

Agenda Item	10
Report No	CIA/27/26

## The Highland Council

**Committee:** City of Inverness Area

**Date:** 18 May 2026

**Report Title:** Environmental Health - Annual Report & Activity 2025/26

**Report By:** Assistant Chief Executive - Place

### 1 Purpose/Executive Summary

1.1 This report is to provide an update to Members on the Environmental Health team and provide an annual report on local activity during 2025/26.

### 2 Recommendations

2.1 Members are asked to:-

- i. **Note** the scope and volume of work currently being delivered in the local area;
- ii. **Note and comment** on local issues and current operational priorities;
- iii. **Note and comment** on Highland wide issues impacting Environmental Health Services; and
- iv. **Note and comment** on the format and content of the report.

### 3 Implications

3.1 **Resource** – The resources available to Environmental Health must be prioritised, focusing on areas of greatest public health significance. The team continually explores ways to delivering services more efficiently and within budget including reviewing associated income streams, working with COSLA regarding resource allocation and seeking efficiencies in working practice and team structure.

3.2 **Legal** - As a regulatory service the Environmental Health team have a wide range of statutory duties. The team have an Enforcement Policy in place and officers follow the five principles of better regulation - regulation should be transparent, accountable, consistent, proportionate, and targeted.

Please note that for purposes of this report no reference is made to individuals or businesses to ensure compliance with Data Protection and not to impact on any ongoing investigations or court proceedings.

3.3 **Health and Safety** – There is current pressures on the environmental health profession and challenges in workforce planning. These challenges have been noted

by COSLA and the Scottish Government. Work is ongoing with the Royal Environmental Health Institute of Scotland (REHIS) and the Society of Chief Officers of Environmental Health in Scotland (SoCOEHS) to increase resilience of the service and help provide a sustainable workforce.

3.4 **Health and Safety (risks arising from changes to plant, equipment, process, or people)** – There are no staff Health, Safety and Wellbeing implications arising from this report.

3.5 **Gaelic** - There are no Gaelic implications arising from this report.

## **4 Impacts**

4.1 In Highland, all policies, strategies, or service changes are subject to an integrated screening for impact for Equalities, Poverty and Human Rights, Children's Rights and Wellbeing, Climate Change, Islands and Mainland Rural Communities, and Data Protection. Where identified as required, a full impact assessment will be undertaken.

4.2 Considering impacts is a core part of the decision-making process and needs to inform the decision-making process. When taking any decision, Members must give due regard to the findings of any assessment.

4.3 This is a monitoring or update report and therefore an impact assessment is not required.

## **5 Background**

5.1 Members will be aware that Environmental Health submits an annual operational plan for approval. This plan sets out the objectives for the service, including the key priorities for the year ahead. The most recent 2025/2026 plan was approved by the Communities and Place Committee on [22 May 2025](#). A revised plan will be presented in May 2026.

Consideration is currently being given to moving from an annual plan to a three-year Operational Plan. This approach would support longer term, strategic planning.

Annual progress updates would then be provided through these annual Area Committee reports.

5.2 The purpose of these Area Committee reports is to:-

- i. increase awareness of the range of activities undertaken locally by the Environmental Health team;
- ii. to seek feedback from Members on the work and performance of the service; and
- iii. to identify any existing or emerging local issues that Members wish to see prioritised going forward.

- 5.3 Environmental Health delivers a wide range of statutory functions on behalf of the Council, with the overarching remit to protect and improve public health. Key areas of responsibility include:-

#### **Public Health Protection**

This includes private water supplies, statutory nuisances (e.g. foul odours; smoke; premises in such a state etc), smoking in public places, port health, and communicable disease investigation (e.g. Food-borne / waterborne disease, legionnaires Disease), blue-green algae, radon advice and National Assistance funerals.

#### **Food Safety**

This includes an enforcement and advisory role in all aspects of food hygiene, food labelling, and food export certification.

#### **Health and Safety,**

This includes an enforcement and advisory role for all aspects of health and safety at work in Local Authority enforced premises, particularly the investigation of workplace accidents.

