## Settlement Assessment

### **Quantity**

There is a deficiency in open space compared with the provision standard of 40m<sup>2</sup> per person. Of the open space which is available there is a good mix of outdoor sports facilities, provision for children and teenagers, and amenity greenspace. The provision is equally distributed around the north and south of the settlement however it is limited around the centre and the harbour area.

### **Accessibility**

There is reasonable access to open spaces in Mallaig and most people have access to more than one type of open space within reasonable travel distance of their home by active travel. However there are areas of the settlement which have some distance to travel to access the outdoor sports facilities. It is important to note that through the core path network there are good links to the wider countryside for opportunities of physical activity and recreation.
