## 8 Capital Programme

8.1 The 2022–2027 Capital Investment Programme continues to support key areas of planned investment, including heating system upgrades, energy efficiency improvements, and the replacement of major components reaching the end of their lifecycle. In addition, capital funding is allocated to local Building Maintenance teams to respond to component failures and to deliver aids and adaptations as required, ensuring a responsive and needs-led approach.

- 8.2 We are actively working in partnership with colleagues from the Climate Change and Energy Team to identify and secure funding opportunities across the Highlands. This joint effort supports the delivery of our energy efficiency projects by aligning with wider sustainability goals and accessing external resources. By attracting additional funding, we are able to extend the reach of our programmes delivering measures to a greater number of properties while also reducing the level of borrowing required to implement these improvements. This approach not only enhances value for money but also strengthens the long-term financial sustainability of our capital investment plans.
- 8.3 Please see **Appendix 1** which outlines the spend against the 5-year programme. The budget also includes carry forward from previous years underspend/overspend. **Appendix 2** demonstrates what has been delivered to date. Note that Appendix 2 does not include projects which are currently active.
