THE HIGHLAND COUNCIL

Committee: Housing and Property

Date: 15 December 2021

Report Title: Property Capital Monitoring Statement and Progress Update

Report By: Executive Chief Officer, Housing and Property

1. Purpose/Executive Summary

- 1.1 This report provides Members with the reported position for the second quarter of the 2021/22 financial year to the end of September.
- 1.2 The report also updates Members on progress with the Education and Strategic Asset Management projects in the General Fund Capital Programme and advises on the status of each project.

2. Recommendations

- 2.1 Members are asked to:
 - i. **NOTE** the financial position for the 2021/22 financial year as of 30 September 2021, and the estimated year-end forecast.
 - ii. **NOTE** the progress made with the Education and Strategic Asset Management projects in the Council's capital programme.

3. Implications

- 3.1 **Resource:** The expenditure on the individual projects and programmes of work is being managed within the overall funding allocation in the reprofiled Capital Programme approved by the Council in January 2021, and the additional funding confirmed in September 2021 for the five priority schools' projects.
- 3.2 **Legal:** The contents of this report and the annual accounts aim to satisfy the requirement of Sections 6 and 7 of the CIPFA Financial Management Code 'Monitoring Financial Performance' and 'External Financial Reporting'. Also, the capital investment outlined in the report supports the Council's efforts to meet its statutory obligations to maintain compliance of buildings, manage school roll pressures and deliver the Early Learning and Childcare expansion programme.

- 3.3 **Community (Equality, Poverty, Rural and Island):** The report details continuing investment across all geographic areas of the Council's estate. The capital investment programme will make a significant contribution to the economic recovery across Highland communities over the coming years.
- 3.4 **Climate Change/Carbon Clever:** The continuing investment will help meet Council and Scottish Government objectives in relation to energy efficiency and climate change.
- 3.5 **Risk:** Risk implications to the budget position, and budget assumptions, will be kept under regular review and any risks identified reported to future meetings of this Committee. All risk matters are managed on both individual projects and across programmes of work.
- 3.6 **Gaelic:** The capital programme includes substantial investment to support the delivery and expansion of Gaelic Medium Education.

4. Capital Programme 2021/22

- 4.1 The capital programme summary is included in **Appendix 1**. It shows net expenditure to the end of September of £11.360M, a relatively low net amount due to the high level of income received for the Early Learning and Childcare programme. The estimated outturn position shows a net underspend of £12.707M, mainly due to delays on projects during the period of the pandemic. However, all the delayed projects are being progressed and the underspend will be carried forward and largely expended in 2022/23.
- 4.2 As previously reported, the pandemic continues to impact on the construction industry with projects facing supply chain issues, additional site measures, and delays to project timescales. There are other pressures in the industry that are exacerbating this position, both locally and nationally. These include the demand for construction materials outstripping supply, longer lead in times for deliveries, difficulty in filling some staff shortages, and sharp increases in the cost of certain materials.
- 4.3 A report to the Council meeting in September highlighted that an increased allowance to cover the associated risk of these inflationary factors would be included in the budgets for potential new projects to be considered as part of the review of the capital programme. Officers will continue to monitor the position and will arrange to discuss this further with colleagues in the Scottish Futures Trust regarding the new build projects included in the Learning Estate Investment Programme. Also, the early engagement of contractors for major projects will allow officers to consider potential measures to mitigate the impact, such as in the choice of materials and components.
- 4.4 Despite these pressures, further progress has been made since the meeting of this Committee in September, with more contracts awarded and projects completed. **Appendix 2** lists all the Education projects that are currently being progressed, while **Appendix 3** lists all the Strategic Asset Management projects. There are also comments on each of the individual project lines in **Appendix 1** and this now includes the generic lines for Community & Leisure Facilities and Health & Social Care which were not previously reported to this Committee. The report to the next meeting in February will include updates on the individual projects funded from these budget headings.
- 4.5 **Major Education Projects:** The page on the Council website (link below) has been updated to provide further information and regular updates on the major new build and

extension projects being taken forward, including minutes of Stakeholder Group meetings.

https://www.highland.gov.uk/info/878/schools/845/school estate management

Links will also be added to the webpage to showcase completed projects and it is proposed that this will be demonstrated during this agenda item at the Committee meeting. The demonstration will highlight the recently completed Merkinch Primary School and Family Centre project that won the following national awards at the Learning Places Scotland ceremony in November:

- Innovation in Delivering a Sustainable Learning Space: This award recognises sustainability practice across all levels of decision making in existing and new build learning spaces to support improved performance of the key spaces, and more user driven sustainable behaviours.
- Innovation in Delivering Value: This award recognises innovation that has helped contribute to value, experiential for users, monetary and/or collaborative ways of working in the design of learning spaces.
- 4.6 The report to the June meeting of this Committee saw the introduction of a colour coding system of four risk categories to reflect the current programme status of each of the capital projects. The risk categories are baselined on the status of the individual projects in January 2021 (i.e., when the reprofiled capital programme was approved) and are as follows:

Blue	Work completed		
Green	On programme		
Amber	Possible risk of delay		
Red	Probable risk of delay		

4.7 It had been intended that a similar colour coding system would be used in the reporting of cost variances in individual project budgets, baselined against the revised capital programme that was due to be reported to the Council meeting in October. As the revised capital programme will now be reported to the Council meeting in December, it is proposed that this approach will be adopted for future reports to this Committee from February onwards.