#### **Private Sector Housing**

This includes an enforcement and advisory role in sub-standard housing, closing and demolition orders, Houses in Multiple Occupation (HMOs) and housing defects. It also includes the delivery and administration of the Council Scheme of Assistance that provides advice and funding by means of a grant for disabled adaptations in the home and for housing improvement and repairs. We also support the Ukrainian resettlement team in conducting property inspections.

#### **Pollution Control**

This includes an enforcement and advisory role in respect of noise control (commercial and domestic) and local air quality management.

#### **Contaminated Land**

This includes a regulatory and enforcement role for contaminated land prevention through development control. The team also provide an advisory role to other council services on asset transfer and development.

#### **Animal Health & Welfare**

This includes an enforcement and advisory role in all aspects of Animal Health legislation. For example, dealing with disposal of animal carcasses on farm and taking animals into possession in serious farm welfare cases.

#### **Licensing**

This includes a general enforcement and advisory role for activities licensed under the Civic Government legislation, including short term lets. The Environmental Health team also have an administrative and enforcement role in respect of the licensing of caravan sites, venison dealers, animal boarding establishments, pet shops, zoos, cinemas, riding establishments, sports grounds, and dangerous wild animals.

#### **Dog Control,**

This includes an enforcement and advisory role in respect of stray dogs, dangerous/aggressive dogs, dog fouling and micro-chipping.

### **Pest Control, Litter, Fly-tipping, Waste Duty of Care, Abandoned Vehicles.**

This includes a general enforcement and educational role regarding such issues. The team work closely with the Councils waste team and SEPA regarding waste and fly tipping issues.

- 5.4 Much of the team's work is proactive and preventative in nature. Environmental Health plays a vital role in ensuring that the Highlands maintains its reputation as a safe and healthy place to live, work, and visit. We aim to support local businesses by providing clear advice on regulatory requirements and by ensuring that our regulatory activity adheres to the five principles of better regulation: **proportionate, consistent, accountable, transparent, and targeted.**

We have also adopted a successful '**4Es**' approach - **Engage, Explain, Encourage, and Enforce** - which underpins how we respond to most cases and helps to promote compliance in a constructive and collaborative manner.

- 5.5 The Environmental Health team has recently undergone a management re-structure as part of ongoing workforce planning and in response to increasing demands on the service.

Two new Area Environmental Health Managers were appointed in October 2025 to cover the North and South operational areas. These roles are designed to support both the Strategic Lead for Environmental Health and Bereavement Services and the Senior Environmental Health Officers (SEHOs) who manage the operational teams in each local office.

There are eight Senior Environmental Health Officers across Highland, each responsible for managing local teams delivering the full range of Environmental Health functions. The SEHOs are based in the following area offices: Fort William, Inverness, Dingwall, Portree, Drumbuie and Wick.

In addition to their local management responsibilities, SEHOs hold Highland-wide functional lead roles for key statutory areas of work. These roles include developing policy and operational guidance and supporting officers in managing significant or complex cases.

Several members of the Environmental Health team also participate in local, regional, and national working or steering groups. Their involvement helps share best practice and contributes to the development of new legislation and statutory guidance.

**Appendix 1** provides the latest Environmental Health team structure, including a map of the operational areas, the area office locations and relevant points of contact.

## **6 Summary of Environmental Health Activity/Local Issues**

- 6.1 For the purpose of this report, the Environmental Health activity has been split into three principal areas. These are outlined below: -

- i. **Reactive work** (i.e. service requests);
- ii. **Pro-active/scheduled work** (i.e. programmed inspections/visits); and
- iii. **Formal Enforcement Activity** (i.e. Formal enforcement notices and reports to Procurator Fiscal)

For each area of activity, the relevant figures have been obtained from our case management system and presented as a total figure for all the Inverness wards (i.e., Wards 13-18 and 20). See Fig 1 below for ease of reference

**Fig 1 - Ward Areas covered by Report**

All data presented is for the period between **1 April 2025 – 31 March 2026**

## Reactive Work

6.2 Table 1 below provides the number of Service requests (i.e., complaints; requests for advice; consultations etc) received by the Environmental Health team, broken down by the general type of category. A more detailed breakdown within each of the general category types is contained within **Appendix 2**.

