

Reduce Water Waste

Lùghdaich Caitheamh Uisge

 We each use 150 litres of water every day. A third of this is wasted!

 One dripping tap wastes at least 5,500 litres a year, enough to fill 15 paddling pools.

There's life in every drop

Top Tips

- Report dripping taps and leaking pipes
- Turn the tap off when washing your hands
- Use a basin and turn the tap off when washing dishes and food
- Only fill the kettle with as much water as you need
- Visit www.highland.gov.uk/waterminimisation

Save water, Save energy, Save money!
