Settlement Assessment

Quantity

There is significant open space provision in Brora, in a range of different types. There is no provision of natural greenspace, other functional greenspace (allotments) or public parks and gardens. However, while the addressing these deficiencies is important many of the existing spaces in Brora are multifunctional and as such the recreation grounds, for example, could also be used as a public park and garden. As this is the case the focus should be on ensuring quality of these multifunctional spaces.

Accessibility

The majority of open spaces are accessible to all residences within the village, however in some areas at the edge of the settlement there is poor access to amenity green space. This is also the case for provision for children and teenagers.
