Subject: toilets at Applecross

[REDACTED]

Here in Argyll toilets are being shut because we can't get cleaners. Also, if we drive too Glasgow in the winter all the toilets are shut for the season. Applecross as far more camper vans and mobile homes than we do and really need the facilities. Showers, waste disposal, and toilets would be so useful, and might encourage visitors to stay longer. Please add my name to the list of supporters for this proposal.

Thank you

Ali Floyd

Subject: Applecross

I have seen the proposals regarding the public toilet block and garden at Applecross. As a tourist, I think this can only be a positive move forward.

I have visited the area a few times, before the launch of the NC500 and since. Creating facilities that can benefit tourists and the local community should be heartily encouraged.

I hope you will take my comments in the positive way they are meant.

Kindest regards

Kay Rowntree

Subject: Facilities for Motorhomes

[REDACTED]

I think this is a great idea to supply facilities for MH to empty their chemical toilets.
There are more and more people using campers and MH and need this type of thing.

Good work, well done

Subject: Applecross camper facilities

Hi I have just read about the plans to introduce facilities for water and water at Applecross I can only applaud you for this forward thinking.

We have been touring Scotland for 3 years in our campervan at every opportunity, and have seen a massive increase in the number of Van's on the road, this has obviously led to problems with waste disposal, we have experienced difficulties trying to find places that will allow us to empty our cassette, even camp sites turn us away (we do not expect this service for free).

I hope you charge a decent fee to cover your costs and hopefully make a profit too, I wish there were more positive thinking regarding this service.

This can only reap benefits for all and I hope you can spread the word as to how beneficial this is for tourism, we personally dislike campsites and have no problem with paying for parking in offsite areas, maybe follow the route of "aires" in Europe, this way parking is controlled and Van's can be welcomed instead of being seen as problems.

Thank you again on behalf of all campervan owners.

Ps Applecross is my favourite place in Scotland but sadly the campsite has declined over the years and I have refused to use it due to owners arrogance and disregard for tourists, hopefully this will mean I will return to spend my money again.

Regards

Drew.

Subject: Applecross Car Park

Good evening,

I saw your notices up on the toilet block in the Shore Road car park, Applecross.

Can I just say what a good idea I think it is to include a waste disposal point for motor homes.

We have a house in the area and have seen a huge increase in the number of motorhomes and other traffic since the NC500 Route was launched.

I am aware that a number of motorhomers, who do not necessarily want to use a campsite, are turned away from some sites when requesting to pay to use their waste disposal facilities.

This proposal seems forward thinking and to be applauded. Let's hope other community groups follow the lead of Applecross and start to put in the infrastructure to cater for the increase in tourism,

Kind regards

Liz Bowyer, [REDACTED]

Subject: Toilet revamp.

Hi, great idea to provide a waste disposal point in the toilet revamp at Applecross. In France they also provide a water fill up for 2 Euros might be an idea for you to ponder.

Regards
Joe Morris
