

Reporting Requirements of the Flood Prevention and Land Drainage (Scotland) Act 1997

The Act states that each Local Authority in Scotland shall prepare and publish a report specifying:-

- a) The measures which they consider that they require to take to prevent or mitigate the flooding of land in their area.
- b) The measures which they have taken since the date of publication of their previous report to prevent or mitigate the flooding of such land.
- c) All occurrences of flooding of such land since the publication of their previous report.

This report has been prepared to meet the reporting requirements of the Act, and has been subdivided into the three reporting headings specified above.
