using text suggested.
Q42 – we suggest a - - score should be where there could be an effect on the integrity of the designated site or the qualities for which it is	Changes have been made to scoring text following further discussions with SNH.

<p>designated. This is especially important for any effect on a NSA (which is a national designation) as opposed to a SLA (which is not). A – score would be for a negative effect that was not significant. (NB there is a typo in the right hand column as this refers to designed landscapes rather than designated landscapes). We also suggest that at present the text in the RH column is only relevant for proposals affecting designated areas (i.e. NSA, SLA) and is not relevant for consideration of impact on landscape character more widely. So we suggest further accompanying text along the lines of “- - = The proposal is of a scale or nature that would be difficult to be accommodated within the particular landscape character type”; “ - = The proposal does not relate to the characteristics of the landscape in the area”; “+ = The proposal has been designed to blend in to the existing character of the landscape”; “+ + = The proposal enhances a degraded landscape character area”. It is unclear why there is a 0/X option here – we would have assumed these were two separate options (‘0’ = neutral and ‘X’ = not applicable, although the SEA issue of landscape should be applicable to all proposals)</p>	
<p>Q43 – we suggest wild land is made into a separate question, so that this question can focus on landscape character more generally. So a separate question Q43b would be along the lines of “To what extent will the proposal affect any area with strong qualities of wildness (including the isolated coast)?” with Q43a being “To what extent will the proposal affect features of landscape interest, including the distinctive character of the landscape?”</p>	<p>Question is now just about wildland. Landscape is dealt with on other questions.</p>
<p>Q44 – we suggest amending the question here to “To what extent is the proposal within the capacity of the landscape to accommodate it?” We suggest adding a supplementary question here along the lines of “To what extent would the proposal be visually intrusive” bearing in mind the criteria in the RH column here (NB however there is scope for rationalisation re landscape between Qs 43a and 44 as they are very duplicative)</p>	<p>Question 15a has been amended to reflect the suggested text and question 15b now asks “To what extent would the proposal be visually intrusive”.</p>
<p>Q51 – re World Heritage Sites a note should be added here in order that any impacts on the tentative Flow Country WHS is considered</p>	<p>Text added</p>
<p>How would a judgement be made across the totality of answers to</p>	<p>A discussion is included in the Environmental Report for each</p>

these questions as to whether a site is acceptable to carry forward as a preferred option in the MIR? Does that depend on suitable mitigation being included for identified significant negative effects?	settlement which highlights how SEA has influenced the decision over whether sites are preferred or non-preferred.
How will this assessment be used for sites that are already in the Adopted Local Plan or have an extant planning permission?	Existing sites in local plans and sites that have extant planning permission have all been assessed using the site assessment matrix.
Thought should be given to how the amount of time spent on completing this assessment for each bid site (and for publishing and reading the SEA in due course!) can be kept to a manageable level.	Noted.

## Appendix 2 - Baseline Data Information and Maps

The information in this section represents baseline data which has been taken at either Highland wide level or, when available, Caithness and Sutherland level.

Biodiversity, Flora and Fauna	Key information	Data Source
Protect, enhance and where necessary restore designated wildlife sites and protected species	There are currently 150 SSSI's, 29 SAC's, 15 SPA's, 4 NNR's, 3 RAMSAR in the Plan area.	SNH website for information on designated sites, site condition and qualifying interests/features: <a href="http://www.snh.org.uk">www.snh.org.uk</a>  <a href="#">Scottish Biodiversity Strategy (Scotland's Biodiversity - It's In Your Hands; 2020 Challenge for Scotland's Biodiversity)</a>
	Flow Country, nominated to UNESCO as a tentative World Heritage Site, is a vitally important habitat on a regional and international scale. It is the largest expanse of blanket bog in Europe, and covers about 4,000 km <sup>2</sup> and home to a rich variety of wildlife, and is used as a breeding ground for many different species of birds.	The Peatlands of Caithness and Sutherland - Management Strategy 2005 - 2015
Improve biodiversity, avoiding irreversible losses.	Highland region supports 192 of the 238 priority species in Scotland and 40 of the 42 priority habitats. 455 of the priority species of conservation importance are found in Highland.	Highland Biodiversity Action Plan <a href="http://www.highlandbiodiversity.com">www.highlandbiodiversity.com</a>  Habitat and Birds Directive – Annex 1
Provide appropriate opportunities for people to come into contact with and appreciate wild life and wild places.	Proportion of population living within 200m of a footpath. The core paths plan is yet to be completed but this information will be added to the baseline data when the plans are adopted, Summer 2008.	The Highland Councils Core path plan.
Fisheries and Aquaculture	Natural Resources of the Seas around Highland.	<a href="http://www.highland.gov.uk/yourenvironment/agriculturefisheriesandforestry/fisheriesandaquaculture/">http://www.highland.gov.uk/yourenvironment/agriculturefisheriesandforestry/fisheriesandaquaculture/</a>
Protected species		THC's Statutorily Protected Species Supplementary Guidance  SNH website  Presence of protected species may be able to be derived from the NBN Gateway <a href="http://data.nbn.org.uk/">http://data.nbn.org.uk/</a> (although absence of any record is not conclusive that the species is not

Forest and Woodland

The forestry map below shows the key features within the existing forestry industry across Highland.

In the Plan area there are 1,338 Semi-natural woodland sites, 1,010 ancient woodland sites and 8 Tree Preservation Orders.

## Appendix 3 – Outline of Vision and Spatial Strategy and General Policy Approaches

### Caithness and Sutherland Vision and Spatial Strategy –\_What should Caithness & Sutherland be like in 2035?

Option 1 – The Preferred Vision		
Employment	A strong and diverse economy characterised by a renowned centre for renewable energy, world class engineering, traditional land and sea based industries and a tourist industry that combines culture, history and adventure.	Go to Section 3 page  →
Growing Communities	A network of successful, sustainable and socially inclusive communities where people want to live, which provide the most convenient access to services, education, training and employment and are the primary locations for inward investment.	Go to Section 4 page  →
Connectivity and Transport	Enhanced communications, utilities and transport infrastructure that support communities and economic growth, with development anchored to existing or planned provision.	Go to Section 5 page  →
Environment and Heritage	High quality places where the natural, built and cultural heritage is celebrated and valued assets are safeguarded.	Go to Section 6 page  →
<p>Reasons:            These four outcomes are our preferred vision for Caithness and Sutherland because we think they would best deliver both the Council's Programme and the SOA. They also provide a stronger connection to the suggested actions outlined in this Plan.</p>		

## Option 2 – An Alternative Vision

As an alternative we could carry forward the existing HwLDP Vision for the Caithness and Sutherland area, which is summarised below.

“By 2030, Caithness and Sutherland will:

- be a regenerating place with a network of strong communities
- be a competitive place connected to the global economy
- be a connected and accessible place
- be a place of outstanding heritage: safe in the custody of local people
- be a centre of excellence for energy and engineering
- have become an international centre of excellence for marine renewables
- have a high quality tourist industry
- have a more diverse economy”

Reasons:

This option is only an alternative because the HwLDP vision is less up to date and has not been prepared in the context of the Single Outcome Agreement 3.

## Growing Settlements Policy

### Option 1 – The Preferred Growing Settlements Policy

Bettyhill, Dunbeath, Dunnet, Durness, Embo, John O'Groats, Keiss, Kinlochbervie, Latheronwheel, Melvich, Portskerra, Reay, Scourie, Watten

Development proposals that are contained within, round off or consolidate the Growing Settlements (listed above) will be assessed against the extent to which they:

- take account of the issues and placemaking priorities (listed in Section 7) and development factors (to be included in the Proposed Plan);
- are likely to help sustain facilities in that settlement;
- are compatible in terms of use, spacing, character and density with development within that settlement;
- can utilise spare, existing capacity in the infrastructure network (education, roads, other transport, water, sewerage etc.) within that settlement or new/improved infrastructure could be provided in a cost efficient manner;
- avoid a net loss of amenity / recreational areas significant to the local community; and
- would not result in an adverse impact on any other locally important heritage feature (which may include a war memorial, burial ground, important public viewpoint/vista or open space).

