THE HIGHLAND COUNCIL

Committee: Housing and Property

Date: 3 February 2022

Report Title: Property Capital Monitoring Statement and Progress Update

Report By: Executive Chief Officer, Housing and Property

1. Purpose/Executive Summary

- 1.1 This report provides Members with the reported position for the third quarter of the 2021/22 financial year to the end of December.
- 1.2 The report also updates Members on progress with the Education and Strategic Asset Management projects in the General Fund Capital Programme and advises on the status of each project.
- 1.3 Unfortunately, the demonstration of the updated webpages referred to at 4.5 did not take place at the Committee meeting in December due to staff absences. This item has therefore been carried forward to this report.

2. Recommendations

- 2.1 Members are asked to:
 - i. **NOTE** the financial position for the 2021/22 financial year as of 31st December 2021, and the estimated year-end forecast.
 - ii. **NOTE** the progress made with the Education and Strategic Asset Management projects in the Council's capital programme.

3. Implications

- 3.1 **Resource -** The expenditure on the individual projects and programmes of work is being managed within the overall funding allocations in the revised Capital Programme approved by the Council in December 2021.
- 3.2 **Legal -** The contents of this report and the annual accounts aim to satisfy the requirement of Sections 6 and 7 of the CIPFA Financial Management Code 'Monitoring Financial Performance' and 'External Financial Reporting'. Also, the capital

investment outlined in the report supports the Council's efforts to meet its statutory obligations to maintain compliance of buildings, manage school roll pressures and deliver the Early Learning and Childcare expansion programme.

- 3.3 **Community (Equality, Poverty, Rural and Island) -** The report details continuing investment across all geographic areas of the Council's estate. The capital investment programme will make a significant contribution to the economic recovery across Highland communities over the coming years.
- 3.4 **Climate Change/Carbon Clever -** The continuing investment will help meet Council and Scottish Government objectives in relation to energy efficiency and climate change.
- 3.5 **Risk** Risk implications to the budget position, and budget assumptions, will be kept under regular review and any risks identified reported to future meetings of this Committee. All risk matters are managed on both individual projects and across programmes of work.
- 3.6 **Gaelic -** The capital programme includes substantial investment to support the delivery and expansion of Gaelic Medium Education.

4. Capital Programme 2021/22

- 4.1 The capital programme summary is included in **Appendix 1**. It shows net expenditure to the end of December 2021 of £26.034M. This is a relatively low net amount due to the high level of income received for the Early Learning and Childcare programme (£14.661M) in the current financial year. Also, a capital grant of £900K of Gaelic funding has recently been received from the Scottish Government for the two-classroom extension at Bun-Sgoil Ghàidhlig Loch Abar (£650K) that was completed last year, and the new primary school building at Dunvegan (£250K funding) that is at design stage.
- 4.2 The estimated outturn position shows a net underspend of £14.892M, which is largely due to the accounting of the income referred to in 4.1, and the delays on projects that have been experienced during the period of the pandemic. However, all the delayed projects are being progressed and the underspend will be carried forward and largely expended in 2022/23.
- 4.3 As previously reported, the pandemic continues to impact on the construction industry with projects facing supply chain issues, additional site measures, and delays to project timescales. There are other pressures in the industry that are exacerbating this position, both locally and nationally. These include the demand for construction materials outstripping supply, longer lead in times for deliveries, difficulty in filling some staff shortages, and sharp increases in the cost of certain materials.
- 4.4 Reports to Council meetings in 2021 highlighted that an increased allowance to cover the associated risk of these inflationary factors would be included in the budgets for potential new projects to be considered as part of the review of the capital programme. Officers are continuing to monitor the position and remain in dialogue with colleagues in the Scottish Futures Trust regarding the new build projects included in the Learning Estate Investment Programme. Also, the early engagement of contractors for major projects will allow officers to consider potential measures to mitigate the impact, such as in the choice of materials and components.

- 4.4 Despite these pressures, further progress has been made since the meeting of this Committee in December, with more contracts awarded and projects completed. 71 projects have now been completed as part of the Early Learning and Childcare expansion programme, many of which also included other essential improvements to school buildings. Appendix 2 lists all the Education projects that are currently being progressed, while Appendix 3 lists all the Strategic Asset Management projects. There are also comments on each of the individual project lines in Appendix 1 and this now includes the generic lines for Community & Leisure Facilities and Health & Social Care which were not previously reported to this Committee.
- 4.5 **Major Education Projects:** The page on the Council website (link below) has been updated to provide further information and regular updates on the major new build and extension projects being taken forward, including minutes of Stakeholder Group meetings.

https://www.highland.gov.uk/info/878/schools/845/school estate management

Links will also be added to the webpage to showcase completed projects and it is proposed that this will be demonstrated during this agenda item at the Committee meeting. The demonstration will highlight the recently completed Merkinch Primary School and Family Centre project that won the following national awards at the Learning Places Scotland ceremony in November:

- Innovation in Delivering a Sustainable Learning Space: This award recognises sustainability practice across all levels of decision making in existing and new build learning spaces to support improved performance of the key spaces, and more user driven sustainable behaviours.
- Innovation in Delivering Value: This award recognises innovation that has helped contribute to value, experiential for users, monetary and/or collaborative ways of working in the design of learning spaces.
- 4.6 The report to the meeting of this Committee in June 2021 saw the introduction of a colour coding system of four risk categories to reflect the current programme status of each of the capital projects. The risk categories are baselined on the status of the individual projects in January 2021 (i.e., when the reprofiled capital programme was approved) and are as follows:

Blue	Work completed	
Green	On programme	
Amber	Possible risk of delay	
Red	Probable risk of delay	

4.7 There has been some discussion at previous meetings of this Committee regarding the format of the capital monitoring statement (as included at **Appendix 1**) and the reporting of estimated final project costs in relation to the approved budgets. It is intended that reports to this Committee from the June meeting onwards will include this information in line with an agreed corporate approach to the monitoring and reporting of whole life project costs.
