The Highland Council

Skye, Ross and Cromarty Area Committee 4 February 2015

Agenda Item	4
Report No	SRC/002/15

Scottish Fire and Rescue Area Committee Performance Report for 2014-15

Report by Local Senior Officer for Highland

Summary

This report and accompanying Skye, Ross and Cromarty Area Performance Report details fire and rescue service performance against the key areas of planned activity identified during the Ward consultation sessions.

Activity areas were identified through a range of Intervention, Prevention and Protection activities delivered in partnership to reduce risk to the communities of Skye, Ross and Cromarty.

1. Skye, Ross and Cromarty Performance Report

1.1 The attached area performance report for Skye, Ross and Cromarty details the areas of activity and service delivery set against the main priority areas as identified by communities during the Ward consultation sessions of 2013.

These areas are:

- Reducing accidental dwelling house fires and the resultant fatalities and casualties
- Reducing deliberate fires
- Reducing road traffic collisions
- Reducing the number of attendances to unwanted fire alarm signals (false alarms)
- 1.2 In achieving these priorities a number of activities have been identified which include; the delivery of free home fire safety visits (HFSV) and post domestic incident response aimed at reducing dwelling house fires, supporting the partnership delivered road safety programmes, Driving Ambition and the reduction of fire-related antisocial behaviour through targeted youth engagement activities and thematic action plans.
- 1.3 Through the Fire Safety Enforcement Staff the Service continues to carry out legislative fire safety audits, supporting a reduction in fires and fire related injuries in non-domestic premises.

- 1.4 With the introduction of the Scottish Fire and Rescue Service unwanted fire alarm signals (UFAS) procedure on 1 December 2014 there is now a standard management model to reduce the number of UFAS across all areas of Scotland and effectively manage an appropriate response to repeat UFAS calls from known premises. Personnel throughout Skye, Ross and Cromarty are tasked with:
 - Working more closely with all 'duty holders' post UFAS events to review, and where appropriate, improve management arrangements within premises.
- 1.5 Community and Firefighter safety remain at the forefront of service delivery activities in Skye, Ross and Cromarty and activity includes operational risk visits, multi-agency training and exercises, community resilience initiatives and management of resource availability.

Additional information as requested at the last round of Area Committees has been included in the performance report:

- Workforce statistics including establishment and availability figures
- Highland wide performance

Recommendation

Committee Members are invited to **comment** and **scrutinise** the attached Area Performance Report.

Group Manager Phil Green

Performance Report

DISCLAIMER

The figures included in this report are provisional and subject to change as a result of quality assurance and review. The statistics quoted are internal management information published in the interests of transparency and openness.

The Scottish government publishes Official Statistics each year which allow for comparisons to be made over longer periods of time.

ID	Key Performance Indicator (KPI)	Pg
2bi	All accidental dwelling fires	3
3bi	All fatal accidental dwell. fire casualties	4
3bii	Non-fatal accidental dwell. fire casualties (excl. precautionary checkups)	5
la	All deliberate fires	6
5a	Special Service – RTCs	7
l0d	False Alarm – Equipment failure	8
	Station Availability	9

Commentary

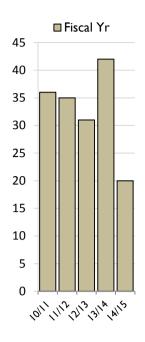

The key performance indicators (KPIs) above have been extracted from the suite of KPIs contained within the Scottish Fire and Rescue Framework Document 2013. http://www.scotland.gov.uk/Resource/0041/00416181.pdf

The KPIs above also represent the main priority areas for the Scottish Fire and Rescue Service, identified by elected members and communities during the ward consultation sessions in 2013 as;

- Reducing accidental dwelling house fires and the resultant fatalities and casualties
- Reducing deliberate fires
- Reducing road traffic collisions
- Reducing the number of attendances to unwanted fire alarm signals (false alarms)

All accidental dwelling fires

Quarter 3	12	Ш	9	18	#N/A	#N/A
Quarter 4	12	12	14	Ш	#N/A	#N/A

Commentary

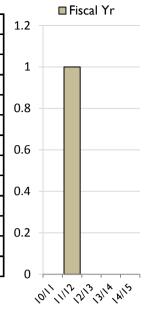

The tables above represent the number of accidental dwelling house fires that occurred within the Area Committee boundary. Tolerances are set in context of the number of previous incidents by reporting month and, where there has been an increase in overall incidents, the colour coding is identified with the application of the red, amber and green (RAG) system.