Proposals which demonstrate overall conformity with the above criteria will be in accordance with this policy.

### Option 2 – An Alternative approach

More rigid approach

Using the policy approach in the Preferred Option above but require that for development to be supported it must meet *all* of the criteria.

### Option 3 – An Alternative approach

More flexible approach

Using the policy approach in the Preferred Option above but specify that for development to be supported it only needs to meet *some or certain* criteria.

## Proposed Policy – Promoting and Protecting Settlement Centres

### Option 1 – The Preferred Approach

To deliver the outcome for Growing Communities we think this Plan should:

- Locate new housing development in areas which can help to sustain important community facilities and services
- Include a policy in the Plan for promoting and protecting settlement centres (see below)
- Highlight possible projects within communities which help to direct investment and unlock funding.
- Encourage the conversion of redundant retail space in town centres to residential and community uses.

### **PROPOSED POLICY - PROMOTING AND PROTECTING SETTLEMENT CENTRES**

The Council will support a diverse range and mix of uses for land and buildings in settlement centres, to strengthen their vitality and viability.

In support of the settlement centres of Brora, Dornoch, Golspie, Thurso, and Wick [as to be identified on maps in the Proposed Plan], the Council will not support any proposal for development that is likely to have an adverse effect on the vitality and viability of those settlement centres.

Developers of proposals that generate footfall (visits by the general public) should consider potential sites for their development in a sequential manner. This means considering sites within the settlement centre boundary first before looking at other locations within the settlement. This includes considering what opportunities exist for regeneration through the reuse or redevelopment of existing sites and buildings. If the Council considers that a proposal may result in an adverse impact on the vitality and viability of any of these centres then the developer will be required to produce a sequential assessment. In such cases we will only support the development proposal if this assessment demonstrates no adverse impact.

Reasons:

- Having access to relevant facilities and services is essential to sustain a varied and healthy community.
- Settlement centres form the heart of communities and serve a range of social, cultural and economic functions. It is important to limit the factors which challenge centres and promote the opportunities which exist in these locations.

**Option 2 - More Flexible Approach**

Do not include the settlement centre policy in the Plan and do not define settlement centres, but instead rely on existing HwLDP general policies to guide decision making (more flexible approach) – such as HwLDP Policy 34 (Settlement Development Areas) and Policy 28 (Sustainable Design)

**Option 3 – More Rigid Approach**

Identify centre boundaries for all settlements

## Special Landscape Areas

### Option 1 – The Preferred approach

Examine all SLA boundaries and make amendments as appropriate

Having examined all the existing SLAs within the CaSPlan area we consider the following SLAs should remain unchanged from the boundaries shown in HwLDP:

Duncansby Head SLA; the Flow Country and Berriedale Coast SLA; Ben Griam and Loch Nan Clar SLA; Ben Kilbreck and Loch Choire SLA, and the Loch Fleet, Loch Brora and Glen Loth SLA.

We intend to refine the boundaries of the following SLAs to better reflect the criteria above:

Oldshoremore, Cape Wrath and Durness SLA; Eriboll East and Whiten Head SLA; Farr Bay, Strathy, Portskerra SLA; Dunnet Head SLA.

Maps and supporting text outlining our proposed changes for these SLAs are included below .

This option is preferred because:

- We think that SLA boundaries should follow definite landforms and avoid severing self contained landscape features. They should enclose adjacent areas of similar or complementary landscapes following the [SLA citations](#) and [Landscape Character Assessments](#) that describe their qualities and characteristics. We don't think SLA boundaries should be extended as buffers.
- SLA boundaries should relate to landscape features and fully enclose areas of similar landscape character and quality.

### Option 2 – An alternative

Carry forward all the SLAs unchanged from the HwLDP

This option is not preferred because we think we should take the opportunity to refine the SLA boundaries at a local level.

## Appendix 4: Vision/Strategy and Policy Assessments

This section contains detailed assessments of the vision and spatial strategy and preferred policies contained within CaSPlan and any reasonable alternatives which have been identified.

The assessment considers:

- What level of impact the vision/spatial strategy/policy/reasonable alternative may have in the short/medium/long term on each of the SEA Objectives and;
- At what scale the policy/reasonable alternative may have an impact.

The matrix also includes a justification of the assessment for each SEA objective. This is intended to guide the reader through the decision making process. To aid in this there are assumptions recorded at the beginning of each matrix, which have been made in the decision making process. This is recorded at the start rather than against each SEA Objective as the assumptions made apply to all the Objectives.

For consistency the following scoring system has been used through out the assessment matrices:

Significant Positive Impact	Minimal positive impact	Neutral Impact	Minimal negative impact	Significant negative impact	Possible Positive and Negative Impacts	Unknown Impact
++	+	=	-	--	+/-	??

Each assessment will be followed by a concise commentary on the findings of the assessment of the policy/reasonable alternative.

Please note that all assessments have been carried out assuming that the mitigation is already included in the policy.

The key considerations which are set out below will be used in the assessment of each of the policies/reasonable alternatives.

### 1 To conserve and where possible enhance biodiversity and accord to the protection of valued nature conservation habitats and species

Will it contribute to the protection and enhancement of biodiversity in Highland?

Will it have a detrimental effect on protected species?

Will it contribute to achieving local and regional biodiversity action plan targets?

Will habitats of importance for biodiversity be protected?

Will designated sites be protected?

Will it avoid the introduction or spread of non-native species?

Will habitat networks and corridors be maintained or enhanced?

### 2 To improve the living environment for all communities and promote improved health of the human population

Will it ensure better connectivity of open spaces?

Will it create or enhance green networks for people or wildlife?  
Will it give additional benefit to human health?  
Will human health be significantly reduced?  
Will it ensure a healthier lifestyle for the residents within the settlements?

**3 Safeguard the soil quality, geodiversity and improve contaminated land**

Will it lead to the avoidance of areas of landslide/landslip?  
Will it ensure the re-use of brownfield sites?  
Will it prevent the sealing of good quality soil on sites?  
Will it protect areas of importance for geodiversity in Highland?  
Will carbon storage of peat land be protected?

**4 Manage and reduce flood risk and protect the water environment**

Will it ensure new developments are free from flooding?  
Will it reduce the vulnerability of existing areas to flooding?  
Will it enhance natural drainage?  
Will it ensure SUDS are included in new residential developments?  
Will it ensure development is supported by appropriate drainage infrastructure  
Will it ensure that development has no detrimental impact on the water environment?  
Will it ensure developments enhance the water environment where possible?

**5 Reduce greenhouse gases and contribute to the adaptation of the area to climate change**

Will it reduce the need to travel?  
Will it ensure an increase in use of more sustainable transport methods?  
Will it ensure better opportunities for walking and cycling?  
Will it ensure more renewable energy production where appropriate?  
Will it ensure energy efficiency is taken into consideration in new developments?  
Will it ensure suitable connection to electricity infrastructure?  
Will it reduce the risk of coastal inundation through sea level rising?

**6 Manage, maintain and promote sustainable use of material assets**

Will it support the minimisation of waste production?  
Will it support the achievement of government targets through the use of the waste management hierarchy?  
Will it ensure the waste management facilities comply with National Waste Strategy Objectives, thus ensuring only residual waste is land filled?

Will it ensure recovery of energy and heat from waste is considered where appropriate?

**7 Protect and enhance, where appropriate, the area's rich historic environment**

Will it protect and enhance the historic environment?

