

Summary

This project has developed a methodology for mapping and analysing renewable heat opportunities across the Highlands.

The methodology is

- Robust
- Consistent
- Repeatable
- Scaleable
- Interactive

There is now a major opportunity to use the Heat Map and methodology to help achieve renewable heat targets at both a regional and national level

AECOM

Next Steps

- Finalising the Heat Map documentation
- Piloting our use of the Heat Map tools
- Developing Heat Map information provision
- Reporting to Council
- Reporting to COSLA – sharing with LAs
- Feedback to stakeholders
- Feedback to data providers
- Future development and updating of the Heat Map
