Reay Primary is located in a rural, coastal setting serving the local community of Reay area on the north coast of Caithness.

There are 40 children attending the school P1 - P7. We have two multi-stage classes P1- 4 and P5 -7. There is a separate nursery which is run by a Partner Centre.

The headteacher has overall leadership responsibility for Reay Primary School and Halkirk Primary School. The headteacher is supported by a Principal Teacher (0.6 at Halkirk Primary School and 0.4 at Reay). Staff and children from the cluster schools work together regularly.

As the school roll comprises a small number of children, attainment and progress will be expressed in 'overall' statements, rather than specific year groups or Curriculum for Excellence levels. This is to ensure the identity of individuals is not disclosed.

Overall, attainment across the school in literacy and English and numeracy and mathematics is very good. Children achieve appropriate CfE levels in literacy and numeracy. Most children who face barriers to learning are making good progress towards meeting their individual targets.

Overall children are making the following progress:

Reading	Writing	Listening and talking	Numeracy
Good progress	Good progress	Good progress	Good progress

Aims

At Reay, we strive to provide the highest quality learning and teaching. We try to ensure that all our children attain and achieve their full potential and acquire the wide range of skills and abilities relevant to growing, living and working in the contemporary world. We fully support the development of skills for life long learning and work. As a Rights Respecting School, we put the Rights of the child at the heart of everything we do. We work hard to ensure that all children feel valued, respected, safe and secure. We continue to develop our school so all have a voice and a feel of belonging. We help to prepare our confident pupils for successful learning pathways enabling them to become effective contributors and responsible citizens within the community of Reay, Caithness, Scotland and beyond.

School Priority 1: PLAY PEDAGOGY (Building a high-quality learning environment focussing on purposeful play)		
School Improvement Plan Priority 1		
Summary of progress	**Next steps**	**Stakeholder Views**
We have made good progress in developing play pedagogy, with a clear focus on creating high-quality learning environments which promote purposeful play. This aligns well with National Improvement Framework drivers and Highland Priorities, particularly in improving learning, teaching and assessment, and supporting children's wellbeing and engagement. Across the school, staff have worked collaboratively to design stimulating, well-resourced environments that support child-led and adult-guided play. This has resulted in increased engagement, motivation and independence among learners. Children are more confident in leading their own learning through play and can increasingly explain what they are doing and why, demonstrating a growing understanding of their skills and progress. The introduction of consistent approaches to observing and responding to children during play has strengthened practitioner interactions and ensured that learning is appropriately challenged and extended. As a result, most children are making good progress across curricular areas, with clear evidence of improved communication, creativity and problem-solving skills. Our focus on purposeful play has also supported equity, ensuring that all children have access to rich, inclusive learning experiences tailored to their needs. Staff are increasingly responsive in planning next steps based on observations, leading to more personalised learning opportunities. Engagement has been a key strength. Children are highly motivated and actively involved in their learning. Staff regularly share practice and reflect together to ensure consistency and improvement. Parents and carers are becoming more aware of the value of play through ongoing communication and involvement, strengthening partnerships between home and school.	• **Strengthen the link between purposeful play and attainment**, ensuring that *all practitioners* clearly plan for and track progress in literacy, numeracy and health and wellbeing within play-based learning. • **Improve the use of assessment evidence**, so that *all staff* consistently gather high-quality evidence from purposeful play to demonstrate progress and inform next steps for individual learners. • **Ensure equity in attainment**, with a continued focus on purposeful play approaches that support *all children*, particularly those who require additional support, to achieve their full potential. • **Ensure equity in attainment**, with a continued focus on purposeful play approaches that support *all children*, particularly those who require	See Stakeholder views in Comment Section.

	additional support, to achieve their full potential.	
Impact		
• Almost all children are experiencing high-quality, purposeful play • This approach is leading to improved engagement, motivation and participation in learning • Children are becoming more confident and independent learners • Most children are making good progress in literacy, numeracy and health and wellbeing as a result of increased opportunities for challenge, application of skills and meaningful contexts for learning. • We continue to show equity with almost all children including those who require additional support. • Children are continuing to develop important life skills such as communication, creativity, problem solving and resilience.		