**8 Protect and enhance the character, diversity and unique qualities of the landscape**

Will local diversity and distinctiveness be maintained or enhanced?

Will the special qualities of designated areas be maintained or enhanced?

Will existing landscape character be maintained or enhanced?

Will visual impact be minimised?

Will scenic value be maintained or enhanced?

Will it safeguard the ability of people to experience qualities of wildness?

**Explanation of Assessment Matrix**

SEA Objective from Environmental Report

Any mitigation measures that will be required to avoid, reduce, remedy or compensate any negative effects identified, when required and who will be required to implement them

SEA Objective	Time Scale			Magnitude		Justification and Assumptions	Mitigation		
	Short Term	Medium Term	Long Term	Local	Regional		Measure	Lead Authority	Proposed Timescale
1									

When will the effect become apparent: short (0-5yrs), medium (5-10yrs), or long term (10+yrs)

Will the approach have an impact locally (i.e. just within a settlement) or regionally (i.e. right across Caithness and Sutherland)

## Caithness and Sutherland Vision and Spatial Strategy – What should Caithness & Sutherland be like in 2035?

### Option 1 – The Preferred Vision

**Assumptions made when assessing:** Any proposal which meets the outcomes of the vision will also be assessed against all relevant policies in HwLDP, Caithness and Sutherland LDP and Supplementary Guidance.

SEA Objective	Timescale			Magnitude		Justification and Assumptions	Mitigation		
	Short Term	Medium Term	Long Term	Local	Regional		Measure	Lead Authority	Proposed Timescale
1	+	+	+	+	+	<p><b>Justification</b></p> <p>The vision promotes high quality places where the natural, built and cultural heritage is celebrated and valued assets are safeguarded. A high quality natural environment provides safeguards for habitats and species. The vision may go some way in taking forward targets from the LBAPs.</p>	Review vision and spatial strategy during next review of CaSPlan	THC	2021
2	=	+	+	+	+	<p><b>Justification</b></p> <p>The vision promotes high quality places and successful, sustainable and socially inclusive communities where people want to live. It is likely that these will come into effect in the medium to longer term. It focuses on providing access to services in communities which helps to improve people's living environment. The vision does not specifically mention open space or green infrastructure however the promotion of high quality places and valued assets being safeguarded goes some way to ensuring that open spaces within communities are maintained. It is anticipated that the effect of the vision will be positive at both a local and regional scale when working cumulatively with access to the outdoors, open space and green networks policies contained within HwLDP.</p>	Review vision and spatial strategy during next review of CaSPlan	THC	2021

3	+/-	+/-	+/-	=	=	<p><b>Justification</b></p> <p>The vision makes no explicit mention of soil quality, geodiversity or improving contaminated land however it does promote high quality places. It is not anticipated that the vision would lead to a reduction in either soil quality or geodiversity protection or that it would not improve contaminated land. These issues are covered in detail by policies of the HwLDP and will be considered when allocating sites (and providing developer requirements) and determining planning applications on a case by case basis.</p>	Review vision and spatial strategy during next review of CaSPlan	THC	2021
4	+/-	+/-	+/-	+/-	+/-	<p><b>Justification</b></p> <p>The ambition for development and growing communities promoted through the vision, will lead to an increased demand for water and therefore water abstraction which will need to be carefully managed through regimes outwith the control of the planning system. Wider policies within the HwLDP will address this SEA objective and deliver the vision and it will be assessed on a settlement by settlement basis.</p>	Review vision and spatial strategy during next review of CaSPlan	THC	2021
5	+	+	++	+	+	<p><b>Justification</b></p> <p>The vision does not specifically mention climate change however it includes measures to facilitate the adaptation to it and avoid increasing the rate in which it is occurring. It promotes sustainable communities with convenient access to services, enhanced communications infrastructure and development encouraged at existing or planned provision. It is likely that this will contribute to a slight positive impact in the short to medium term with significant impact in the longer term. The vision makes provision for support of renewables related economic development which may have a slight positive impact on this SEA objective at a local and regional level. These issues are covered in detail by HwLDP policies and will be considerations in allocating sites and determining planning applications on a case by case basis.</p>	Review vision and spatial strategy during next review of CaSPlan	THC	2021
6	+/-	+/-	+/-	=	=	<p><b>Justification</b></p> <p>The vision is unlikely to have any impact on this SEA objective, HwLDP policies and Supplementary Guidance will deal with sustainable use of material assets and in particular waste management.</p>	Review vision and spatial strategy during next review of CaSPlan	THC	2021

7	+/-	+/-	+/-	+/-	+/-	<p><b>Justification</b>  The vision makes provision to celebrate the built and cultural environment and safeguard valued assets; however it does not specifically mention the enhancement of it. These sites will be safeguarded through HwLDP policy and other legislation. In some cases the re-use or enhancement of a historic building or development within the setting of a historic monument could have a negative impact.</p>	Review vision and spatial strategy during next review of CaSPlan	THC	2021
8	+	+	+	+	+	<p><b>Justification</b>  The vision through safeguarding valued assets, infers that landscape character, distinctiveness and unique qualities will be protected although there is no explicit mention of enhancement. However it is the policies of the HwLDP that will ensure that this is the case.</p>	Review vision and spatial strategy during next review of CaSPlan	THC	2021

**Commentary**

The vision is based on four outcomes linked to the Single Outcome Agreement 3. Economic development is a key element of the vision and whilst this is not a consideration of SEA, the vision sets out how economic growth in the area can be achieved with little impact on the environment. It is anticipated that the vision will have no/little negative impact on the environment but have significantly positive effects in terms of SEA Objective 5.

## Option 2 – An Alternative Vision - carry forward the existing HwLDP Vision for the Caithness and Sutherland area

**Assumptions made when assessing:** Any proposal which meets the outcomes of the vision will also be assessed against all relevant policies in HwLDP, Caithness and Sutherland LDP and Supplementary Guidance.

SEA Objective	Timescale			Magnitude		Justification and Assumptions	Mitigation		
	Short Term	Medium Term	Long Term	Local	Regional		Measure	Lead Authority	Proposed Timescale
1	+	+	+	+	+	<p><b>Justification</b> The vision promotes the protection and enhancement of habitats and species and recognises the benefits this brings to the area.</p>	Review vision and spatial strategy during next review of CaSPlan	THC	2021
2	+/-	+	+	+	=	<p><b>Justification</b> The vision does not specifically mention living environment or improved health of the human population; it does mention a high quality of life and a regenerating place which could go some way to helping achieve this SEA Objective in the medium or longer term.</p>	Review vision and spatial strategy during next review of CaSPlan	THC	2021
3	+/-	+/-	+/-	=	=	<p><b>Justification</b> The vision makes no explicit mention of soil quality or improving contaminated land however it does promote a high quality natural environment. It does promote the Sutherland Geo-park. It is anticipated that this will ensure a slight positive impact in the short, medium and long term for geodiversity but it is not anticipated that the vision would lead to a reduction in either soil quality or that it would not improve contaminated land. These issues are covered in detail by policies of the</p>	Review vision and spatial strategy during next review of CaSPlan	THC	2021

