

Appraisal of Active Travel - other Inner Moray Firth settlements

For smaller settlements in the Inner Moray Firth area, where a need for a mapped indicative Active Travel Network was identified, an exercise was undertaken by each Planner responsible for settlements to identify the relevant destinations within a settlement.

The key active travel connections between these destinations and the other places with the town or village (such as neighbourhoods; other destinations etc.) were then identified and maps prepared.

The maps that follow show the destinations and priority active travel network between them that are considered to be the routes where future active travel interventions should be prioritised.

This appraisal and information were used to inform the Active Travel Networks for the settlements shown in the Inner Moray Firth Proposed Local Development Plan.
