HIGHLAND COUNCIL

Committee: Caithness Committee

Date: 16 May 2018

Report Title: Scottish Fire and Rescue Area Committee Performance

Report for Q3 and Q4 2017-18

Report By: Local Senior Officer for Highland

1. Purpose/Executive Summary

- 1.1 This report provides an update to Caithness Committee Members on progress against the priorities outlined in the Scottish Fire and Rescue Service Area Committee Plan for Caithness and Sutherland 2017-2018.
- 1.2 Priority areas are identified through a range of Intervention, Prevention and Protection activities which are delivered through partnership to reduce the risk to the communities of Caithness.
- 1.3 The report also contains previously agreed information and performance as requested by Local Committees.

2. Recommendations

2.1 Committee Members are invited to **comment on** and **scrutinise** the attached Caithness Area Performance Report.

3. Caithness Area Performance Report

- 3.1 The attached performance report provides the current figures for Quarter 3 and Quarter 4 of 2017/18 from the central Scottish Fire and Rescue Service (SFRS) performance management database against the key indicators and timelines from previous reports.
- 3.2 In achieving the priorities within the Area Committee Plan for Caithness and Sutherland 2017-2018 a number of activities are being progressed including: the delivery of free home fire safety visits (HFSVs) and post domestic incident response (PDIR) aimed at reducing dwelling house fires. SFRS continues to play an active part in the delivery of partnership safety initiatives including the Driving Ambition road safety programme and the reduction of fire-related antisocial behaviour through targeted youth engagement activities (such as HIFiReS) and thematic action plans. SFRS officers also attend Caithness Community Partnership meetings and are involved in creating Locality Plans to improve inequalities in outcome for communities. Caithness has two Community Safety Advisors who educate, inform and participate in the Safer Caithness initiative and other local projects.
- 3.3 The performance reports for Q3 and Q4 show some mixed results against the performance indicators in the Caithness area when compared to previous reporting periods. However, it must be emphasised that the baseline figures for some indicators are very low and this can make meaningful statistical analysis challenging.
 - a. There were eight (8) Accidental Dwelling Fires attended by SFRS in Q3 and Q4 of 2017/18. This is two (2) more than the figure for the previous six months and four (4) less than the equivalent period in 2016/17. Of these eight (8) fires, five (5) caused very limited damage whilst three (3) caused damage throughout the floor of origin. These statistics suggest that the majority of the dwelling fires were detected at a very early stage and is testament to the success of SFRS domestic fire prevention activities and the swift response from SFRS crews to contain the fires.
 - b. Tragically there was one (1) accidental dwelling fire incident which led to a Fatal Fire Casualty within Q3 and Q4 of 2017/18. This is the same figure as the equivalent period in 2016/17. SFRS has initiated and chaired a multi-agency Fatal Fire Conference which was held to identify potential opportunities to prevent this and similar fire deaths from occurring.
 - c. There was one (1) Non-Fatal Domestic Fire Casualty at a fire incident attended by SFRS in Caithness during Q3 and Q4 of 2017/18. This maintains the low level trend evidenced over the last three years.
 - d. There was one (1) Deliberate Fire attended by SFRS during Q3 and Q4 of 2017/18. This is a decrease of two (2) on the figure for the previous six months and two (2) less than the equivalent period in 2016/17. The fire was within an external structure at a domestic property.
 - e. There have been fifteen (15) Special Service Road Traffic Collisions

(RTCs) attended by SFRS in Q3 and Q4 of 2017/18. This is the highest half year figure for RTC incidents in the last five years. Crews released trapped persons at five (5) RTCs, made the scene safe at eight (8) incidents and were not required to assist at two (2) incidents.

f. Twenty-five (25) Unwanted Fire Alarm Signals (UFAS) incidents were attended by SFRS in Q3 and Q4 of 2017/18. This represents a 50% reduction on the Q1 and Q2 figure and is similar to the equivalent period in 2016/17.

Detailed analysis of the twenty-five (25) UFAS incidents has identified that they were dispersed over thirteen (13) premises. Four (4) premises were responsible for generating fourteen (14) of the UFAS incidents.

SFRS continues to work with the responsible person for premises which generate repeated false alarms. The aim is to prevent the occurrence of these types of incident by advising on equipment and its management.

3.4 The Service continues to refine the Retained Duty System (RDS) recruitment process to meet local needs and targets key stations and communities across Caithness.