						HwLDP and will be considered when allocating sites (and providing developer requirements) and determining planning applications on a case by case basis.			
4	+/-	+/-	+/-	=	=	<p><b>Justification</b></p> <p>The vision makes no mention of managing and reducing flood risk or protecting the water environment however it does promote a high quality natural environment and adequate water and waste water networks. It is not anticipated that the vision would lead to increased flood risk or that it would not protect the water environment. These issues are covered in detail by policies of the HwLDP and will be considered when allocating sites and determining planning applications on a case by case basis.</p>	Review vision and spatial strategy during next review of CaSPlan	THC	2021
5	+	+	++	++	++	<p><b>Justification</b></p> <p>The vision does not make specific reference to climate change however it does mention promoting town centres as service centres, improved telecommunications and broadband coverage which would reduce the need to travel and increased passenger numbers on the far north railway line. It also promotes the area being an international centre of excellence for marine renewables. This will have a significant positive impact at both a local and regional scale. It is likely that each of these will have slight positive impact in the short to medium term but there is potential for significant positive impacts in the long term.</p>	Review vision and spatial strategy during next review of CaSPlan	THC	2021
6	+/-	+/-	+/-	=	=	<p><b>Justification</b></p> <p>The vision is unlikely to have any impact on this SEA objective, HwLDP policies and Supplementary Guidance will deal with sustainable use of material assets and in particular waste management.</p>	Review vision and spatial strategy during next review of CaSPlan	THC	2021
7	+/-	+/-	+/-	+/-	+/-	<p><b>Justification</b></p> <p>The vision makes provision to make the area a place of outstanding heritage. The historic environment is not explicitly mentioned; however the historic environment will be safeguarded through other policies of the HwLDP and other legislation. In some cases the re-use or enhancement of a historic building or development within the setting of a historic monument could have a negative impact.</p>	Review vision and spatial strategy during next review of CaSPlan	THC	2021

8	+	+	+	+	+	<b>Justification</b> The vision promotes a place of outstanding heritage and the use of this for a high quality tourist industry should mean that the qualities of the landscape and the will be protected and enhanced and visual impact of development minimised. The landscape will be safeguarded through other policies of the HwLDP.	Review vision and spatial strategy during next review of CaSPlan	THC	2021
---	---	---	---	---	---	---	--	-----	------

### Commentary

The vision sets out a comprehensive approach to ensuring the heritage of the area is safeguarded and, while not a consideration of SEA, demonstrates how economic growth of the area can be brought forward ensuring limited impact on the environment. It is anticipated that this vision would have little/no negative impacts on the environment but have significant positive effects in relation to SEA Objective 5.

## Growing Settlements Policy

### Option 1 – The Preferred Growing Settlements Policy

**Assumptions made when assessing:** All proposals will be assessed against all relevant policies in the HwLDP, Caithness and Sutherland LDP and Supplementary Guidance.

SEA Objective	Timescale			Magnitude		Justification and Assumptions	Mitigation		
	Short Term	Medium Term	Long Term	Local	Regional		Measure	Lead Authority	Proposed Timescale
1	+/-	+/-	+/-	+/-	+/-	<p><b>Justification</b></p> <p>The policy does not specifically make provision for the protection and enhancement of biodiversity, habitats or species. Therefore it is not anticipated that this policy would make a contribution towards achieving LBAP targets locally or regionally. General policies within HwLDP make provision for this. However it does include avoiding net loss of amenity/recreational areas and locally important heritage features, which could include areas with local biodiversity value.</p>	Review the policy approach of CaSPlan and HwLDP	THC	2021
2	+	++	++	++	=	<p><b>Justification</b></p> <p>The policy aims to help sustain facilities in settlements which could potentially mean that facilities stay within settlements. By encouraging development within active travel distance of facilities you are providing an opportunity for people to walk/cycle to facilities rather than dispersed growth which would encourage them to use private cars. The policy also aims to avoid a net loss of amenity/recreational areas or locally important heritage feature. By maintaining open space you are providing opportunities for people to improve/maintain their health. It is considered that this policy will have more of an impact at the local level as opposed to a regional level. It is</p>	Review the policy approach of CaSPlan and HwLDP	THC	2021

						anticipated that it would have a slight positive impact in the short term and a significant positive effect in the medium and longer term.			
3	=	=	=	=	=	<b>Justification</b> This policy does not address soil quality, geodiversity or contaminated land; these are dealt with via general policies in the HwLDP.	Review the policy approach of CaSPlan and HwLDP	THC	2021
4	+	+	+	+	+	<b>Justification</b> The policy approach considers the capacity of the water and sewerage networks ensuring that development supported by this policy will be supported by appropriate drainage infrastructure and where possible, improved infrastructure. This will help to ensure there is no detrimental impact on the water environment. The issue of flooding is not directly covered by this policy; this is dealt with via general policies in the HwLDP.	Review the policy approach of CaSPlan and HwLDP	THC	2021
5	+	++	++	++	+	<b>Justification</b> The issues of climate change and renewable energy are not directly addressed by this policy however the policy is encouraging growth in defined settlements. By encouraging development within active travel distance of facilities you are providing an opportunity for people to walk/cycle to facilities rather than dispersed growth which would encourage them to use private cars. This will have very localised impacts which may be significantly positive in the medium to long term.	Review the policy approach of CaSPlan and HwLDP	THC	2021
6	=	=	=	=	=	<b>Justification</b> The policy does not directly impact on this SEA objective.	Review the policy approach of CaSPlan and HwLDP	THC	2021
7	+/-	+/-	+/-	+/-	+/-	<b>Justification</b> The policy aims to ensure that no development would have an adverse impact on any locally important heritage feature; it does not specifically deal with enhancement. In some cases the re-use or enhancement of a historic building or development within the setting of a historic monument could have a negative impact. Taken in combination with the general policies of the HwLDP, this may have a positive impact at a local level.	Review the policy approach of CaSPlan and HwLDP	THC	2021

8	+	+	+	+	+	<p><b>Justification</b></p> <p>The policy considers how new developments would effect locally important heritage features such as important public viewpoints/vistas. The policy approach does not consider the regionally and nationally important landscape designations such as Special Landscape Areas or National Scenic Areas. This is dealt with via the general policies of the HwLDP. The policy does seek to support development which is similar in terms of spacing, character and density with a settlement; this should go some way in helping to ensure landscape character in maintained and visual impact of development minimised. In addition by the considerations set out in this policy the cumulative impact on the landscape of existing development and new development is taken into consideration.</p>	Review the policy approach of CaSPlan and HwLDP	THC	2021
---	---	---	---	---	---	---	---	-----	------

### Commentary

This policy approach is likely to have significant positive environmental effects on SEA Objectives 2 and 5. It is not anticipated that there will be any negative environmental effects from this policy approach.

## Option 2 – An Alternative approach – More rigid approach

**Assumptions made when assessing:** All proposals will be assessed against all relevant policies in the HwLDP, Caithness and Sutherland LDP and Supplementary Guidance.

SEA Objective	Timescale			Magnitude		Justification and Assumptions	Mitigation		
	Short Term	Medium Term	Long Term	Local	Regional		Measure	Lead Authority	Proposed Timescale
1	+/-	+/-	+/-	+/-	+/-	<p><b>Justification</b></p> <p>The policy does not specifically make provision for the protection and enhancement of biodiversity, habitats or species. --	--	--	--	--	--	-------	--	--

**Commentary**

This approach is not dissimilar to the preferred approach therefore the assessment results are the same. The exception is that because all criteria must be met then the likelihood of negative impacts is lessened. This policy approach is likely to have significant positive environmental effects on SEA Objectives 2 and 5. It is not anticipated that there will be any negative environmental effects from this policy approach.

### Option 3 – An Alternative approach – More flexible approach

**Assumptions made when assessing:** All proposals will be assessed against all relevant policies in the HwLDP, Caithness and Sutherland LDP and Supplementary Guidance.