School Priority 2: OUTDOOR LEARNING (Linked to Play Pedagogy)		
School Improvement Plan Priority 2		
Summary of progress	**Next steps**	**Stakeholder Views**
We have made good progress in developing outdoor learning as a key element of our play pedagogy, with a clear focus on creating high quality, purposeful outdoor play learning experiences. This work aligns closely with the National Improvement Framework Drivers and Highland Priorities particularly in improvement in children and young peoples' health and wellbeing and ensuring wellbeing, equality and inclusion. This work supports children to feel safe, respected and included, while providing meaningful opportunities to engage in high-quality, purposeful play experiences. The outdoor environment has been carefully developed to be nurturing, inclusive and accessible to all children. Through both child-led and adult-guided play, children are highly engaged and demonstrate increasing confidence, independence and resilience. Opportunities for outdoor learning have positively impacted children's physical and emotional wellbeing, with most children showing increased motivation, improved social skills and a greater sense of belonging within the school community. Staff interactions within the outdoor environment are increasingly responsive and attuned to children's individual needs. Practitioners promote positive relationships, model inclusive language and support children to work cooperatively, helping to build respect, empathy and a shared understanding of fairness. As a result, children are developing important life skills such as teamwork, communication and problem-solving within a supportive and inclusive context. Our approach to play pedagogy outdoors has strengthened equity, ensuring all children can access rich and meaningful learning experiences regardless of their background or needs. Staff use observations effectively to plan next steps that are personalised and inclusive, supporting children to achieve success and make progress at their own pace. Engagement across the school community has been a key strength. Children are enthusiastic and actively involved in outdoor learning, staff collaborate effectively to share practice, and parents are increasingly engaged through communication about the benefits of outdoor learning and play. This has strengthened relationships	Moving forward, we will continue to embed a shared understanding of high-quality outdoor purposeful play across the school, ensuring that almost all practitioners provide consistent, nurturing and inclusive experiences which promote children's wellbeing and engagement. We will strengthen the quality of adult interactions within the outdoor environment, with a focus on modelling positive relationships, using inclusive language and supporting children's social and emotional development. There will be an increased emphasis on children's voice and participation, ensuring that almost all children feel listened to, respected and actively involved in shaping their outdoor learning experiences. We will further develop assessment approaches within outdoor learning, with most staff using observations more consistently to identify children's wellbeing needs and inform next steps in learning. A continued focus on equity and inclusion will ensure that all children, including those requiring additional support, can fully access and participate in high-quality outdoor experiences. Opportunities to promote wellbeing will be extended further, enabling most children to continue to develop confidence, resilience and positive relationships through purposeful outdoor play. In addition, we will strengthen parental engagement so that most parents and carers have a clearer understanding of the positive impact of outdoor learning on children's wellbeing and development. Senior leaders	See Stakeholder views in Comment Section

	and staff will enhance monitoring and evaluation processes to ensure ongoing review of the impact of outdoor learning on wellbeing, inclusion and engagement, supporting continuous improvement across the school.	
Impact		
• Almost all children feel safe, nurtured, respected and included within high-quality outdoor learning environments. • Most children demonstrate improved confidence, resilience and wellbeing, with a stronger sense of belonging across the school community. • Through purposeful play, most children are developing as responsible and active learners, showing respect, fairness and empathy in their interactions with others. • Children's voices are increasingly central to their learning and they are becoming more involved in decision making in their outdoor experiences. • All practitioners demonstrate an improved understanding of their role in promoting wellbeing, equality and inclusion through outdoor learning. Stronger professional dialogue and shared practice led to greater consistency across the school, supporting improved outcomes for all learners