Appliance availability in Caithness during Q3 and Q4 of 2017-18 has remained the same as the previous reporting period. SFRS has been successful in recruiting replacement Firefighters who are programmed to receive the necessary training in core operational skills:

Dunbeath x 3Thurso x 1Wick x 1

SFRS personnel are promoting the firefighter recruitment campaigns with partner agencies, local media and are seeking continued local area support in the communities identified.

Designation: Local Senior Officer for Highland

Date: 26 April 2018

Author: Group Manager Mark Loynd

Attachment: Highland - Caithness Area Committee - Performance Report

Highland Caithness Committee

Performance Report

DISCLAIMER

The figures included in this report are provisional and subject to change as a result of quality assurance and review. The statistics quoted are internal management information published in the interests of transparency and openness.

The Scottish government publishes Official Statistics each year which allow for comparisons to be made over longer periods of time.

ID	Key Performance Indicator (KPI)	Pg
2bi	All accidental dwelling fires	3
3bi	All fatal accidental dwelling fire casualties	4
3bii	Non-fatal accidental dwelling fire casualties (excl. precautionary checkups)	5
1a	All deliberate fires	6
5a	Special Service – RTCs	7
10d	False Alarm – UFAS	8
	Station Availability	9

Commentary

The key performance indicators (KPIs) above have been extracted from the suite of KPIs contained within the Scottish Fire and Rescue Framework Document 2013.

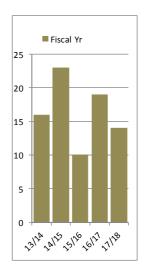

http://www.scotland.gov.uk/Resource/0041/00416181.pdf

The KPIs above also represent the main priority areas for the Scottish Fire and Rescue Service, identified by elected members and communities during the ward consultation sessions in 2013 as;

- Reducing accidental dwelling house fires and the resultant fatalities and casualties
- Reducing deliberate fires
- Reducing road traffic collisions
- Reducing the number of attendances to unwanted fire alarm signals (false alarms)

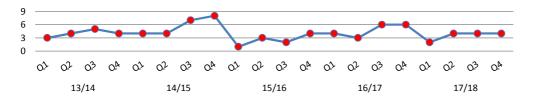

All accidental dwelling fires

Quarter 2	4	4	3	3	4	37
Quarter 3	5	7	2	6	4	37
Quarter 4	4	8	4	6	4	36

Commentary

The tables above represent the number of accidental dwelling house fires that occurred within the Area Committee boundary. Tolerances are set in context of the number of previous incidents by reporting month and, where there has been an increase in overall incidents, the colour coding is identified with the application of the red, amber and green (RAG) system.

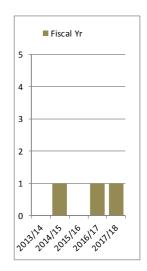

Trend lines also identify the number of incidents over the reporting 5 year period, both by month and by reporting quarter.

The Service works closely with partner agencies and communities to reduce the number of accidental dwelling house fires through the delivery of targeted Home Fire Safety Visits (HFSVs) and the installation of free smoke and heat detectors. Supporting the targeted delivery, partner agencies routinely share data identifying residents that would benefit from this free service, aiming to reduce the risk of fire and harm to householders and their property.

Post Domestic Incident Response (PDIR) is undertaken after every incident as a means of generating HFSVs, and raising fire safety awareness in the community.

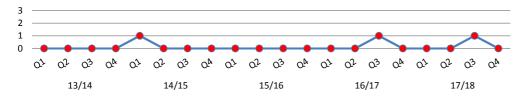

All fatal accidental dwelling fire casualties

Quarter 2	0	0	0	0	0	1
Quarter 3	0	0	0	1	1	1
Quarter 4	0	0	0	0	0	0

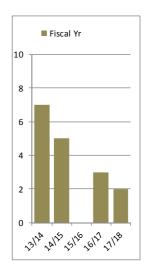

Commentary

The tables above identify the number of dwelling house fires that have resulted in fire related fatalities over the reporting 5 year period. The Service is committed to reducing this figure to eliminate all events and occurrences that result in a fatality. As identified, partnership working and data sharing supports this key aim and the delivery of targeted life safety advice and information.