**Table 1: Number of Service Requests by General Category Type for Wards 13-18 & 20**

Category Type	Total No of Service Requests 2025/2026	Total No of Service Requests 2024/2025
Noise	320	425
Statutory Nuisance	158	121
Food Safety	345	277
Health & Safety	78	154
Civic Government Licensing	171	140
Miscellaneous Licensing	20	9
Short Term Let Licensing	451	720
HMO Licensing	37	60
Animal health	128	68
Housing	247	304
Pests (e.g., mice, rats, gulls etc.)	88	45

Water Supply (incl. PWS)	233	169
Dog Control	157	99
Planning Consultations	159	134
Fly Tipping/Waste/Trade Waste	105	41
Abandoned Vehicles	560	376
S87 Public Health Funerals	12	11
Infectious Disease/HPT Referral	20	10
Liquor Licensing	6	8
Air Quality	4	14
Smoking Ban	0	4
General/Misc./Other	247	166
Litter	34	19
FOI/EIR Requests	20	13
Port Health/Ship Sanitation	5	3
<b>Total</b>	<b>3600</b>	<b>3390</b>

The total number of Service requests received by the Environmental Health team for these wards was **3600**.

The drop in the number of STL licence consultations and HMO applications compared to previous year, is due to the licences being on a 3yr licence cycle. STL renewal applications will be expected to increase this year as legislation now been in place since October 2022.

Similar to across Highland, there was also an increase in reports of abandoned vehicles. A proportion of the increase in 2025/26 may be down to a change in the database as in 2025/26 officers ensured every case report covered only one vehicle, whereas the format in 2023/24 and 2024/25 could include multiple vehicles in one case report. Further detail is provided on these services requests within Section 6.7 of this report.

- 6.3 To provide details of the **OUTCOME** for each of these Service requests, a breakdown of the outcome codes recorded for each is shown in Table 2 below. For ease of understanding, the outcomes have been consolidated under 5 main headings.

**Table 2: Breakdown of the outcome for Service Requests**

<b>Outcome Descriptor</b>	<b>Number</b>
Open – under investigation	331
No Breach/No Further Action Required	915
Advice, Guidance & Informal Resolution	1340
Statutory / Formal Enforcement Action	121
Case Referred, Withdrawn or Managed Elsewhere	432
Internal / Administrative (Manager Use Only)	461
<b>Grand Total</b>	<b>3600</b>

For the full set of outcome codes recorded on our database please refer to **Appendix 3** which outlines how our database outcome codes have been consolidated into these headings.

6.4 To provide an indication as to the different demand between the ward areas, a breakdown of the numbers within the individual ward areas is shown in Table 3 below:-

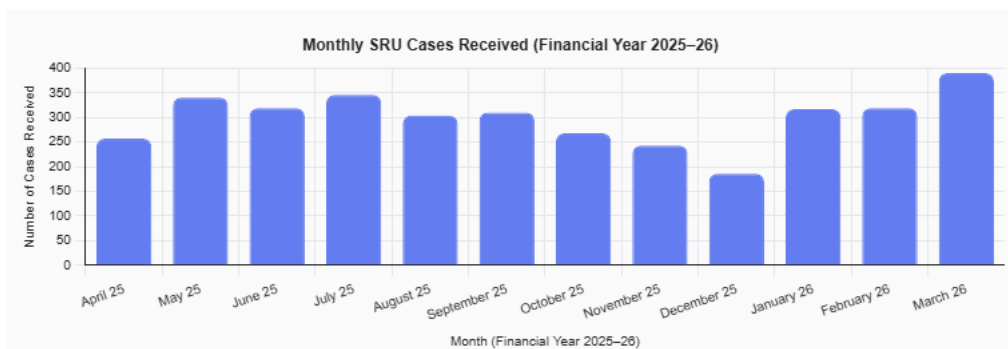

**Table 3 – Service Request Numbers by Ward Area**

Ward No	Area	Total No of Service Requests
13	Aird & Loch Ness	668
14	Inverness West	502
15	Inverness Central	942
16	Inverness Ness-Side	318
17	Inverness Millburn	393
18	Culloden & Ardersier	394
20	Inverness South	383
<b>Total Inverness City Area*</b>		<b>3600</b>

*\*This figure does not include the number of Contaminated Land planning screening assessments undertaken in each ward area. These are recorded on a separate database.*

