Settlement Assessment

Quantity

While there is seemingly an over provision of open space in Muir of Ord, based on the provision standards used in this audit. However it can be seen that there is a deficiency in certain types of open space namely natural/semi-natural green spaces, public parks and gardens and other functional greenspace. If new development occurs in Muir of Ord it may be appropriate to direct developers to address these deficiencies through design of their sites.

Accessibility

As previously mentioned, there are a number of types of open space not present in Muir of Ord. Of those that are present there is currently good accessibility in most of the residential areas of the settlement.
