

## **Highland Council Policy for Windows and Doors - Update**

The Council's Policy for Windows and Doors is complete and ready for public consultation. However, following discussion with the development plans team it was agreed to delay the document so it can go out for public consultation alongside the proposed Highland-wide Local Development Plan. The proposed plan contains a different 'hook' for statutory supplementary planning guidance relating to the historic environment than currently and as such it is more logical for Windows and Doors policy to go out for consultation alongside the plan that contains the correct references to the document. This should ultimately help avoid confusion and simplify the process for the public.