6.5 To provide an indication as to the variations in demand across the year, a breakdown by calendar month is provided in Fig 1 below:-

**Fig 1: Monthly breakdown of Service Request demand**

6.6 In addition to the above Service Requests, 976 planning applications were screened by our Contaminated Land Officers. Whilst the majority of actions were only advisory/informative due to the proposed developments not materially changing the risk of potential contamination, a number of applicants were required to submit detailed site histories and/or recommended to undertake further contamination site investigations, remediation or validation works at former uses such as depot/petroleum licensed sites; electrical works; landfill/refuse sites; engineering works, railway land, sheep dips, smiddy and miscellaneous works.

6.7 Table 4 below provides the number of Housing Scheme of Assistance and Private Water Supply Improvement Grants that have been approved during the period within Wards 11 and 21:-

**Table 4 – Number and value of Approved Grants**

Type	Number	Total Value of Grants
Scheme of Assistance Housing Grant – <b>Adaptation</b> (i.e. for installation of stairlifts; level access showers and access ramps etc)	7	19,106.85*
Private Water Supply Grants (i.e. to carry out improvements to the private water supply system)	16	32,655.88

\*-total grant expenditure in year (will have carry over from committed spend in 2024/25)

**6.8 Abandoned Cars**

As highlighted in Section 6.2 above, there was a significant increase in the number of abandoned vehicle reports last year. A detailed breakdown of the service requests is included below in Tables 5 and 6 for reference:-

**Table 5: Service request by Type of Vehicle Reported Abandoned**

Vehicle Type	Number of Service Requests
Car	214
Van	53
Trailer	2
Caravan	18
Boat	1
Motorbike	2
Other	3
Blank	266*
<b>Total</b>	<b>560</b>

\*The use of the descriptor codes to permit more detailed reporting of the abandoned vehicle service requests commenced in June 2025 and this is reason why a number recorded as blank.

**Table 6: Status of reports of Abandoned Vehicle**

For ease of understanding, the outcomes recorded against these reports have been consolidated under 7 main headings

Status	Number of Service Requests
Under Investigation/Monitoring	69
Not Abandoned – Case Closed	210
Self-resolved	52
Following intervention, vehicle removed	91
Enforcement Action – Vehicle uplifted and destroyed	39
Invalid or Unactionable Report	53
Other/Exceptional Outcome	46
<b>Total</b>	<b>560</b>

For the full set of outcome codes recorded on our database please refer to **Appendix 3** which outlines how our database outcome codes have been consolidated into these headings.

Our Service is currently undertaking a review of our operational procedures in respect to reports of abandoned vehicles due to the significant increase across Highland. A report is being put to the Communities and Place Committee on 21 May specifically on the topic.

- 6.9 As well as being a statutory consultee for miscellaneous licences, Environmental Health also administer the issuing of these licences. Miscellaneous licensing includes animal boarding, breeding, and selling, riding establishments, caravan sites, cinemas, dangerous wild animals, performing animals, venison dealers and zoos. Full details [here](#).

The Miscellaneous Licences are typically issued for a calendar year. The exception is caravan site licences for touring/holiday sites – applications are only required if new site or change in licence holder.

**Table 7 – Miscellaneous Licence Activity within the City of Inverness Wards**

<b>Licence Type</b>	<b>2026</b>
Animal Boarding Establishment	28
Breeding of Dogs	3
Cinemas Act 1985	1
Animal Welfare/Rehoming	1
Riding Establishment	4
Animal Welfare – Selling	2
Venison Dealers	1

#### **Pro-Active/Scheduled Work**

- 6.10 The Environmental Health team conduct a range of programmed work, particularly in respect of food safety where a significant number of inspections/interventions are conducted of food businesses to check compliance. Such work is in addition to responding to Service Requests.

A breakdown of the number of programmed inspections/visits/Interventions that were undertaken for the period **1 April 2025 – 31 March 2026** within the City of Inverness area wards is detailed within Table 8 below:-

**Table 8 - Pro-Active Inspections/Visits/Interventions by Type**

For ease of understanding, the outcomes recorded against these reports have been consolidated under 5 main headings.