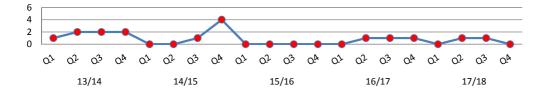

Non-fatal accidental dwell. fire casualties (excl. precautionary checkups)

Quarter 2	2	0	0	1	1	4
Quarter 3	2	1	0	1	1	3
Quarter 4	2	4	0	1	0	1

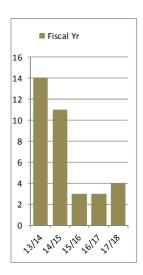

Commentary

The tables above identify the number of dwelling house fires that have resulted in fire related casualties over the reporting 5 year period. The Service is committed to reducing this figure overall, therefore reducing the impact on the community.

The Service will continue to work with partners to reduce the number of casualties.

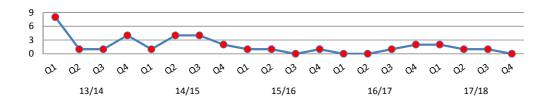

All deliberate fires

Month/Year	2013/14	2014/15	2015/16	2016/17	2017/18	Highland

Fiscal Yr	14	11	3	3	4

Qtr/Year	2013/14	2014/15	2015/16	2016/17	2017/18	Highland
Quarter 1	8	1	1	0	2	58
Quarter 2	1	4	1	0	1	40
Quarter 3	1	4	0	1	1	24
Quarter 4	4	2	1	2	0	36

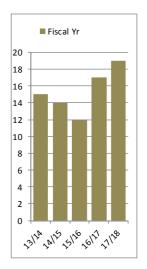

Commentary

Deliberate fires include those as a result of fire related antisocial behaviour (ASB) and wildfires. Analysis of the overall incidents and the periods in when they occur, identify seasonal variations e.g. muirburning season and holiday periods. The Service has introduced a number of fire reduction strategies and thematic action plans targeting these types of incidents. Working in partnership with other key agencies, the Service is working hard to reduce these incidents overall. Examples of which include the promotion of fire reduction through the Safer Highland ASB Group, promoting best practice and partnership working through the Scottish Wildfire Forum (SWF) and targeting key groups ahead of known peak activity periods.

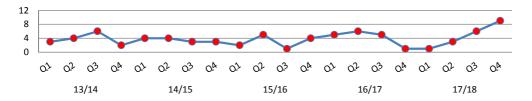

Special Service - RTCs

Quarter 2	4	4	5	6	3	65
Quarter 3	6	3	1	5	6	62
Quarter 4	2	3	4	1	9	55

Commentary

Special Service incidents involve an operational response to a range of emergency activities including life critical road traffic collisions, flooding events, industrial accidents and in support of other emergency service colleagues at larger multi-agency non-fire related events.

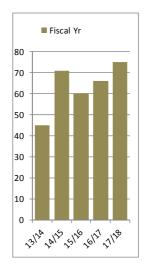

The most common type of special service is as a result of a road traffic collision involving, in most cases, a response from all three emergency services. The Service is working in partnership with other emergency response colleagues and partner agencies through the Highland Road Safety Group to reduce these incidents in the community of Caithness.

Road safety activities in the area include e.g. Driving Ambition and Safe Highlander, all of which have a focused message of road safety, targeting key groups in the reduction of road related incidents as identified in Scotland's Road Safety Framework to 2020.

Quarter 3	9	16	21	9	13	273
Quarter 4	15	16	11	15	12	247

Commentary

The Service responds to a number of false alarms over the reporting year, most of which are unwanted fire alarm signals (UFAS).

The SFRS Unwanted Fire Alarm Signals Policy requires operational crew and managers to work closely with duty holders in order to reduce the number of UFAS events.

Station Availability

Station	Availability	Male	Female	Staff	Staffing
	%				Change

Wick – 2 nd Appliance	90%	20	0	20	7

Coithness Committee Totals	C.F.	1	60
Caithness Committee Totals	05	4	09

Commentary

The table shows the current staffing levels on stations and total availability that these individuals have been available for calls, and how this affects the availability of the station's fire appliances.

There are no set staffing levels for crew members at RDS and CRU fire stations. A station's compliment is based on the ability of the crew to achieve 100% appliance availability with a resilience provision for absences.

The former working figures for station compliments were 12 crew members at a one pump station and 20 at a two pump station.

The actual number of crew members at a fire station will vary according to the daily availability of individual crew members and their personal skill sets.

The Service works closely with employers and RDS staff to support an improvement in availability. However, we recognise the challenges faced by RDS staff when combining primary employment and their operational availability across the communities in Highland area.

The Service is actively recruiting in a number of communities to improve station and fire appliance availability.
