Position in Settlement Hierarchy	Main Centre
2005 Estimated Population	370
Housing Completions 2000-2007	12
Primary School/Secondary School Capacities	80% / 71%
Water Capacity	Limited capacity, additional capacity projects planned between 2007-2010
Sewerage Capacity	Limited Capacity, in the existing septic tanks but Scottish Water is committed to funding an upgrade when planning permission is granted for housing

Prospects

Lochinver is the service, employment and tourist centre for south west Sutherland and is dominated by its major fishery port, deep water berth and reclaimed land. The Main Street area is the location for many of the community facilities and has a distinct linear form which is an attractive feature within the National Scenic Area. Further to the South, port related facilities together with industrial land and the Assynt Leisure centre are backed by some 36 hectares of community woodlands at Culag.

Infill opportunities continue to be brought forward within the village and recently the development of eight affordable homes was accommodated at Inver Park. In Assynt housing completions data has indicated that the majority of development has been accommodated within the townships rather than within Lochinver itself leaving infrastructure in many cases close to or at its capacity. Even within the village the septic tanks are close to capacity with the exception of the Inver Park tank which has capacity for a further 13 houses.

Therefore it is important that an effective land supply is identified within Lochinver or as close to its services as possible. However, rising land, ground conditions, crofting, and servicing all constrain the options for growth and there is a need to identify sufficient opportunity for the next phase of development to meet the needs that remain unmet and to plan future growth.

The Assynt Estate has been investigating the potential of land at Cnoc A Mhulinn at the entrance to the village and they hold further potential for development at the sheep stock pens. In the longer term dependent on an engineering assessment there may be potential to loop through to Cnoc A Mhuillin and Deleted: u open up further land here.

In 2005 there was a community buyout of the Glencanisp and Drumrunie Estates south of Lochinver. Since then the Assynt Foundation have been investigating the development opportunities and a full feasibility study for housing development will be undertaken shortly in Glencanisp. The level of development potential in this area which is roughly 1 kilometre from the village may be determined by feasibility in terms of road upgrades required. Given the sensitive landscape of this area, its location detached from the village and current uncertainty regarding the feasibility of development it is not included within the settlement development area,

Development Factors

- Lochinver lies within the Assynt-Coigach, National Scenic Area with regards to sensitive siting and high quality design of devel
 - Low downward emission design street lights;
 - Development within the regenerating woodland at Glendarrach of woodland should be limited and setting protected as far as p
- Potential within the SDA for development of new woodland cro to address effective woodland practice as well as economic an
- Support for the provision of new care facilities;
- Any developments served by private waste water system (in co require to drain to land to safeguard water bodies.

Site Allocations

Deleted: However in the

context of the constraints experienced within Lochinver itself it is an appropriate location to accommodate a fairly significant level of development.

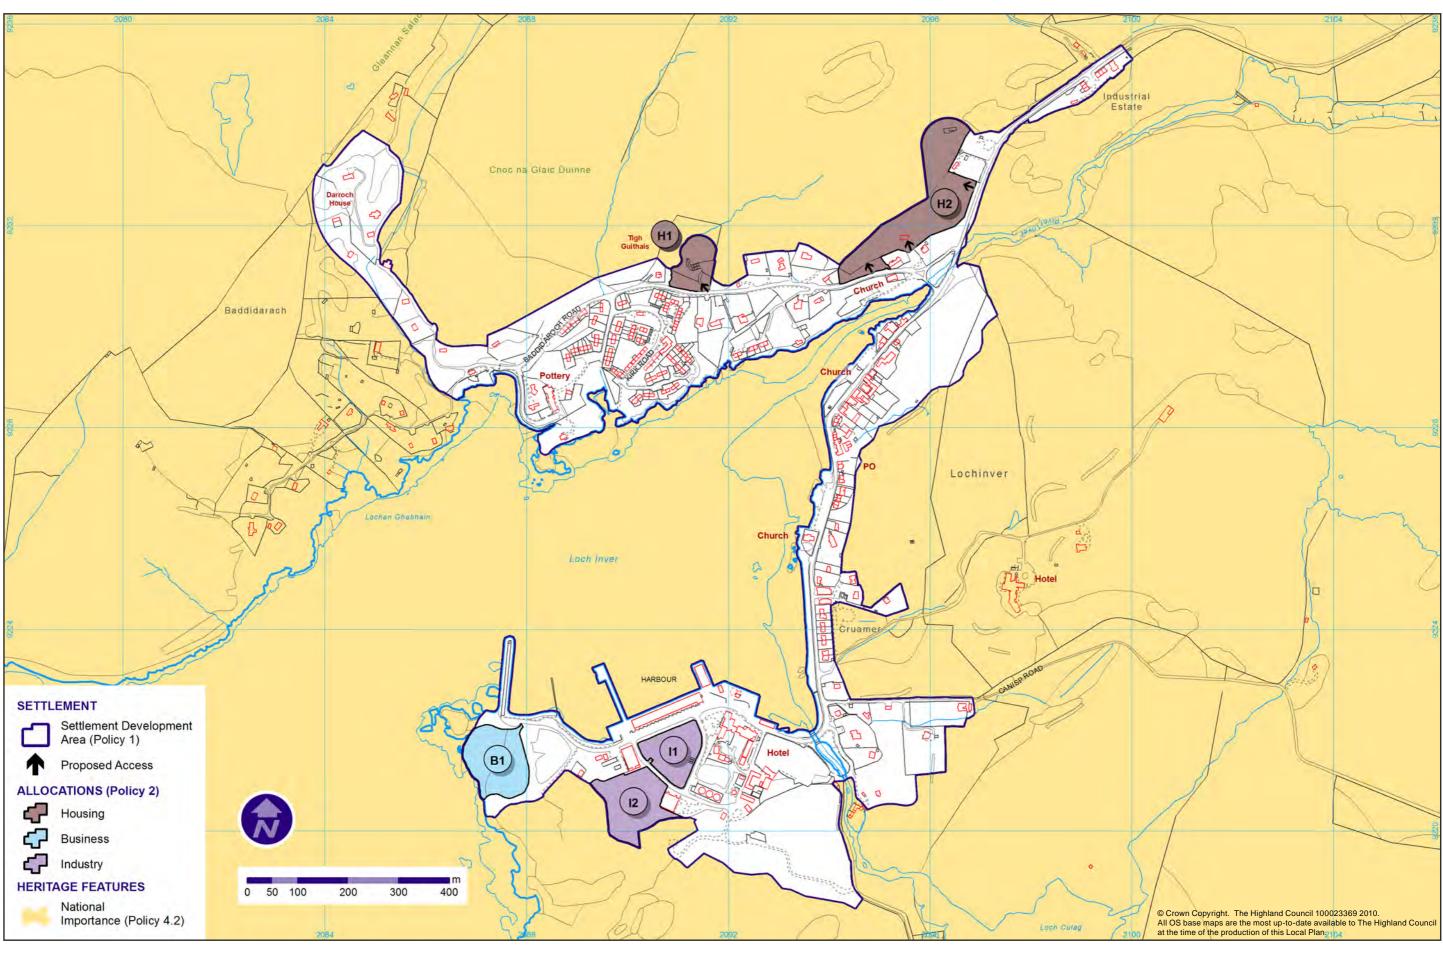

Site Ref.	Site Area	Location	Housing Capacity	Developer Requireme
H 1	0.7ha	Sheep pens north of Inver Park	6 units	The sheep fanks should expense. The indicative that level by access.
