

Legend

- 10 km LVIA Study Area
- Distance from Proposed Alignment : 1 km, 2 km, 5 km
- Development for which Section 37 Consent is Sought
 - Proposed OHL Alignment - 400 kV
- Caledonian Canal Tower Height
 - CB-1 (69.57 m)
 - CB-2 (96.57 m)
- Zone of Theoretical Visibility (ZTV) (Number of Towers Visible)
 - Light pink: 1 tower visible
 - Medium pink: 2 towers visible
 - Dark pink: 3 towers visible
 - Purple: 4 towers visible

ZTV Note:

- 1) The theoretical visibility of taller than average towers in proximity to the Caledonian Canal is calculated based on their design heights of 69.57 m and 96.57 m. The assumed viewer eye height is 2 m above ground level. The visibility of these towers is cut off at 5 km each.
- 2) The digital elevation model is derived from 2m LiDAR Digital Surface Model (DSM) data and covers a 5 km offset on both sides of the proposed OHL alignment.
- 3) Earth curvature and atmosphere refraction have been taken into account.
- 4) The ZTV is based on the Design Freeze 4.
- 5) Refer to **Section 7.2 of Chapter 7: Landscape and Visual** for ZTV creation methodology.