SEA Objective	Timescale			Magnitude		Justification and Assumptions	Mitigation		
	Short Term	Medium Term	Long Term	Local	Regional		Measure	Lead Authority	Proposed Timescale
1	+/-	+/-	+/-	+/-	+/-	<p><b>Justification</b> The policy does not specifically make provision for the protection and enhancement of biodiversity, habitats or species. Therefore it is not anticipated that this policy would make a contribution towards achieving LBAP targets locally or regionally. General policies within HwLDP make provision for this. It does however include avoiding net loss of amenity/recreational areas and locally important heritage features, which could include areas with local biodiversity value. However while this may be the case, under this approach this criteria does not need to be met therefore it is unknown whether there would be positive or negative effects on this SEA Objective arising from development.</p>	Review the policy approach of CaSPlan and HwLDP	THC	2021

						short term and a significant positive effect in the medium and longer term. However while this may be the case, under this approach this criteria does not need to be met therefore it is unknown whether there would be positive or negatives effects on this SEA Objective arising from development.			
3	=	=	=	=	=	<b>Justification</b> This policy does not address soil quality, geodiversity or contaminated land; these are dealt with via general policies in the HwLDP.	Review the policy approach of CaSPlan and HwLDP	THC	2021
4	+/-	+/-	+/-	+/-	+/-	<b>Justification</b> The policy approach considers the capacity of the water and sewerage networks ensuring that development supported by this policy will be supported by appropriate drainage infrastructure and where possible, improved infrastructure. This will help to ensure there is no detrimental impact on the water environment. The issue of flooding is not directly covered by this policy; this is dealt with via general policies in the HwLDP. However while this may be the case, under this approach this criteria does not need to be met therefore it is unknown whether there would be positive or negatives effects on this SEA Objective arising from development.	Review the policy approach of CaSPlan and HwLDP	THC	2021
5	+/-	+/-	+/-	+/-	+/-	<b>Justification</b> The issues of climate change and renewable energy are not directly addressed by this policy however the policy is encouraging growth in defined settlements. By encouraging development within active travel distance of facilities you are providing an opportunity for people to walk/cycle to facilities rather than dispersed growth which would encourage them to use private cars. This will have very localised impacts which may be significantly positive in the medium to long term. However while this may be the case, under this approach this criteria does not need to be met therefore it is unknown whether there would be positive or negatives effects on this SEA Objective arising from development.	Review the policy approach of CaSPlan and HwLDP	THC	2021
6	=	=	=	=	=	<b>Justification</b> The policy does not directly impact on this SEA objective.	Review the policy approach of CaSPlan and HwLDP	THC	2021

7	+/-	+/-	+/-	+/-	+/-	<p><b>Justification</b>  The policy aims to ensure that no development would have an adverse impact on any locally important heritage feature; it does not specifically deal with enhancement. In some cases the re-use or enhancement of a historic building or development within the setting of a historic monument could have a negative impact. Taken in combination with the general policies of the HwLDP, this may have a positive impact at a local level. However while this may be the case, under this approach this criteria does not need to be met therefore it is unknown whether there would be positive or negatives effects on this SEA Objective arising from development.</p>	Review the policy approach of CaSPlan and HwLDP	THC	2021
8	+/-	+/-	+/-	+/-	+/-	<p><b>Justification</b>  The policy considers how new developments would effect locally important heritage features such as important public viewpoints/vistas. The policy approach does not consider the regionally and nationally important landscape designations such as Special Landscape Areas or National Scenic Areas. This is dealt with via the general policies of the HwLDP. The policy does seek to support development which is similar in terms of spacing, character and density with a settlement; this should go some way in helping to ensure landscape character in maintained and visual impact of development minimised. In addition by the considerations set out in this policy the cumulative impact on the landscape of existing development and new development is taken into consideration. However while this may be the case, under this approach this criteria does not need to be met therefore it is unknown whether there would be positive or negatives effects on this SEA Objective arising from development.</p>	Review the policy approach of CaSPlan and HwLDP	THC	2021

**Commentary**

It is not anticipated there will be any negative or significantly negative effects arising from this policy approach. However given that this alternative approach means only some of the criteria need to be met then it is not possible to determine whether there would be positive or negative effects from the policy.

## Proposed Policy - Promoting And Protecting Settlement Centres

### Option 1 - Preferred Policy Approach

**Assumptions made when assessing:** All proposals will be assessed against all relevant policies in the HwLDP, Caithness and Sutherland LDP and Supplementary Guidance.

SEA Objective	Timescale			Magnitude		Justification	Mitigation		
	Short Term	Medium Term	Long Term	Local	Regional		Measure	Lead Authority	Proposed Timescale
1	=	=	=	=	=	<p><b>Justification</b></p> <p>It is not considered that this policy will have an impact on the SEA Objective as the policy is solely concerned with directing growth to town centres.</p>	Review the policy approach through CaSPlan	THC	2021
2	+	+	+	+	=	<p><b>Justification</b></p> <p>By directing development to town centres, services that people need will be available in a location which is accessible and it may encourage people to walk to the facility rather than use private transport. It is likely that this policy will have a slight positive impact at a local level but it is unlikely to have any impact on a regional level as the impact will be on a settlement by settlement basis.</p>	Review the policy approach through CaSPlan	THC	2021
3	+	+	+	+	+	<p><b>Justification</b></p> <p>It is not likely that this policy will have a direct impact on geodiversity. However by encouraging re-use and redevelopment of existing sites and buildings there could be a positive impact on the improvement of contaminated land and it will have an indirect positive impact on soil quality as it is encouraging development of brownfield sites rather than the use of greenfield sites.</p>	Review the policy approach through CaSPlan	THC	2021

4	=	=	=	=	=	<b>Justification</b> It is not considered that this policy will have an effect on the SEA Objective as the policy is solely concerned about directing growth to town centres.	Review the policy approach through CaSPlan	THC	2021
5	+	+	+	+	=	<b>Justification</b> By encouraging development to town centres there would be opportunity to have development in the most accessible locations by public transport, walking and cycling which would help to reduce the need to travel by private car. It is likely that this policy will have a slight positive impact at a local level but it is unlikely to have any impact on a regional level as the impact will be on a settlement by settlement basis.	Review the policy approach through CaSPlan	THC	2021
6	+	+	+	++	+	<b>Justification</b> This policy encourages the re-use and redevelopment of existing sites and buildings in town centres. Coupled with policies in HwLDP, This will have a significant positive impact on a local scale as it encourages the re-use of vacant buildings.	Review the policy approach through CaSPlan	THC	2021
7	+/-	+/-	+/-	+/-	+/-	<b>Justification</b> This policy may have a positive impact on this SEA Objective. The re-use of historic buildings in town centres may have a positive impact if it is done correctly and sympathetically.	Review the policy approach through CaSPlan	THC	2021
8	=	=	=	=	=	<b>Justification</b> It is not considered that this policy will have an impact on the SEA Objective as the policy is solely concerned with directing growth to town centres.	Review the policy approach through CaSPlan	THC	2021

### Commentary

This policy is likely to have some positive environmental effects but have significant positive effects in relation to SEA Objective 6. Due to the nature of the policy there are many SEA Objectives where there will be little or no impacts. However the application of this policy in combination with the general policies of the Highland wide Local Development Plan, it is likely that the overall effect would be positive.

## Option 2 - More Flexible Approach

**Assumptions made when assessing:** All proposals will be assessed against all relevant policies in the HwLDP, Caithness and Sutherland LDP and Supplementary Guidance.