Trend lines also identify the number of incidents over the reporting 5 year period, both by month and by reporting quarter.

The Service works closely with partner agencies and communities to reduce the number of accidental dwelling house fires through the delivery of targeted home fire safety visits and the installation of free smoke detectors. Supporting the targeted delivery, partner agencies routinely share data identifying residents that would benefit from this free service, aiming to reduce the risk of fire and harm to householders and their property.

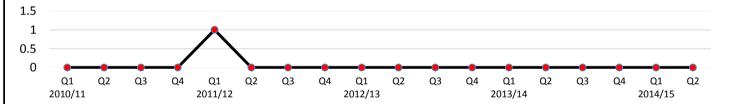

All fatal accidental dwell. fire casualties

Quarter 4	0	0	0	0	#N/A	#N/A

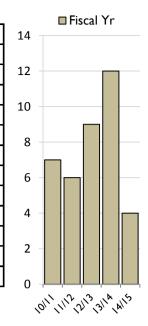

Commentary

The attached tables identify the number of dwelling house fires that have resulted in fire related fatalities over the reporting 5 year period. The Service is committed to reducing this figure to eliminate all events and occurrences that result in a fatality. As identified, partnership working and data sharing supports this key aim and the delivery of targeted life safety advice and information.

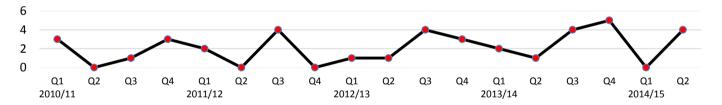

Non-fatal accidental dwell. fire casualties (excl. precautionary checkups)

Commentary

The attached tables identify the number of dwelling house fires that have resulted in fire related casualties over the reporting 5 year period. The Service is committed to reducing this figure overall, therefore reducing the impact on the community.

The Service will continue to work hard with partners to reduce the number of casualties.

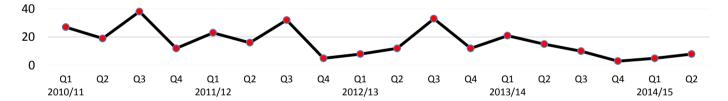

All deliberate fires

Quarter 4	12	5	12	3	#N/A	#N/A

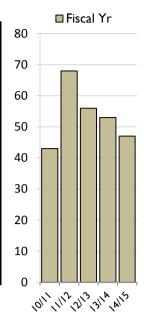

Commentary

Deliberate fires include those as a result of fire related antisocial behaviour (ASB) and wildfires. Analysis of the overall incidents and the periods in when they occur, identify seasonal variations e.g. muirburning season and holiday periods. The Service has introduced a number of fire reduction strategies and thematic action plans targeting these types of incidents. Working in partnership with other key agencies, the Service is working hard to reduce these incidents overall. Examples of which include the promotion of fire reduction through the Safer Highland ASB Group, promoting best practice and partnership working through the Scottish Wildfire Forum (SWF) and targeting key groups ahead of known peak activity periods.

Commentary

Special Service incidents involves an operational response to a range of emergency activities including life critical road traffic collisions, flooding events, industrial accidents and in support of other emergency service colleagues at larger multi-agency non-fire related events.

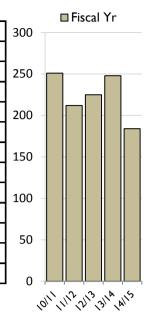

The most common type of special service is as a result of a road traffic collision involving, in most cases, a response from all three emergency services. The Service is working in partnership with other emergency response colleagues and partner agencies through the Safer Highland Road Safety Group to reduce these incidents in the communities of Skye, Ross and Cromarty.

Road safety activities in the area include e.g. Driving Ambition and Safe Highlander, all of which have a focused message of road safety, targeting key groups in the reduction of road related incidents as identified in Scotland's Road Safety Framework to 2020.

Commentary

The Service responds to a number of false alarms over the reporting year, most of which are unwanted fire alarm signals (UFAS). The Service is working closely with duty holders to reduce the number of UFAS events, as a result, the numbers have been decreasing slightly across the area of Skye, Ross and Cromarty when analysing like for like periods over the last 5 year reporting periods.

Commentary

The table shows the current staffing levels on stations and total availability that these individuals have been available for calls, and how this affects the availability of the station's fire appliances.

The Service works closely with employers and RDS staff to support an improvement in availability. However, we recognise the challenges faced by RDS staff when combining primary employment and their operational availability across the communities in Highland area.

The Service is actively recruiting in a number of communities to improve station and fire appliance availability.