<b>Visit Type</b>	<b>Number</b>
Food Safety/Hygiene/Advisory Intervention	132
H&S Workplace Pro-active Intervention	1
Licensing Compliance Check/Intervention	213
Animal Health	6
Air Quality Calibration	30

For the full set of outcome codes recorded on our database please refer to **Appendix 3** which outlines how our database outcome codes have been consolidated into these headings.

Please note that these figures **do not** include any reactive inspections/visits conducted in response to a Service Request (i.e., complaints or licence consultation visits).

- 6.11 The Council’s Private Water Supply Register records a total of 486 private water supplies within the Inverness ward areas. Of these, 178 are regulated (commercial) supplies, serving 509 linked properties and an estimated population\* of 3,465 people. The remaining 308 are exempt (domestic) supplies, serving 427 linked properties with an estimated population\* of 1,309 people. (\*Estimates based upon available data).

All regulated private water supplies are subject to annual monitoring through sampling, with a full risk assessment by the Council required at least once every five years.

The introduction of Short-Term Licensing (STL) has meant a significant number of new PWS supplies are now considered to be regulated supplies as they are considered commercial when serving a holiday let property.

**Formal Enforcement Activity**

- 6.12 Whilst the vast majority of service requests and issues identified by the Environmental health team are satisfactory resolved without the need to pursue formal enforcement action (i.e., by following the 4 Es approach), there is always a number of cases due to their seriousness or failure of the duty holder to comply, where formal enforcement action is required.

A breakdown of the number and type of enforcement notices that have been served between 1 April 2025 and 31 March 2026 in the Lochaber area wards are detailed in Table 9 below:-

**Table 9 – Enforcement Notices Served between 1<sup>st</sup> April 2025 & 31<sup>st</sup> March 2026**

Notice Type	Number Served
<b>Health and Safety</b>	
Improvement Notice	1
Prohibition Notice	1
<b>Food Safety</b>	
Hygiene Improvement	0
Remedial Action Notice	1
Environmental Protection	1
Dog Control	1

All enforcement notices were complied with by the duty holder.

The relatively low numbers of notices being issued serves as a strong indicator of the officers’ professionalism and effectiveness in achieving outcomes by applying the principles of the 4E’s (Engage, Educate, Encourage, and Enforce) approach, and avoiding the necessity of formal action

## **7 Local Matters**

- 7.1 City of Inverness Gull Management Plan. The Highland Council and NatureScot have jointly committed to the development and delivering a pilot gull management plan for the City of Inverness. Further details will be set out in a separate report to this committee that outlines the full Gull Management Plan proposals.
- 7.2 Staffing capacity challenges resulted in a reduction in proactive Environmental Crime and Dog Control operations in the city centre, with resources necessarily directed towards responding to service requests. This area of work is a priority for 2026/27 where intention is to undertake a more pro-active approach to tackling areas of concern.
- 7.3 A complaint relating to forestry operations in proximity to two private water supplies was fully investigated. This was supported by effective multi-agency collaboration with SEPA and Scottish Forestry, alongside the provision of appropriate advice, support, and reassurance to the affected private water supply owners.
- 7.4 Complaints of bedbug activity in holiday accommodation were investigated. Guidance and advice were given, and the business demonstrated engagement of a professional service. Bedbugs are not categorised as a statutory nuisance and they are generally not regarded as a public health hazard therefore responding to these complaints, involves engagement, education and ensuring the employment of a competent pest control operative.
- 7.5 Environmental Health has been engaged with the Licensing team in assessing and commenting on the Home Office proposals for the use of Cameron barracks, as asylum accommodation in terms of the HMO licensing requirements. This is an on-going process.
- 7.6 Scottish Government funding enabled Environmental Health Officers to undertake air quality monitoring and awareness-raising at seven (7) Inverness primary schools: Balloch, Milton of Leys, St Joseph's, Smithton, Raigmore, Ness Castle and Drummond. This was part of a project that has been undertaken since March 2022 to monitor air quality at primary schools. The monitoring included NO<sub>2</sub> diffusion tubes over three to four months and short-term indicative monitoring using EarthSense Zephyr® units. It was pleasing to find that none of the schools exceeded the Scottish Government annual average NO<sub>2</sub> air quality objective of 40 µg/m<sup>3</sup>.