SEA Objective	Timescale			Magnitude		Justification and Assumptions	Mitigation		
	Short Term	Medium Term	Long Term	Local	Regional		Measure	Lead Authority	Proposed Timescale
1	=	=	=	=	=	<p><b>Justification</b> It is not considered that this policy approach will have an impact on the SEA Objective as the policy is solely concerned with directing growth to town centres.</p>	Review the policy approach through CaSPlan	THC	2021
2	+	+	+	+	=	<p><b>Justification</b> It is anticipated that this approach will have a positive effect on this SEA Objective in the short, medium and long term due to the sequential approach to site location set out in Policy 40 of the HwLDP which primarily directs retail development to city/town/village centres. This should provide better opportunities for active travel to these facilities which may lead to a healthier lifestyle for the human population. The positive effect will be at local level.</p>	Review the policy approach through CaSPlan	THC	2021
3	+	+	+	+	+	<p><b>Justification</b> It is anticipated that continuing to rely on HwLDP general policies will have a positive effect on this SEA Objective in the short, medium and long term by encouraging new retail development towards existing centres, which may mean re-use of brownfield land rather than greenfield land.</p>	Review the policy approach through CaSPlan	THC	2021
4	=	=	=	=	=	<p><b>Justification</b> It is not considered that this approach would have any effect on this SEA Objective as it is solely concerned with directing retail development towards town/village centre locations.</p>	Review the policy approach through CaSPlan	THC	2021
5	+	+	+	+	=	<p><b>Justification</b> This approach encourages retail development towards</p>	Review the policy approach through	THC	2021

						town/village centres where the opportunity to use public transport is generally improved and it is likely that the location will promote active travel. It is likely that this will have an impact at a local level, but not a regional level as the impact will be on a settlement by settlement basis.	CaSPlan		
6	+/-	+/-	+/-	+/-	+/-	<b>Justification</b> It is unlikely that this approach will have any direct effect on the SEA Objective. However proposals for new retail development will be expected to make a contribution towards the provision of appropriate waste management.	Review the policy approach through CaSPlan	THC	2021
7	+/-	+/-	+/-	+/-	+/-	<b>Justification</b> It is unlikely that this approach will have a direct effect on this SEA Objective.	Review the policy approach through CaSPlan	THC	2021
8	=	=	=	=	=	<b>Justification</b> It is not considered that this approach would have an effect on the SEA Objective.	Review the policy approach through CaSPlan	THC	2021

### Commentary

This approach means there is no additional policy in CaSPlan, with a continuing reliance on using the general policies of the HwLDP, particularly Policy 40. It is anticipated that the approach will have a positive effect on SEA Objectives 2, 3 and 5. This is mainly due to the approach directing new retail development towards town/village centres.

## Option 3 – More Rigid Approach

**Assumptions made when assessing:** All proposals will be assessed against all relevant policies in the HwLDP, Caithness and Sutherland LDP and Supplementary Guidance.

SEA Objective	Timescale			Magnitude		Justification and Assumptions	Mitigation		
	Short Term	Medium Term	Long Term	Local	Regional		Measure	Lead Authority	Proposed Timescale
1	=	=	=	=	=	<p><b>Justification</b> It is not considered that this policy will have an impact on the SEA Objective as the policy is solely concerned with directing growth to town centres.</p>	Review the policy approach through CaSPlan	THC	2021
2	+	+	+	+	-	<p><b>Justification</b> By directing development to town centres, services that people need will be available in a location which is accessible and it may encourage people to walk to the facility rather than use private transport. It is likely that this policy will have a slight positive impact at a local level but it is unlikely to have any impact on a regional level as the impact will be on a settlement by settlement basis.</p>	Review the policy approach through CaSPlan	THC	2021
3	+	+	+	+	+	<p><b>Justification</b> It is not likely that this policy will have a direct impact on geodiversity. However by encouraging re-use and redevelopment of existing sites and buildings there could be a positive impact on the improvement of contaminated land and it will have an indirect positive impact on soil quality as it is encouraging development of brownfield sites rather than the use of greenfield sites.</p>	Review the policy approach through CaSPlan	THC	2021

Review the policy approach through CaSPlan	THC	2021
6	+	+	+	++	+	<b>Justification</b> This policy encourages the re-use and redevelopment of existing sites and buildings in town centres. Coupled with policies in HwLDP, This will have a significant positive impact on a local scale as it encourages the re-use of vacant buildings.	Review the policy approach through CaSPlan	THC	2021
7	+/-	+/-	+/-	+/-	+/-	<b>Justification</b> This policy may have a positive impact on this SEA Objective. The re-use of historic buildings in town centres may have a positive impact if it is done correctly and sympathetically.	Review the policy approach through CaSPlan	THC	2021
8	=	=	=	=	=	<b>Justification</b> It is not considered that this policy will have an impact on the SEA Objective as the policy is solely concerned with directing growth to town centres.	Review the policy approach through CaSPlan	THC	2021

### Commentary

This approach is similar to the preferred approach except that it would apply to all settlements in the plan area and not just the ones listed in the preferred approach. Therefore the assessment results are the same. This policy is likely to have some positive environmental effects but have significant positive effects in relation to SEA Objective 6. Due to the nature of the policy there are many SEA Objectives where there will be little or no impacts. However the application of this policy in combination with the general policies of the Highland wide Local Development Plan, it is likely that the overall effect would be positive.

## Special Landscape Areas

### Option 1 – The Preferred approach – Examine all SLA boundaries and make amendments as appropriate

**Assumptions made when assessing:** All proposals will be assessed against all relevant policies in the HwLDP, Caithness and Sutherland LDP and Supplementary Guidance.

SEA Objective	Timescale			Magnitude		Justification and Assumptions	Mitigation		
	Short Term	Medium Term	Long Term	Local	Regional		Measure	Lead Authority	Proposed Timescale
1	=	=	=	=	=	<p><b>Justification</b> It is unlikely that the SLA boundary will have any effect on this SEA objective as it is dependant on the application of policy within the area. The policy approach which will be taken with regard to development within SLAs has been subject to SEA via the Highland wide LDP.</p>	Review the boundaries and the related policy approaches of HwLDP	THC	HwLDP review to commence 2015
2	=	=	=	=	=	<p><b>Justification</b> It is unlikely that the SLA boundary will have any effect on this SEA objective as it is dependant on the application of policy within the area. 7	=	=	=	=	=	<b>Justification</b> It is unlikely that the SLA boundary will have any effect on this SEA objective as it is dependant on the application of policy within the area. The policy approach which will be taken with regard to development within SLAs has been subject to SEA via the Highland wide LDP.	Review the boundaries and the related policy approaches of HwLDP	THC	HwLDP review to commence 2015
8	+	+	+	+	+	<b>Justification</b> It is unlikely that the SLA boundary will have any effect on this SEA objective as it is dependant on the application of policy within the area. The policy approach which will be taken with regard to development within SLAs has been subject to SEA via the Highland wide LDP. The preferred approach will lead to suitable expansion of the SLAs in line with a sound methodology as se out in the SLA Citations. This will help to have a robust SLA boundary to support the policy approach and in turn will help to afford greater protection to the regionally important landscape characters and qualities for which these areas are designated.	Review the boundaries and the related policy approaches of HwLDP	THC	HwLDP review to commence 2015

## Commentary

It is unlikely that this approach will have an effect on any of the SEA Objectives other than the one related to landscape character and qualities where there may be a minimal positive effect at a local and regional scale as the protective policy approach from the Highland wide Local Development Plan will be applied to a wider area.

## Option 2 – An alternative - Carry forward all the SLAs unchanged from the HwLDP

**Assumptions made when assessing:** All proposals will be assessed against all relevant policies in the HwLDP, Caithness and Sutherland LDP and Supplementary Guidance.

SEA Objective	Timescale			Magnitude		Justification and Assumptions	Mitigation		
	Short Term	Medium Term	Long Term	Local	Regional		Measure	Lead Authority	Proposed Timescale

### Commentary

It is unlikely that this approach will have an effect on any of the SEA Objectives as there will be no changes to any of the boundaries. The protective policy approach from the Highland wide Local Development Plan will be applied to the same area as present.

# Appendix 5 – Cumulative Assessment of the Caithness and Sutherland Local Development Plan

## Contents

Cumulative Assessment 1 – High level of development (100% of all allocated sites will be built out).....

Cumulative Assessment 2 – medium level of development (60% of all allocated sites will be built out).....

