Position in Settlement Hierarchy	Main Centre
2005 Estimated Population	1418
Housing Completions 2000-2007	13
Primary School Capacity/Secondary	63% / 47%
School Capacity (roll/physical capacity)	
Water Capacity	Capacity
Sewerage Capacity	Limited capacity

Golspie is the largest settlement within Sutherland and is situated on the east coast located under the shadow of Ben Bhraggie. This historic core of Golspie may merit formal Conservation Area status. The population of the settlement has remained fairly static over the past 20 years. The settlement plays an important role providing service and a variety and mix of retail uses to a large part of Sutherland.

Golspie originated as a small fishing village on the main road north, situated midway between Loch Fleet and Brora, expanded in the early nineteenth century to house those evicted during the Clearances from the straths and glens of Sutherland. The arrival of the railway in 1868 brought tourists and as a result further development. There are a number of historic buildings in the village, notably St Andrew's Church which dates from the early eighteenth century but which is built on the site of the medieval chapel of St Andrew.

### Prospects

Recent housing development has been limited to smaller allocated sites within the settlement supplemented with piecemeal development in the wider countryside. The defined Golspie settlement provides effective development allocations that can provide for the longer term development of the settlement in a sustainable way. Pressure for development within the settlement setting of Golspie will only be considered appropriate where this can be supported in terms of appropriate provision of infrastructure and in terms of wider policy considerations. However, larger scale proposals which will serve the medium to longer term needs of the community are moving forward. Development at Drummule is at an early stage, it will offer a variety of housing types and choices. Proposals are also progressing at Sibell Road offering further choice of available housing. There will be a need to monitor the levels of development to ensure that growth is maintained at a sustainable level.

As well as promoting and supporting the planned development of housing there is a need to assist and promote economic development within the settlement. Existing opportunities for economic development relate to the Golspie Industrial Estate which is at capacity and also to the Golspie Business Park where, despite take-up of plots being low to date, there are proposals for the development of several plots.

, The development of the former Technical College at Drummuie is complete and consolidates the Council's service provision in Golspie, whilst also providing an impetus to further development on associated land and the adjacent business park.

The initial development of the Ben Bhraggie bike trail (Highland Wildcat Trails) is complete, with ancillary proposals underway, including the extension of foot and cycle path linkages. The facility will be an important tourist attraction for Golspie, with an anticipated 50,000 extra visitors per annum. Land at Rhives will allow development of caravan and camping facilities to service growth in visitor numbers; opportunities exist for the local business community to benefit from this attraction.

### **Development Factors**

Deleted: Lack of availability of land for industrial uses has led

to the identification of further

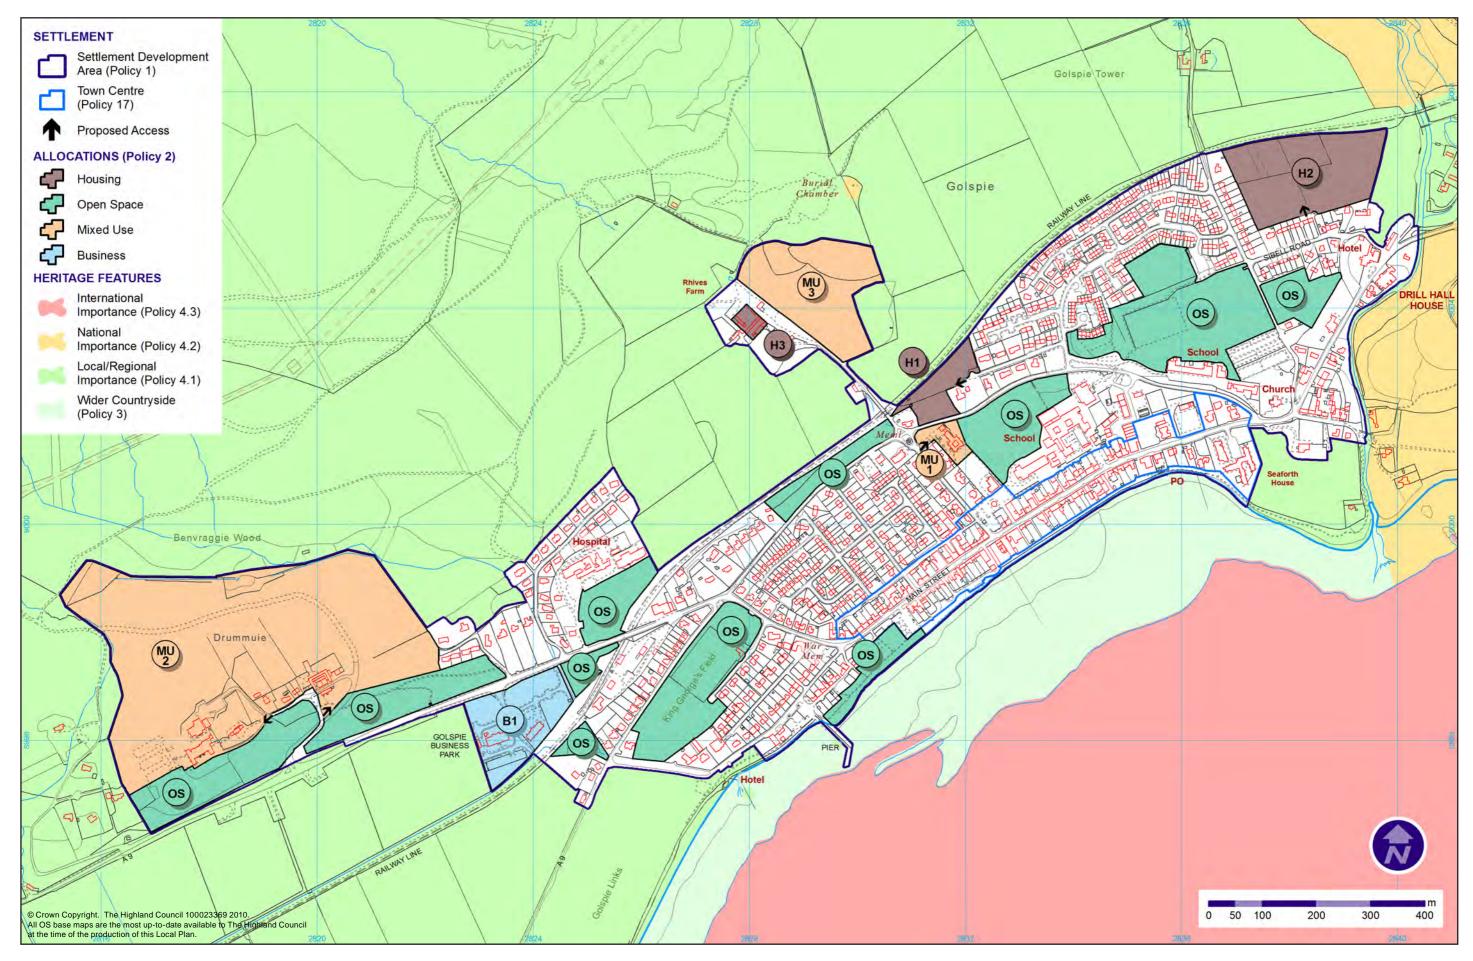

land to the west of the Business Park which can service the identified needs of

existing local businesses.
