

Dear Pablo Mascarenhas,

This is in objection to the planning request made by **Applecross community company** for the ownership of Applecross car park, IV54 8LR (not IV54 8LT as in planning letter).

Applecross is so busy now with the North coast 500 , we are struggling for parking spaces as it is, Shore street is already congested and some days even blocked to the extent vehicles are unable to get through.

To take away 14 parking spaces would be a total shambles ,and to build what is being asked for would be ridiculous ,where are people expected to park if this

is taken away ?

If this should go ahead shore street will be blocked permanently, how can the other seven villages south of shore street expect to travel through, and what about emergency vehicles travelling in and out, are they expected to wait till the

Road is clear ?

As a local counsellor having suffered 3 TLA s in the last 4 years this makes me very concerned that should this go ahead the danger people could be in.

This matter should be considered very carefully and not put people in danger.

Your sincerely