Cumulative Assessment 3 – low level of development (30% of all allocated sites will be built out) .....

## Cumulative Assessment 1 – High level of development (100% of all preferred development sites built out)

**Assumptions made when assessing:** Compliance with one part of the plan does not mean that a proposal accords with the whole development plan. Any proposal which meets the outcomes of the vision will also be assessed against all relevant policies in the HwLDP, Caithness and Sutherland LDP and Supplementary Guidance.

SEA Objective	Timescale			Magnitude		Justification and Assumptions	Mitigation		
	Short Term	Medium Term	Long Term	Local	Regional		Measure	Lead Authority	Proposed Timescale
1	+/-	+/-	+/-	+/-	+/-	<p><b>Justification</b> The vision indirectly seeks to protect biodiversity. By considering each site in turn including appropriate mitigation there will be opportunity to avoid a detrimental effect on protected species and habitats however this will vary across the area and will be different for each site. The majority of sites have avoided any statutory designations however there may be an effect from certain sites either alone or in combination with other sites and existing developments – this will be addressed through the Habitats Regulations Appraisal of the CaSPlan.</p>	Review vision/spatial strategy, general policies and allocations.	THC	
2	+/-	+	+	+	+	<p><b>Justification</b> Development at this scale is most likely to have a positive effect on the living environment of communities and human health as new developments can provide local services and facilitate community wellbeing. Open space provision may be negatively effected by development at this scale in the short term but in the longer term it would have a positive effect as new development will need to be delivered in line with the open space supplementary guidance. Development at this scale will enable wide scale enhancement of the green network.</p>	Review vision/spatial strategy, general policies and allocations.	THC	
3	+/-	+/-	+/-	+/-	+/-	<p><b>Justification</b> This level of development will include the re-use of a</p>	Review vision/spatial	THC	

						significant amount of brownfield land; however it may also lead to soil sealing and impacts on areas of importance for geodiversity. These issues will be dealt with on a site by site basis and mitigation will be brought forward through the proposed plan.	strategy, general policies and allocations.		
4	+/-	+/-	+/-	+/-	+/-	<p><b>Justification</b></p> <p>All development must connect to the public sewer if it is within a settlement development area. Where allocations are adjacent to or contain a water course, mitigation will be provided on a site by site basis in the Proposed Plan. All sites will be required to enhance natural drainage and provide SuDS through the general policy approaches set out in the HwLDP. In most cases sites at risk of flooding have not been preferred for development. Adequate mitigation will be required on a site by site basis related to flood risk and given the scale of development under consideration in this option it is likely that there will be a level of sites which may be at risk of flooding across the area.</p>	Review vision/spatial strategy, general policies and allocations.	THC	
5	+	+	+	+	+	<p><b>Justification</b></p> <p>Some sites in the plan will facilitate growth of the renewable energy sector and as such will help to increase the proportion of energy from renewable resources across the plan area and beyond. With the level of development considered here it is likely that there will be a number of opportunities to reduce the need to travel through the delivery of new development which is likely to lead to a larger number of local services such as shops and businesses.</p>	Review vision/spatial strategy, general policies and allocations.	THC	
6	+/-	+/-	+/-	+/-	+/-	<p><b>Justification</b></p> <p>More development will lead to more people which will in turn lead to more waste. There will be opportunities to reduce waste in developments but these will vary with each different type of site and the scale/location of the site.</p>	Review vision/spatial strategy, general policies and allocations.	THC	
7	+/-	+/-	+/-	+/-	+/-	<p><b>Justification</b></p> <p>The plan with this level of development is likely to have both positive and negative effects on the historic environment however these are expected to be at a very local scale – mitigation for the negative effects has been identified through individual site assessments and appropriate developer</p>	Review vision/spatial strategy, general policies and allocations.	THC	

						requirements will be included on a site by site basis in the Proposed Plan.			
8	+/-	+/-	+/-	+/-	+/-	<p><b>Justification</b></p> <p>The level of development proposed is likely to have an impact on the character, diversity and unique qualities of the landscape. It has the potential to fundamentally change the landscape, sometimes creating new areas of local distinctiveness but other times it will alter the local distinctiveness. It also has the potential to have a lasting impact on the landscape character of the area as any scale of development would. The plan seeks through application of the HwLDP general policies to protect local distinctiveness by good siting and design of development, minimise the visual impact, maintain and enhance scenic value and limit the cumulative effect on landscape character. While the level of development proposed is large, it is unlikely that there will be an effect on wildness qualities as the preferred sites are all within settlements that have SDAs and they tend not to be close to wild land areas.</p>	Review vision/spatial strategy, general policies and allocations.	THC	

### Commentary

It is anticipated that by considering the vision/spatial strategy along side the general policy approach and all of the preferred sites being built out, there will be some positive effects on the environment in terms of delivery of green infrastructure and reducing the need to travel. However there may also be negative effects in relation to landscape impact but this could be mitigated on a site by site basis.

## Cumulative Assessment 2 – Medium level of development (60% of all preferred development sites built out)

**Assumptions made when assessing:** Compliance with one part of the plan does not mean that a proposal accords with the whole development plan. Any proposal which meets the outcomes of the vision will also be assessed against all relevant policies in the HwLDP, Caithness and Sutherland LDP and Supplementary Guidance.

SEA Objective	Timescale			Magnitude		Justification and Assumptions	Mitigation		
	Short Term	Medium Term	Long Term	Local	Regional		Measure	Lead Authority	Proposed Timescale

It has the potential to fundamentally change the landscape, sometimes creating new areas of local distinctiveness but other times it will alter the local distinctiveness. It also has the potential to have a lasting impact on the landscape character of the area as any scale of development would. The plan seeks through application of the HwLDP general policies to protect local distinctiveness by good siting and design of development, minimise the visual impact, maintain and enhance scenic value and limit the cumulative effect on landscape character. While the level of development proposed is at a medium scale, it is unlikely that there will be an effect on wildness qualities as the preferred sites are all within settlements that have SDAs and they tend not to be close to wild land areas.</p>	Review vision/spatial strategy, general policies and allocations.	THC	

### Commentary

It is anticipated that by considering the vision/spatial strategy along side the general policy approach and a medium level of development of the preferred sites, there will be some positive effects on the environment in terms of delivery of green infrastructure and reducing the need to travel. However there may also be negative effects in relation to landscape impact but this could be mitigated on a site by site basis. These positive and negative effects may not be as significant given the lower level of development which may come forward.

### Cumulative Assessment 3 – Low level of development (30% of all preferred development sites built out)

**Assumptions made when assessing:** Compliance with one part of the plan does not mean that a proposal accords with the whole development plan. Any proposal which meets the outcomes of the vision will also be assessed against all relevant policies in the HwLDP, Caithness and Sutherland LDP and Supplementary Guidance.

