## Settlement Assessment

### **Quantity**

As with many of the more rural communities in Highland there is a deficiency in certain types of open space however this needs to be balanced with the significant opportunities for access to the wider countryside. The provision which is available within the settlement provide some of the more formalised types of open space, and can also be classed as multifunctional.

### **Accessibility**

All dwellings within Durness have access to the open space within the settlement. The core path and wider access network in and around Durness provide access to more informal recreation in the wider countryside.