## **8 Highland Wide Issues/Service Priorities**

### **8.1 Short Term Lets**

The short term lets licensing regime commenced on 1 October 2022. The team have a key role as a consultee on applications, assessing compliance at licensed premises and responding to complaints. To date, the Environmental Health Team have responded to over 9000 licence applications. It is estimated that there could be up to 10,000 short term let properties within Highland. The implementation of the scheme will continue to be a priority and require significant resource going forward to conduct compliance monitoring; complaint investigations and process both new and renewal applications. Renewal applications are now being received.

## 8.2 Animal Health – New Enforcement Powers

Recent legislative changes have introduced new fixed-penalty powers for enforcing animal health and welfare requirements. These powers provide officers with an additional, proportionate tool to address non-compliance, enabling swift and effective action where breaches are identified without the need for immediate escalation to formal reporting or court proceedings. This is particularly important in Highland, where livestock farming, crofting, and frequent animal movements are integral to the rural economy. Maintaining high standards of biosecurity and disease control is essential to protecting animal health, safeguarding the food chain, and preserving the region's reputation for high-quality agricultural produce.

At present, the Council is awaiting the final enforcement guidance from the Scottish Government on the implementation of these new fixed-penalty provisions. Once this guidance is issued, targeted training will be provided to the Council's three Animal Health Officers, and the necessary enforcement protocols and procedures will be put in place.

## 8.3 EU Exit/Export Certification

The Environmental Health team continues to undertake a range of EU-exit-related activities, including inspections and audits of food businesses involved in export to verify compliance with legislative requirements; the provision of Export Health Certificates; and ongoing liaison with both the UK and Scottish Governments regarding import control arrangements. The team also supports the organisation and delivery of audits carried out by countries receiving Highland-produced exports.

This work remains a priority for Environmental Health in Highland due to the region's significant reliance on food production, particularly within the aquaculture, meat, and game sectors. Many local businesses depend on access to international markets, and maintaining compliance with evolving export and import regulations is essential to safeguard these trade routes.

Whilst there may be upcoming changes in the requirement to provide Export health Certification, it is unlikely that any such changes will be implemented within the next 18 months and so this will continue to be a priority for the Service.

## 8.4 Approved Food Establishments

The team is continuing with the implementation of a new national approach to inspection of Approved Food Establishments – Official Control Verification (OCV). Approved Establishments are manufacturers of products of animal origin (i.e., smokehouses; fish processors, dairies, manufacturing butchers etc).

This approach, which is required across **83\*** establishments in Highland, has increased the resourcing necessary to inspect such premises.

*\*The figure of 83 is subject to change depending on whether a premises continues to require approval or not for the activities undertaken, or for any new premises requiring approval.*

### 8.5 Non-Surgical Cosmetic procedures – Licensing

New Scottish Government legislation will introduce a licensing scheme for non-surgical cosmetic procedures (i.e., such as fillers and injectable treatments). The aim is to strengthen public protection by ensuring practitioners and licensed premises meet consistent hygiene, safety, and competency standards. Local authorities will be responsible for administering and enforcing the new licensing regime. The Scottish Government has indicated that the legislation is expected to be introduced during 2026, with licensing requirements coming into force following the publication of final guidance. Once this guidance is issued, Environmental Health will work with colleagues in Licensing to develop procedures to support effective implementation across Highland.

### 8.6 Renewable Developments

Environmental Health continues to provide significant input to major infrastructure and renewable energy developments across Highland, including SSEN Transmission projects and proposals for wind farms, Battery Energy Storage Systems (BESS), and hydro schemes. Officers from all area offices assess and respond to planning consultations, with a particular focus on complex noise assessments and potential noise impacts. This work has been substantial over the past few years and is expected to continue throughout 2026/27 and beyond, reflecting the scale of national infrastructure investment in the region.