SEA Objective	Timescale			Magnitude		Justification and Assumptions	Mitigation		
	Short Term	Medium Term	Long Term	Local	Regional		Measure	Lead Authority	Proposed Timescale
1	+/-	+/-	+/-	+/-	+/-	<p><b>Justification</b> The vision indirectly seeks to protect biodiversity. By considering each site in turn including appropriate mitigation there will be opportunity to avoid a detrimental effect on protected species and habitats however this will vary across the area and will be different for each site. The majority of sites have avoided any statutory designations however there may be an effect from certain sites either alone or in combination with other sites and existing developments – this will be addressed through the Habitats Regulations Appraisal of the CaSPlan.</p>	Review vision/spatial strategy, general policies and allocations.	THC	
2	+/-	+/-	+	+	+/-	<p><b>Justification</b> Development at this scale is most likely to have a positive effect on the living environment of communities and human health as new developments can provide local services and facilitate community wellbeing. However at this low level of development the effects would be limited to local areas in the longer term as at a regional scale there would not be the level of development which would warrant the delivery of significant new facilities in the short to medium term. Open space provision may be negatively effected by development at this scale in the short term but in the longer term it would have a</p>	Review vision/spatial strategy, general policies and allocations.	THC	

						positive effect as new development will need to be delivered in line with the open space supplementary guidance. It is likely that this level of development may lead to some development on open spaces which would not be offset by significant areas of new open space. There is likely to be more of a focus on enhancing provision of existing spaces. Development at this scale will enable only limited opportunities for enhancement of the green network.			
3	+/-	+/-	+/-	+/-	+/-	<p><b>Justification</b></p> <p>This level of development will include potential for some re-use of brownfield land; however without a sequential approach stating that brownfield land must be developed first, it is likely that with a low level of development there will be limited re-use of brownfield land. There should however be a reduced impact from soil sealing and on areas of importance for geodiversity. These issues will be dealt with on a site by site basis and mitigation will be brought forward through the proposed plan.</p>	Review vision/spatial strategy, general policies and allocations.	THC	
4	+/-	+/-	+/-	+/-	+/-	<p><b>Justification</b></p> <p>All development must connect to the public sewer if it is within a settlement development area. Where allocations are adjacent to or contain a water course, mitigation will be provided on a site by site basis in the Proposed Plan. All sites will be required to enhance natural drainage and provide SuDS through the general policy approaches set out in the HwLDP. In most cases sites at risk of flooding have not been preferred for development. Adequate mitigation will be required on a site by site basis related to flood risk and given the scale of development under consideration in this option it is likely that there will be a level of sites which may be at risk of flooding across the area.</p>	Review vision/spatial strategy, general policies and allocations.	THC	
5	+	+	+	+	+	<p><b>Justification</b></p> <p>Some sites in the plan will facilitate growth of the renewable energy sector and as such will help to increase the proportion of energy from renewable resources across the plan area and beyond. There will be limited opportunities to reduce the need to travel through the delivery of new development which is unlikely to lead to delivery of a larger number of local services such as shops and businesses. With only a low level of</p>	Review vision/spatial strategy, general policies and allocations.	THC	

						development there will be limited opportunity to reduce travel.			
6	+/-	+/-	+/-	+/-	+/-	<p><b>Justification</b></p> <p>More development will lead to more people which will in turn lead to more waste. There will be opportunities to reduce waste in developments but these will vary with each different type of site and the scale/location of the site; However given the low level scale of development this would be limited.</p>	Review vision/spatial strategy, general policies and allocations.	THC	
7	+/-	+/-	+/-	+/-	+/-	<p><b>Justification</b></p> <p>The plan with this level of development is likely to have both positive and negative effects on the historic environment however these are expected to be at a very local scale – mitigation for the negative effects has been identified through individual site assessments and appropriate developer requirements will be included on a site by site basis in the Proposed Plan.</p>	Review vision/spatial strategy, general policies and allocations.	THC	
8	+/-	+/-	+/-	+/-	+/-	<p><b>Justification</b></p> <p>The level of development proposed is likely to have an impact on the character, diversity and unique qualities of the landscape. It has the potential to fundamentally change the landscape, sometimes creating new areas of local distinctiveness but other times it will alter the local distinctiveness. It also has the potential to have a lasting impact on the landscape character of the area as any scale of development would. The plan seeks through application of the HwLDP general policies to protect local distinctiveness by good siting and design of development, minimise the visual impact, maintain and enhance scenic value and limit the cumulative effect on landscape character. While the level of development proposed is at a low level scale, it is unlikely that there will be an effect on wildness qualities as the preferred sites are all within settlements that have SDAs and they tend not to be close to wild land areas.</p>	Review vision/spatial strategy, general policies and allocations.	THC	

### Commentary

It is anticipated that by considering the vision/spatial strategy along side the general policy approach and a low level of development of the preferred sites, there will be some positive effects on the environment in terms of delivery of green infrastructure and reducing the need to travel. However there may also be

negative effects in relation to landscape impact but this could be mitigated on a site by site basis. These positive and negative effects may not be as significant given the lower level of development which may come forward.

<b>Preferred for development: Non-preferred</b>	<b>Preferred uses: N/A</b>	

WATER/DRAINAGE CONSTRAINTS				
	Pre-Mitigation score	Comments	Mitigation	Post Mitigation Score

1a	- Development would have a minor negative impact one or more water bodies identified in RBMP.	There are a number of small water courses flowing through the site into the sea (passing through a SPA, SAC and SSSI). The site also bounds the sea to the south.	Appropriate development setbacks, connection to public sewer required.	0 Development is unlikely to have any significant effects on any water bodies or water supply source
1b	- Development would have a localised minor negative impact on the water environment and/or medium term which would be difficult to mitigate	Development of the whole site would result in some impact on the physical water environment.	Reduction in the size of the allocation and make water bodies a positive part of the development-riparian buffering, appropriate surface water drainage.	0 Development is unlikely to have any significant effects on any water bodies or water supply source
1c	x Not Applicable	No water supply noted within 250m of site		x Not Applicable

--	----------------------	----------	------------	-----------------------

5a	- development of site would have a minor negative effect on the integrity of a national, local nature conservation designation or Geodiversity site or the qualities for which it has been designated	No formal designations apply. Connectivity to wildlife appears to be limited across the site.	All redevelopment proposals will require to be accompanied by the relevant biodiversity studies and assessments.	0 Unlikely to be any impact on national or local conservation (including Geodiversity) sites due to nature or scale of proposal
5b	- development of the site would have a minor negative effect on a Natura 2000 site	Southern area of town centre is adjacent to River Thurso SAC.	Any redevelopment of these sites should safeguard water quality from pollution and runoff, also potential effect on salmon from vibration during construction works, plus wastewater connection to public sewer.	0 Unlikely to be any impact on national or local conservation (including Geodiversity) sites due to nature or scale of proposal
5c	- development of site would have a minor negative effect on the integrity of a national, local nature conservation designation or Geodiversity site or the qualities for which it has been designated	Town centre is adjacent to Pennylands and River Thurso SSSI	Appropriate measures to control runoff / discharge of contaminants during and after development.	0 Unlikely to be any impact on national or local conservation (including Geodiversity) sites due to nature or scale of proposal
5d	0 Unlikely to be any impact on national or local conservation (including Geodiversity) sites due to nature or scale of proposal	Town centre has very limited natural habitat.	Potential to provide new greenspace increasing wildlife connectivity. Thurso Charrette highlighted environmental improvements including a riverside ecological park connected to the centre.	+ Proposal will protect Ancient Inventoried woodland
5e	?? Unknown	River Thurso adjacent to town centre may contain otters. Town centre trees and buildings may contain bats.	Protected species survey may be required for future development.	0 Unlikely to be any impact on protected species
5f	X N/A no designations apply			X N/A no designations apply

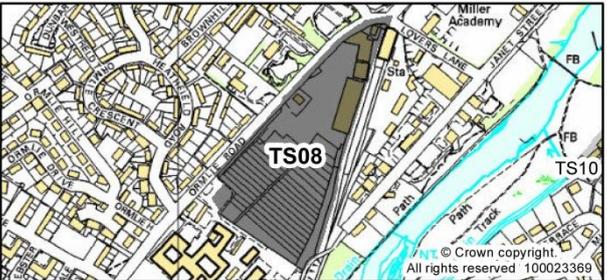

5g	0 Unlikely to be any impact on national or local conservation (including Geodiversity) sites due to nature or scale of proposal	Connectivity to wildlife appears to be limited across the site.	Potential to provide new greenspace increasing wildlife connectivity. Thurso Charrette highlighted environmental improvements including a riverside ecological park connected to the centre.	++ Proposal will improve connectivity between local, national conservation or geodiversity sites
