

Item 12: Question Time

To the Leader of the Council

“Does the Leader anticipate maximising the Highland Council allocation of Scottish Government affordable housing programme funds for 2018/19?”

Response to Mr R MacWilliam

The housing investment programme target spend for 2018/19 was £40.1 million. The current forecasted spend is approximately £38 million. The Council has managed to secure an additional £4 million of Infrastructure Loan Fund to open up strategic sites in Fort William and Inverness to enable the development of more affordable homes and it is expected that £2 million of this spending will be incurred in 2018/19.