### 8.7 Green Freeport

With development associated with the Inverness and Cromarty Firth Green Freeport expected to increase for the foreseeable future, there will be a corresponding rise in demand on Environmental Health resources to assess potential environmental impacts. This will include work on contaminated land assessments and the evaluation of operational impacts such as noise etc. Environmental Health input is critical at this early stage of development to ensure that such developments are safe and delivered in a way that protects public health. By identifying risks early and setting clear requirements for mitigation, the team helps maintain community confidence, supports responsible economic development, and ensures compliance with statutory environmental standards during both the construction and operational stages of such developments

### 8.8 Environmental Crime

Environmental Health will place a renewed focus on tackling Environmental Crime in 2026/27 and beyond, with particular emphasis on issues such as abandoned vehicles, fly-tipping, and other forms of antisocial environmental behaviour. The Service recognises that these matters are a priority for many Local Members, as they have a direct impact on community wellbeing, local amenity, and the wider environment. Addressing them often requires coordinated, multi-agency action. By prioritising this area of work, Environmental Health aims to take a more proactive approach, strengthen enforcement activity, and ensure that incidents are managed promptly, consistently, and effectively across Highland.

## 9 **Going Forward**

- 9.1 The local team will continue to follow the priorities as set by the Environmental health Operational plan and respond to any local emerging issues as and when they arise. Any urgent public health issues will always continue to be prioritised.

9.2 The local team would welcome feedback on this report, particularly on the usefulness of the information provided, the type of data presented, and the overall report format. We are also keen to hear what additional information Members would find helpful in future reports. In addition, we would welcome any views on local issues that Members believe should be prioritised or given increased attention going forward.

Designation: Assistant Chief Executive - Place

Date: 28 April 2026

### Appendix 3 – Consolidation of Outcome Codes used on the Environmental health Civica database

For ease of understanding within the report, our Service consolidated a number of the recorded outcome codes/descriptors that are used within our Civica database.

The following outlines how we have consolidated the codes.

#### Service Requests - Section 6.3 – Table 2

<b>Database Outcome Descriptor</b>	<b>Consolidated Report Descriptor</b>
<i>No breach identified</i>	No Breach/No Further Action
<i>NO FURTHER CONTACT from Client</i>	
<i>Logged as INTEL or INFORMATION ONLY</i>	
<i>No action possible</i>	
<i>Blank</i>	Open – Under Investigation
<i>Issued ADVICE or Information</i>	Advice, Guidance & Informal Resolution
<i>INFORMAL or VERBAL ACTION Taken</i>	
<i>Responded to CONSULTATION / FOI etc.</i>	
<i>CERTIFICATE(S) etc. Issued</i>	
<i>Formal enforcement action taken</i>	Statutory / Formal Enforcement Action
<i>REFERRED to OTHER THC Department</i>	Case Referred, Withdrawn or Managed Elsewhere
<i>REFERRED to EXTERNAL Organisation</i>	
<i>Client cancelled service</i>	
<i>ALREADY LOGGED in Flare</i>	
<i>Not actioned (manager use only)</i>	Internal / Administrative (Manager Use Only)
<i>OTHER (give details)</i>	

#### Abandoned Vehicles - Section 6.7 – Table 6

<b>Database Outcome Descriptor</b>	<b>Consolidated Report Descriptor</b>
<i>Under On-Going Investigation</i>	Under Investigation/Monitoring
<i>Deemed NOT abandoned - Monitor</i>	
<i>Deemed NOT abandoned – Case Close</i>	Not Abandoned – Case Closed
<i>Objection received by Landowner</i>	
<i>On initial visit, vehicle gone</i>	Self-resolved
<i>On any revisit, Vehicle gone</i>	Following intervention, vehicle removed
<i>Removed and Destroyed</i>	Enforcement Action – Vehicle Removed
<i>No further contact or details</i>	Invalid or Unactionable Report
<i>Insufficient information to locate vehicle</i>	
<i>Duplicate request from same complainant</i>	
<i>Duplicate request from different complainant</i>	
<i>Other – details in comments</i>	Other/Exceptional Outcome

**Pro-Active Inspections/Visits/Interventions – Section 6.8 – Table 7**

Database Outcome Descriptor	Consolidated Report Descriptor
Animal Health (Licensed Premiss	Animal Health
Animal Health (National Scheme	
EH Food Law	Food Safety/Hygiene/Advisory Intervention
EH Licensing	Licensing Compliance Check/Intervention
Health & Safety	H&S Workplace Pro-Active Intervention
Pollution	Air Quality Calibration
